

Ilyushin Il 2

Yefim Gordon,Dmitriï Komissarov

Ilyushin Il-2 Yefim Gordon,Sergey Komissarov,2010 This is the definitive history of the Ilyushin Il-2 Sturmovik and provides detailed coverage on every aspect of this famous warplane. This is perhaps the most famous aircraft in the history of Russian and Soviet aviation. During World War 2 this rugged ground attack aircraft was arguably the Soviets’ most effective weapon. Protected by its heavy armor, the low-flying aircraft was incredibly difficult to shoot down, and its powerful array of weaponry included a cannon, machine guns, rockets, and special HEAT antitank bombs. It was capable of penetrating the armor of every German tank in the field at the time, including the Panther and Tiger tanks, as well as reaping destruction among the ranks of enemy infantry on the ground. The Il-2 was so successful that the design was produced in greater numbers than any other military aircraft in history, with over 40,000 being built between 1941 and 1955.

Il-2 Shturmovik Guards Units of World War 2 Oleg Rastrenin,2013-08-20 Over 43,000 Il-2/10s were built between 1941 and 1955, more than any other combat aircraft in history, making this one of the most important Soviet aircraft deployed in World War II. Built originally as a two-seater, the Il-2 had lost the rear gunner's position by the time it started to reach frontline units. Armed with ground-attack rockets, the aircraft proved deadly against Wehrmacht panzers as pairs of Il-2s roamed the frontline at low level. However, the Shturmoviks (armoured attackers) were vulnerable to attack from the rear by enemy fighters, so Ilyushin reverted to the two-seat layout in September 1942. Oleg Rastrenin provides a fascinating account of the complex development history of a plane that was crucial to Russia's defence. From Stalingrad to Kursk to Berlin, this book charts the aeroplane's vital contribution to the most famous battles of the Eastern front.

Ilyushin Il-2 and Il-10 Shturmovik Yefim Gordon,Sergey Komissarov,2004 This is a detailed history of the Il'yushin Shturmovik which formed the backbone of the Soviet air force for much of World War Two.

Ilyushin Il-2 AM-8 Maciej Noszczak,2011-07-15 The Ilyushin Il-2 was a World War II ground-attack aircraft, produced by the Soviet Union in very large numbers. In combination with its successor, the Ilyushin Il-10, over 40,000 were built, making it the single most produced military aircraft design in all of aviation history, as well as one of the most produced piloted aircraft in history. Regarded as the best ground attack aircraft of World War II, it was a prominent aircraft for tank killing with its accuracy in dive bombing and its 37mm guns penetrating their thin back armor. To Il-2 pilots, the aircraft was simply the diminutive Ilyusha. To the soldiers on the ground, it was the Hunchback, the Flying Tank or the Flying Infantryman. The Il-2 aircraft played a crucial role on the Eastern Front, and in Soviet opinion it was the most decisive aircraft in the history of modern land warfare. Joseph Stalin said of them that They are as essential to the Red Army as air and bread. About Top DrawingsL This series of highly illustrated books present detailed scale drawings of aircraft and vehicles, with supporting color profile artwork. The different versions of the plane, from the prototypes to the final aircraft of 1945 are described and illustrated; all the changes in specification, equipment and performance are recorded. Drawings and data from the original technical manuals, full dimensional details and photographs of surviving examples preserved in aviation museums illustrate all aspects of the airframe, inside and out. Wartime photographs and many pages of color illustrations complete the book's comprehensive coverage. About 100 color profiles. Profusely illustrated with photos, including walk-around section showing all aspects of the airframe, and diagrams from official manuals. Includes 1/72nd scale plans, and color profiles showing camouflage and markings applied to the Shturmovik by its users.

Hitler's War (The War That Came Early, Book One) Harry Turtledove,2010-06-22 A stroke of the pen and history is changed. In 1938, British prime minister Neville Chamberlain, determined to avoid war, signed the Munich Accord, ceding part of Czechoslovakia to Hitler. But the following spring, Hitler snatched the rest of that country, and England, after a fatal act of appeasement, was fighting a war for which it was not prepared. Now, in this thrilling alternate history, another scenario is played out: What if Chamberlain had not signed the accord? In this action-packed chronicle of the war that might have been, Harry Turtledove uses dozens of points of view to tell the story: from American marines serving in Japanese-occupied China and ragtag volunteers fighting in the Abraham Lincoln Battalion in Spain to an American woman desperately trying to escape Nazi-occupied territory—and witnessing the war from within the belly of the beast. A tale of powerful leaders and ordinary people, at once brilliantly imaginative and hugely entertaining, Hitler’s War captures the beginning of a very different World War II—with a very different fate for our world today.

Over Fields of Fire Timofeeva-Egoro,2010-01-01 During the 1930s the Soviet Union launched a major effort to create a modern Air Force. That process required training tens of thousands of pilots. Among those pilots were larger numbers of young women, training shoulder to shoulder with their male counterparts. A common training program of the day involved studying in "flying clubs" during leisure hours, first using gliders and then training planes. Following this, the best graduates could enter military schools to become professional combat pilots or flight navigators. The author of this book passed through all of those stages and had become an experienced training pilot when the USSR entered the war.Volunteering for frontline duty, the author flew 130 combat missions piloting the U2 biplane in a liaison squadron. In the initial period of the war, the German Luftwaffe dominated the sky. Daily combat sorties demanded bravery and skill from the pilots of the liaison squadron operating obsolete, unarmed planes. Over the course of a year the author was shot down by German fighters three times but kept flying nevertheless.In late 1942 Anna Egorova became the first female pilot to fly the famous Sturmovik (ground attack) plane that played a major role in the ground battles of the Eastern Front. Earning the respect of her fellow male pilots, the author became not just a mature combat pilot, but a commanding officer. Over the course of two years the author advanced from ordinary pilot to the executive officer of the Squadron, and then was appointed Regimental navigator, in the process flying approximately 270 combat missions over the southern sector of the Eastern Front initially (Taman, the Crimea) before switching to the 1st Belorussian Front, and seeing action over White Russia and Poland.Flying on a mission over Poland in 1944 the author was shot down over a target by German flak. Severely burned, she was taken prisoner. After surviving in a German POW camp for 5 months, she was liberated by Soviet troops. After experiencing

numerous humiliations as an "ex-POW" in 1965 the author finally received a top military award, a long-delayed "Golden Star" with the honorary title of "Hero of the Soviet Union". This is a quite unique story of courage, determination and bravery in the face of tremendous personal adversity. The many obstacles Anna had to cross before she could fly first the Po-2, then the Sturmovik, are recounted in detail, including her tough work helping to build the Moscow Metro before the outbreak of war. Above all, Over Fields of Fire is a very human story - sometimes sad, sometimes angry, filled with hope, at other times with near-despair, abundant in comradeship and professionalism - and never less than a large dose of determination! ABOUT THE AUTHOR Anna Alexandrovna Timofeeva-Egorova was born on 23 September 1916. After attending school she had hoped to learn to fly but this wish was delayed due to one of her brother's becoming a victim of the Communist security system, which deemed him an "enemy of the people". After a number of setbacks Anna learned to fly, and during the first part of the Great Patriotic War flew Po-2 biplanes for the 130th Aviation Signals Squadron, being shot down three times. She then switched to flying the fearsome Ilyushin Il-2 Sturmovik ground-attack aircraft with the 805th Ground Attack Regiment (805 ShAP), 197th Ground Attack Division. Anna flew approximately 270 combat missions before being shot down in the summer of 1944, being severely injured and taken prisoner by the Germans. Thanks to her determination, and the skill, dedication, care and kindness of numerous individuals, she made a remarkable recovery and was liberated when the Soviets overran her POW camp near K◆strin in 1945. However, her troubles were not over, as the Soviet authorities initially believed her to be a traitor and collaborator and subjected her to 11 days of continuous interrogations. She was released, although her injuries were such that was medically discharged from the Air Force in 1945. She continued to fight to clear her name after the war - she was eventually reinstated into the Communist Party and in 1965 finally received the award of "Hero of the Soviet Union". She died in October 2009.

Red Star Against The Swastika Vasily Emelianenko, 2005-12-01 This is the extraordinary story of Vasily B. Emelianenko, the veteran pilot of one of the Soviet Union's most contradictory planes of WWII – the I1-2. This heavily armoured aircraft was practically unrivalled in terms of fire power, but it was slow to manoeuvre and an easy target for fighters. I1–2 had to attack enemy flak columns at extremely low altitudes, which led to enormous tolls both in equipment and personnel.

OKB Ilyushin Yefim Gordon, E. Gordon, Dmitriy Komissarov, Sergey Komissarov, 2004 Established in 1934, the Ilyushin design bureau is one of the best-known Soviet/Russian aircraft design companies. Over the years, the Ilyushin OKB has developed aircraft for widely varying roles. Its first aircraft to achieve production status, the DB-3 bomber, entered service in 1936. The IL-2 (Shturmovik) armored attack aircraft brought Ilyushin well-earned fame; this aircraft fought with considerable success during World War II. The OKB's involvement with combat aircraft continued with the experimental IL-22 four-jet counterpart of the English Electric Canberra. However, it was those years that marked the OKB's transition to transport aircraft from the twin-engined IL-12 of 1945 developed as a 'DC-3 replacement', followed by many successful aircraft, including the four-turboprop IL-18 airliner (1957), the four-turbofan long-half IL-62 (1961), the IL-76 military/civil freighter (1971) and the first Soviet wide-body airliner, the IL-86 of 1976. The company has also moved into general aviation with the IL-103 four-seater.

Pe-2 Guards Units of World War 2 Dmitriy Khazanov, Aleksander Medved, 2013-02-20 Petlyakov's Pe-2 was the most numerous Soviet twin-engined bomber of World War 2, the aircraft being used as a dive-bomber, ground attack platform and dedicated reconnaissance type. The first examples entered service in August 1940, and by the time production came to end in late 1945, no fewer than 10,547 examples had been built. These equipped more than 80 bomber air regiments, and of the latter, two were accorded Guards Air Corps status, as were six air regiments. Amongst the former was the 2nd Guards Bomber Air Corps, which was commanded by the legendary General Polbin, who was twice made a Hero of the Soviet Union. Pe-2 bomber and reconnaissance versions (the latter in service with four Guards reconnaissance air regiments of the Air Force and one regiment of Naval Aviation) were extensively used from the frozen Arctic north to the balmy Crimea front. A number of Pe-2 also saw brief combat against Japan in the final weeks of World War 2.

Ilyushin IL-12 and IL-14 Yefim Gordon, Dmitriy Komissarov, 2005 This book gives a detailed account of the design and development of the IL-12 and the IL-14. It explains their important place in Soviet commercial aviation history and is based on research in Russian archives. The book contains numerous previously unpublished photos and line drawings.
