OKB Ilyushin Yefim Gordon,E. Gordon,Dmitriy Komissarov,Sergey Komissarov,2004 Established in 1934, the Ilyushin design bureau is one of the best-known Soviet/Russian aircraft design companies. Over the years, the Ilyushin OKB has developed aircraft for widely varying roles. Its first aircraft to achieve production status, the DB-3 bomber, entered service in 1936. The IL-2 (Shturmovik) armored attack aircraft brought Ilyushin well-earned fame; this aircraft fought with considerable success during World War II. The OKB's involvement with combat aircraft continued with the experimental IL-22 four-jet counterpart of the English Electric Canberra. However, it was those years that marked the OKB's transition to transport aircraft from the twin-engined IL-12 of 1945 developed as a 'DC-3 replacement', followed by many successful aircraft, including the four-turboprop IL-18 airliner (1957), the four-turbofan long-half IL-62 (1961), the IL-76 military/civil freighter (1971) and the first Soviet wide-body airliner, the IL-86 of 1976. The company has also moved into general aviation with the IL-103 four-seater.

The General Aviation Handbook Roderick W. Simpson,Rod Simpson,2005 This is a completely new and revised edition of the General Aviation Handbook, long overdue since it has been over 10 years since the last edition was published. This edition is fully revised and updated and contains 10 years worth of updated material, including the addition of a number of manufacturers and aircraft which were omitted from earlier editions for various reasons. Aircraft new to this edition include the so-called heavy microlights, which are now an important part of the worldwide light aircraft scene. About 90 percent of the photos are new, and larger page size provides greater space for large data tables and photos. Previous editions have been strong sellers; this is the main reference book on this important sector of the aviation world, and this new edition will be welcomed by both aviation enthusiasts and those involved in the aviation industry.

Ilyushin Il-2 Yefim Gordon,Sergey Komissarov,2010 This is the definitive history of the Ilyushin Il-2 Sturmovik and provides detailed coverage on every aspect of this famous warplane. This is perhaps the most famous aircraft in the history of Russian and Soviet aviation. During World War 2 this rugged ground attack aircraft was arguably the Soviets' most effective weapon. Protected by its heavy armor, the low-flying aircraft was incredibly difficult to shoot down, and its powerful array of weaponry included a cannon, machine guns, rockets, and special HEAT antitank bombs. It was capable of penetrating the armor of every German tank in the field at the time, including the Panther and Tiger tanks, as well as reaping destruction among the ranks of enemy infantry on the ground. The Il-2 was so successful that the design was produced in greater numbers than any other military aircraft in history, with over 40,000 being built between 1941 and 1955.

Despite some initial difficulties, this Soviet equivalent of the Lockheed Electra eventually proved to be extremely successful, offering high comfort and good operating economics for its day. The IL-18 was supplied to many friendly nations in Eastern Europe, Asia, Africa, the Middle East and the Caribbean. Its uses included passenger and cargo carriage, VIP transportation, support of Soviet research stations in Antarctica, electronic espionage and various research and development programs, both civil and military.This book charts the development history of the IL-18. It also provides information on an earlier piston-engined airliner of the same name which turned out to be ahead of its time and was destined never to enter production. It also describes all the principal commercial versions as well as test and development aircraft.Separate chapters are dedicated to aircraft in the IL18 family which bore separate designations, such as the IL-20M ELINT, the IL-20RT space tracker, the IL-22 airborne command post, the IL-24N ice reconnaissance aircraft used to support commercial shipping operations in the Arctic regions and the IL-38 anti-submarine warfare aircraft.
