Armor Command: The Personal Story of a Commander of the 13th Armored Regiment Brig.-Gen. Paul McDonald Robinett,2017-07-11 "Armor Command is a candid book presenting the activities and observations of an armor commander who was among the first overseas and in action against the European Axis in World War II. All who are interested in the activities of combat troops that make or break the reputations of high military figures and all those who desire an understanding of life in the combat zone will find this book of compelling interest. Military men will find it of professional value for it deals with the problems of a small command in the initial campaign against the German-Italian Allies. Among other things it deals with the problems of the meeting engagement and the withdrawal—two of the most difficult operations in war."—Foreword

Fields of War: Battle of Normandy Robert J Mueller,2014 A complete guide to Normandy Battlefields providing the history, places, and people who made victory in the Second World War possible. Recipient of 7 National book awards. On 6 June 1944, 156,000 American, British, and Canadian servicemen fought ashore on beaches along the Normandy coast or landed from the air to begin wresting back Nazi occupied Europe. The D-Day invasion was the largest amphibious landing in history. Although successful, it was only precursor to months of the deadly fighting necessary to dislodge stubborn German defenders

from the Norman countryside and eventually liberate France. As a visitor's guide, *Fields of War: Battle of Normandy* presents the actual locations of key events in the struggle to free France from German occupation. Each battlefield visit begins with a succinct history of events followed by a description of the intense military action that determined success or failure. Extensive detailed maps illustrate the flow of the battle across the landscape and the units that participated. Detailed driving instructions and GPS co-ordinates direct visitors to each battlefield site. Descriptions of museums, memorials, cemeteries, and surviving artifacts are given along with their hours of operation. Mailing, email, and web addresses are also provided.

**Tank Gunnery for M551 Armored
Reconnaissance/airborne Assault Vehicle (ARAAV).**

United States. Department of the Army, 1977

U. S. Army Armored Division 1943-1945 Yves J. Bellanger, 2010-06-01 The author presents an extremely detailed record of the organization, doctrine, and equipment of the Armored Division of September 1943. He examines each unit of the division. A chapter is dedicated to the Tank Battalion, Armored Infantry Battalion, but also Maintenance and Medical Battalions. The author examines the organization and tactical doctrine of each unit and studies the doctrine of employment of the unit, as well as the duties of key personnel. Each sub-unit is presented by lists of personnel, weapons, vehicles, and equipment. The book includes 146 charts depicting the

organization of all units. In each chapter, a special paragraph examines the modifications made in the field by armored division's units, as found in unit reports, and histories, and veterans recollections. This is an essential reference for re-enactors, modellers, wargamers, researchers, and all those who require a detailed guide to the U.S. Armored Division during WWII.

Guderian Russell A. Hart, 2006-10-01 While undoubtedly a great military figure of appreciable ego and ambition and with a volatile, impetuous, and difficult personality, Guderian was determined to achieve his vision of a war-winning armored force irrespective of the consequences. He proved to be a man who was politically naive enough to fall under the sway of Hitler and National Socialism and yet arrogant enough to believe he could save Germany from inevitable defeat late in the war, despite Hitler's interference. At the same time, Guderian failed either to participate in attempts to remove Hitler or to denounce as traitors the conspirators who did. In the end, he twisted the truth to establish his place in history. In the process, he denigrated the myriad important contributions of his fellow officers as he took personal credit for what were, in reality, collective accomplishments. Thus, he succeeded in creating a legend that has endured long after his death.

Analysis of Command and Control Battlefield Functions as Performed in the Armored Brigade J.

Patrick Ford, William J. Mullen, J. Ward

Keesling, 1997 The purpose of the research was to document the synchronization required by command

and control tasks performed within the armored brigade, to include CS/CSS units. The immediate application of the documentation was to support developers of staff training in two related projects: Battle Staff Training System and Staff Group Trainer. The documentation was also intended to assist with the planning and execution of collective training. The documentation approach was to apply function analysis (FA) techniques for battlefield functions (BFs) in the Command and Control battlefield operating system. Thirteen FAs were developed for the Brigade headquarters and four supporting units: direct support field artillery battalion, engineer battalion, forward support battalion, and air defense artillery battery. The FAs were revised through a formative evaluation process that included internal review and successive external reviews by combat training centers, proponent agencies, and a review council representing potential users of the FAs. The final products include the FAs, a user's guide, and assessment packages for the BFs.--DTIC.

FM 6-20 Field Artillery Tactics and Techniques
United States. Army, 2018-09-30 This manual is a guide for field artillery officers and commanders and staffs of all combat arms. It is concerned

with the tactical employment of field artillery. It covers organization, command, and tactical control of field artillery. It includes a discussion of the techniques involved in target intelligence and analysis, field artillery fire planning, and the direction of field artillery fires. It includes a general discussion of the principles, organization and techniques of coordination of fire support with particular emphasis given to field artillery aspects. The employment of field artillery in airborne, amphibious, and other special operations is covered. Where the term artillery is used in this manual, it refers to field artillery. For employment of air defense artillery, see FM 44-1 and other manuals of the 44-series. For additional references, see appendix I. The material presented herein is applicable without modification to both nuclear and nonnuclear warfare.

Illuminating Tomorrow's War Martin C.

Libicki, 1999 Considers how the information revolution is creating a revolution in military affairs that will fundamentally change the way U.S. forces fight . . . supported by a system of systems⁰ that will give U.S. forces superior battlespace awareness. Chapters: precision-guided munitions; precision location; a world of sensors; the potential proliferation of the revolution in military affairs; standoff warfare; coalition structures; prospects for the grid; defining the grid; knowledge maintenance; access; security; difficulties of top-down integration; cutting to the core; planning, experimentation, & technology development; & opportunities for bottom-up

integration.

Special Police Vehicles Larry Shapiro, Most of today's law enforcement agencies maintain or have access to Critical Incident Response Teams (formerly SWAT) and their specialized vehicles. Some of the contraptions featured in this all-color, on-scene look at CIRT vehicles include SUVs, buses, motorcycles, and ATVs. Shapiro explains the functions of each vehicle and relates true stories of dangerous law enforcement tasks such as hazardous-material transportation and drug enforcement.

A Colonel in the Armored Divisions William S. Triplet, 2001 In this fascinating memoir William S. Triplet continues the saga begun in his earlier book, *A Youth in the Meuse-Argonne: A Memoir, 1917-1918*. After serving in World War I, Triplet chose to become a career military man and entered West Point. Upon graduation in 1924, his assignments were routine--to regiments in the Southwest and in Panama or as an officer in charge of Reserve Officers' Training Corps units or of men sent to a tank school. All this changed, however, when a new war opened in Europe. From 1940 to 1942, Triplet was assigned to the Infantry Board at Fort Benning, Georgia, where he engaged in testing new weapons and machines for the expanding army. He became a full colonel in December 1942. After leaving Benning he received posts with four armored forces: the Thirteenth Armored Division forming in the United States, an amphibious tank and troop carrier group training at Fort Ord, California, and the Second and Seventh Armored Divisions in Europe. His

extraordinary abilities as a tank commander became evident in the Seventh Armored, where he took over a four-thousand-man unit known as Combat Command A. He was soon moving from triumph to triumph as he led his unit into Germany. Here was much room for professional judgment and decision, and the colonel was in his element. In the war's last days Triplet and his men fought their way to the Baltic, preventing many German troops from joining in the defense of Berlin against the advancing Soviet army. Although Triplet was recommended for brigadier general, Dwight D. Eisenhower believed the U.S. Army had enough generals to finish the war; thus, the indomitable Triplet served out the few remaining years of his career as a colonel. After retiring in 1954, Triplet moved to Leesburg, Virginia, where he soon began to mull over his military experiences. Fascinated by the history he had witnessed, engaged by the attraction of writing about it, he recorded his memories with a combination of verve, thoughtfulness, and harsh judgments concerning ranking officers he considered incompetent-- generals not excluded. Through his annotations, Robert H. Ferrell provides the historical context for Triplet's experiences. Well written and completely absorbing, *A Colonel in the Armored Divisions* provides readers the rare opportunity to see firsthand what a real professional in the U.S. Army thought about America's preparation for and participation in the war against Germany and Japan.
