**Mark Stille**

The Imperial Japanese Navy in the Pacific War Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

*A Battle History of the Imperial Japanese Navy* Paul Dull, 2012-12-12 For almost 20 years, more than 200 reels of microfilmed Japanese naval records remained in the custody of the U.S. Naval History Division, virtually untouched. This unique book draws on those sources and others to tell the story of the Pacific War from the viewpoint of the Japanese. Former Marine Corps officer

and Asian scholar Paul Dull focuses on the major surface engagements of the war—Coral Sea, Midway, the crucial Solomons campaign, and the last-ditch battles in the Marianas and Philippines. Also included are detailed track charts and a selection of Japanese photographs of major vessels and actions.

Imperial Japanese Navy Light Cruisers 1941-45 Mark Stille, 2012-02-20 The Imperial Japanese Navy went to war with 17 light cruisers and another three cruiser-sized training ships. Of these, most were 5,500-ton ships designed to act as destroyer squadron flagships. This made them much different in capabilities and mission from their American counterparts. During the war, the Japanese built another five light cruisers, all but one of which maintained the design premise of being able to serve as destroyer squadron flagships. During the war, Japanese light cruisers were active throughout the Pacific performing many missions in addition to their flagship duties. Mark Stille continues Osprey's coverage of the IJN of WWII with this concise and complete study of all 25 ships, from their design and development to their ultimate fates. Detailed Osprey artwork and rare period photographs from the Fukui collection held in Kure, Japan illustrate this discussion.

**The Imperial Japanese Navy** Anthony John Watts, Brian G. Gordon, 1971 Flådeliste over den kejserlige japanske flåde.

**From Mahan to Pearl Harbor** Sadao

Asada, 2013-01-15 A major work by one of Japan's leading naval historians, this book traces Alfred Thayer Mahan's influence on Japan's rise as a sea power after the publication of his classic study, *The Influence of Sea Power Upon History*. Hailed by the British Admiralty, Theodore

Roosevelt, and Kaiser Wilhelm II, the international bestseller also was endorsed by the Japanese Naval Ministry, who took it as a clarion call to enhance their own sea power. That power, of course, was eventually used against the United States. Sadao Asada opens his book with a discussion of Mahan's sea power doctrine and demonstrates how Mahan's ideas led the Imperial Japanese Navy to view itself as a hypothetical enemy of the Americans. Drawing on previously unused Japanese records from the three naval conferences of the 1920s—the Washington Conference of 1921-22, the Geneva Conference of 1927, and the London Conference of 1930—the author examines the strategic dilemma facing the Japanese navy during the 1920s and 1930s against the background of advancing weapon technology and increasing doubt about the relevance of battleships. He also analyzes the decisions that led to war with the United States—namely, the 1936 withdrawal from naval treaties, the conclusion of the Tripartite Pact in September 1940, and the armed advance into south Indochina in July 1941—in the context of bureaucratic struggles between the army and navy to gain supremacy. He concludes that the ghost of Mahan hung over the Japanese naval leaders as they prepared for war against the United State and made decisions based on miscalculations about American and Japanese strengths and American intentions.

**The Imperial Japanese Navy of the Russo-Japanese War** Mark Stille, 2016-03-24 When the Imperial Japanese Navy destroyed Russia's battle fleet during the Russo-Japanese War, it marked the emergence of Japan as one of the world's major naval powers. Japan's navy had been built up over just two decades, with the IJN acquiring

a fleet of modern foreign-built warships. Coupled with the IJN's leadership and high levels of training, this proved enough to destroy the fleet of one of the world's historic naval powers. This book explains in concise detail the IJN's fleet of 1904-1905, from its battleships and armored cruisers to the torpedo boats that launched 'the first great torpedo attack in history,' and outlines the history of the naval campaign against the Russian fleet.

**The Japanese Navy in World War II** David C. Evans, 2017-02-15 Top-ranking Japanese officers offer their personal perspectives of the Pacific War. Lauded by historians and World War II buffs eager for the Japanese viewpoint, this collection of essays makes significant contributions to the field of World War II literature. This second edition, originally published in 1986, adds five articles to the original twelve to provide a full picture of the Japanese's navy's role in the war. Most of these moving accounts were written in the 1950s and retain the immediacy felt by the writers when they participated in the events. They provide valuable information on the strategy, tactics, and operations of the Japanese fleet, as well as insights into the personalities and motives of its leaders. Here, Vice Admiral Shigeru Fukudome comes to grips with allegations that the assault on Pearl Harbor represented strategic folly, political blundering, and tactical stupidity. Captain Mitsuo Fuchida describes how his bombing group unleashed "devils of doom" on Battleship Row, and Mitsuru Yoshida gives an eye-witness account of the sinking of the famous battleship Yamato. The new contributions to the volume, translated especially for this book by the editor, discuss operations in the Indian Ocean, the battle of the Philippine Sea, the protection of merchant shipping, submarine warfare, and Japan's overall naval strategy. A brief introduction precedes each essay to set it in historical

context, and a biographical summary of each contributor is included. A striking collection of photographs and maps, many of which are new to this edition, augment the text.

### **Imperial Japanese Navy Aircraft Carriers 1921-45**

Mark Stille, 2012-05-20 The Imperial Japanese Navy was a pioneer in naval aviation, having commissioned the world's first built-from-the-keel-up carrier, the Hosho. Throughout the 1920s and 1930s, it experimented with its carriers, perfecting their design and construction. As a result, by the time Japan entered World War II and attacked the United States at Pearl Harbor in 1941, it possessed a fantastically effective naval aviation force. This book covers the design, development and operation of IJN aircraft carriers built prior to and during World War II. Pearl Harbor, Midway and the first carrier vs carrier battle, the battle of the Coral Sea, are all discussed.

**The Elusive Enemy** Douglas Ford, 2011-10-15 The Elusive Enemy explores the evolution of U.S. intelligence concerning the combat capabilities of the Imperial Japanese Navy and its air arm during the interwar period and the Pacific War. Ford contends that the US Navy could not accurately determine the fighting efficiency of Japan's forces until it engaged them in actual battle conditions over an extended period. As the conflict progressed, the Americans were able to rely on a growing array of intelligence material, including POWs, captured documents, and specimens of captured enemy weapons. These sources often revealed valuable information on the characteristics of Japanese equipment, as well as some of the ideas and doctrines which governed how they carried out their operations. First-hand observations of the Japanese navy's performance in battle were the most frequently used source of intelligence which enabled the US Navy to develop a more informed assessment of its

opponent. Ship crews, along with US aviators, were tasked to collect information by making a thorough observation of how the Japanese fought. Action reports described how the Imperial fleet demonstrated a number of weaknesses, the most important of which was a shortage of modern equipment and, after 1942, diminished air power. Yet, he demonstrates how the Japanese remained a resilient enemy who could be defeated only when the Americans deployed sufficient equipment and used it in an appropriate manner. The Office of Naval Intelligence, as well as the intelligence services operating in the Pacific theater, thus had to assess a wide array of conflicting characteristics, and provide a balanced evaluation concerning the strengths and weaknesses of the Imperial navy. At the same time, a large part of the intelligence analysis was undertaken by commanders in the Pacific Fleet. Naval personnel and aircrews assessed the information gained through encounters with the enemy so that they could develop a set of methods whereby US forces were able defeat the Japanese without incurring excessive casualties and losses. The intelligence services, in turn, played an important role in disseminating the information on the most efficient tactics and weapons that could be used to defeat the Imperial Fleet. The Elusive Enemy aims to explain how American perceptions concerning the Japanese navy evolved during the conflict, with a particular focus on the role of intelligence. It also seeks to introduce a new perspective on the question as to why the U.S. Navy carried out its campaigns during the Pacific War in the manner that it did.

**Imperial Japanese Navy Battleships 1941-45** Mark Stille, 2012-05-20 The Imperial Japanese Navy of World War II surpassed the Allied and Axis fleets in innovation and technology. This title covers the 12 Japanese battleships that saw service between 1941 and 1945, including the mighty Yamato. Each class is considered in light of its design and construction, its armament and wartime modifications. The author, Mark Stille, uses primary sources and dramatic photographs to tell the story of these mighty battleships at war, including their major engagements during the raid at Pearl Harbor and the battle of Midway. The first English language book to include photographs from the prestigious Fukui Collection, this investigation will fascinate any naval enthusiast.

**Imperial Japanese Navy** Andris J. Kursietis, 2014-09-01 The Imperial Japanese Navy (Nihon Kaigun) 1900-1945 is a comprehensive study that provides biographical information on several thousand Japanese

officers of Admiral rank who served the Empire between 1900-1945, from the time that they attained flag rank, with photographs of most of the senior Admirals. The book also includes an order of battle of the Japanese Navy (IJN) during these years, with a listing of the highest administrative and field commands and their commanders. To complete the overall scope of the subject matter, seven chapters provide information about the aircraft carriers, battleships, and cruisers of the IJN, with histories that include the dates that the vessels were launched, their eventual fates, and photographs of these important elements of the IJN.

**Imperial Japanese Navy Submarines 1941-45** Mark Stille, 2012-06-20 During World War II the Imperial Japanese Navy was at the forefront of submarine technology. It fielded the largest pre-nuclear submarines in the world, some capable of carrying floatplane bombers, which operated alongside fast combat vessels and midget submarines, all equipped with the best torpedoes available. The Japanese submarine fleet should have been an awe-inspiring force but, despite playing a crucial scouting role and enjoying several notable successes, it was surprisingly ineffective. Using unique color plates, Mark Stille describes the astounding technical advances of this range of vessels, and the wartime tactics responsible for their failure.
