Kumamoto Sojourn Leslee Inaba Wong, 2005-11-11 The Inaba Ladies-ten American women spanning three family generations on a whirlwind tour of Japan. With good-natured chiding and humor, these shop-till-you-drop women amaze, frustrate, and charm their Japanese guides, family and friends as they trek from Mt. Fuji to Kumamoto. Middle-aged sansei Leslee Inaba Wong balances the demands of travel with her newly diagnosed diabetes, while maintaining her New York brashness, tenacity, and perspective throughout. Her journey begins as a tourist, and becomes an odyssey as she uncovers her links to the land of her ancestry, in this honest story of self-discovery.

Human Body Odor Masumi Inaba, Yoshikata Inaba, 2013-11-11 Strong body odor is a condition for which, until now, there have been few treatment methods. The Japanese authors, encouraged by the willingness of Oriental patients to undergo radical treatment, have developed the subcutaneous tissue shaving method, which eliminates the condition in a very short period of time without ugly scarring. The book *Human Body Odor* not only introduces the completely new subcutaneous tissue shaving method, it also questions conventional theories on the hair cycle itself and throws a new hypothesis about the process of hair generation and regeneration into the scientific arena. This could even lead in the future to a formula for retarding hair loss! Developed over the past twenty years, the authors' new surgical method for the radical treatment of bromidrosis represents a landmark in cosmetic surgery and dermatology!

*Androgenetic Alopecia* Masumi Inaba, Yoshitaka Inaba, 2013-03-14 The authors have perfected a thick-tissue preparation method for observing hair at various stages of growth, and their findings challenge the currently held three-stage common hair cycle. They have put forward a new hypothesis, the four-stage essential hair cycle, that incorporates their discovery that stem cells are located in the isthmal portion of the sebaceous gland. The essential hair cycle is then used to review the factors contributing to the process of androgenetic alopecia, or premature balding, as it is commonly called. This is followed by an explanation of some general measures for the prevention of androgenetic alopecia and a description of the treatments available.

**John Lee "Sonny Boy" Williamson** Mitsutoshi Inaba, 2016-10-10 John Lee Sonny Boy Williamson was one of the most popular blues harmonica players and singers from the late 1930s through the 1940s. Recording for the Bluebird Records and RCA Victor labels, Sonny Boy shaped Chicago's music scene with an innovative style that gave structure and speed to blues harmonica performance. His recording in 1937 of *Good Morning, School Girl*, followed by others made him a hit with Southern black

audiences who had migrated north. Unfortunately, his popularity and recording career ended on June 1, 1948, when he was robbed and murdered in Chicago, Illinois. In 1980, he was inducted into the Blues Foundation Hall of Fame. Mitsutoshi Inaba offers the first full-length biography of this key figure in the evolution of the Chicago blues. Taking readers through Sonny Boy's career, Inaba illustrates how Sonny Boy lived through the lineage of blues harmonica performance, drawing on established traditions and setting out a blueprint for the growing electric blues scene. Interviews with Sonny Boy's family members and his last harmonica student provide new insights into the character of the man as well as the techniques of the musician. John Lee Sonny Boy Williamson: The Blues Harmonica of Chicago's Bronzeville provides fans and musicians alike an invaluable exploration of the life and legacy of one the Chicago blues' founding figures.

Mornings With My Cat Mii Mayumi Inaba, 2024-10-03 The perfect gift for cat lovers: a beloved Japanese modern classic that chronicles the author's twenty-year bond with her cat, meditating on solitude, independence, companionship, the writing life, and how cats can change our lives. For the last 20 years, Japanese readers have been falling in love with the late poet and prizewinning author Mayumi Inaba's story of life with her cat Mii, after she rescued her as a newborn kitten from a riverbank in Tokyo. The book follows their everyday joys through the seasons, as Mayumi develops her career as a writer, and finds her feet in life, with her small feline always at her side. Translated into English for the first time by world-renowned translator Ginny Tapley Takemori, *Mornings With My Cat Mii* is set to capture the hearts and imaginations of readers and booksellers everywhere. Translated by Ginny Tapley Takemori

**Second Language Literacy Practices and Language Learning Outside the Classroom** Miho Inaba, 2018-11-21 This book presents a comprehensive and detailed study of literacy practices and language use outside of the classroom by university students of Japanese. It investigates both tasks related to classes (e.g. homework and preparation for classes) and voluntary activities in the target language (e.g. watching TV and writing emails) and discusses how values, motivations and types of activities differ between the two contexts. It employs sociocultural perspectives to observe reading and writing activities within and under the influence of individual and social contexts, such as learner motives, peer networks and the language classroom, and contributes to the related research areas in the field of second language acquisition, such as motivation, autonomous language learning and language learning strategies. Crucially, the book not only documents out-of-class literacy activities, but also examines which teaching practices facilitate and promote such out-of-class language learning and

use. It considers which literacy activities in the target language students undertake out-of-class, which factors encourage or discourage such out-of-class activity and how and with which tools they undertake these activities. As such the book provides guidance for classroom teaching and suggests that slight changes to teaching practices in the classroom may enhance autonomous learning outside the classroom.

**Age-Structured Population Dynamics in Demography and Epidemiology** Hisashi Inaba, 2017-03-15

This book is the first one in which basic demographic models are rigorously formulated by using modern age-structured population dynamics, extended to study real-world population problems. Age structure is a crucial factor in understanding population phenomena, and the essential ideas in demography and epidemiology cannot be understood without mathematical formulation; therefore, this book gives readers a robust mathematical introduction to human population studies. In the first part of the volume, classical demographic models such as the stable population model and its linear extensions, density-dependent nonlinear models, and pair-formation models are formulated by the McKendrick partial differential equation and are analyzed from a dynamical system point of view. In the second part, mathematical models for infectious diseases spreading at the population level are examined by using nonlinear differential equations and a renewal equation. Since an epidemic can be seen as a nonlinear renewal process of an infected population, this book will provide a natural unification point of view for demography and epidemiology. The well-known epidemic threshold principle is formulated by the basic reproduction number, which is also a most important key index in demography. The author develops a universal theory of the basic reproduction number in heterogeneous environments. By introducing the host age structure, epidemic models are developed into more realistic demographic formulations, which are essentially needed to attack urgent epidemiological control problems in the real world.

*Willie Dixon* Mitsutoshi Inaba, 2011 One of the greats of blues music, Willie Dixon was a recording artist whose abilities extended beyond that of bass player. A singer, songwriter, arranger, and producer, Dixon's work influenced countless artists across the music spectrum. In *Willie Dixon: Preacher of the Blues*, Mitsutoshi Inaba examines Dixon's career, from his earliest recordings with the

Five Breezes through his major work with Chess Records and Cobra Records. Focusing on Dixon's work on the Chicago blues from the 1940s to the early 1970s, this book details the development of Dixon's songwriting techniques from his early professional career to his mature period and compares the compositions he provided for different artists. This volume also explores Dixon's philosophy of songwriting and its social, historical, and cultural background. This is the first study to discuss his compositions in an African American cultural context, drawing upon interviews with his family and former band members. This volume also includes a detailed list of Dixon's session work, in which his compositions are chronologically organized.

Atlas of Surgical Techniques in Trauma Demetrios Demetriades, Kenji Inaba, George

Velmahos, 2020-01-02 As surgical specialization becomes more focused, there is a growing lack of expertise amongst surgeons in life-preserving management of severely injured patients. This comprehensively updated second edition provides an in-depth, visual guide to both commonly and uncommonly performed trauma procedures. It includes over 900 high-quality color photographs and illustrations of step-by-step procedures on fresh, perfused and ventilated cadavers. Practical surgical anatomy, procedural sequencing, and common technical pitfalls are all clearly outlined. A number of new techniques have been introduced since the first edition, from REBOA (resuscitative endovascular balloon occlusion of the aortic), to ribplating for flail chest and skin grafting. Informed by the editors' experience in some of the busiest trauma centres in the world, the text has been updated throughout and includes additional photographs. This Atlas is an essential resource for trainee and operating trauma surgeons, and general surgeons distant from academic centres, as well as emergency medicine and critical care personnel.

**The History and Culture of Iran and Central Asia** D. G. Tor, Minoru Inaba, 2022-04-15 This volume examines the major cultural, religious, political, and urban changes that took place in the Iranian world of Inner and Central Asia in the transition from the pre-Islamic to the Islamic periods. One of the major civilizations of the first millennium was that of the Iranian linguistic and cultural world, which stretched from today's Iraq to what is now the Xinjiang Autonomous Region of China. No other region of the world underwent such radical transformation, which fundamentally altered the course of world history, as this area did during the centuries of transition from the pre-Islamic to the Islamic period. This transformation included the religious victory of Islam over Buddhism, Nestorian Christianity, and the other religions of the area; the military and political wresting of Inner Asia from the Chinese to the Islamic sphere of primary cultural influence; and the shifting of Central Asia from a culturally and demographically Iranian civilization to a Turkic one. This book contains essays by many of the preeminent scholars working in the fields of archeology, history, linguistics, and literature of both the pre-Islamic and the Islamic-era Iranian world, shedding light on some of the most significant aspects of the major changes that this important portion of the Asian continent underwent during this tumultuous era in its history. This collection of cutting-edge research will be read by scholars of Middle Eastern, Central Asian, Iranian, and Islamic studies and archaeology. Contributors: D. G. Tor, Frantz Grenet,

Nicholas Sims-Williams, Etsuko Kageyama, Yutaka Yoshida, Michael Shenkar, Minoru Inaba, Rocco Rante, Arezou Azad, Sören Stark, Louise Marlow, Gabrielle van den Berg, and Dilnoza Duturaeva.

Chimpanzee Behavior in the Wild Toshisada Nishida, Koichiro Zamma, Takahisa Matsusaka, Agumi Inaba, William C. McGrew, 2010-09-15 Where We Stand Field workers—scientists of animal (including human!) behavior in nature—have long been fascinated by wild chimpanzees. A person who once has studied wild chimpanzees will be eager to observe them again. A person who has studied them twice will make every effort to continue the study, unless prevented from doing so. In short, behavioral primatology is addictive! Many people, among them Jane Goodall, Richard Wrangham, and I, do not regret that they have dedicated their whole lives to the study of wild chimpanzees. This is because the apes' behavior is always challenging: chimpanzees are cheerful, charming, playful, curious, beautiful, easygoing, generous, tolerant, and trustw- thy most of the time, but also are cautious, cunning, ugly, violent, ferocious, blo- thirsty, greedy, and disloyal at other times. We human beings share both the light and dark sides with our closest living relatives. For decades, we have documented huge across-population variation in behavior, as well as within-population variation. Cultural biology (now called cultural pri- tology), as proposed 60 years ago by Kinji Imanishi, recently has flourished.

**Musculoskeletal Disease Associated with Diabetes Mellitus** Masaaki Inaba, 2016-01-06 The aim of this book is to review the latest findings on musculoskeletal disease associated with diabetes. It has been increasingly recognized that maintaining skeletal health is an important factor in achieving longevity in healthy subjects. Diabetes has been established as a disease independently associated with sarcopenia and increased risk of bone fracture resulting from osteoporosis; therefore, it is reasonable to maintain that musculoskeletal health is important in preserving good health. As either bone or muscle is intimately involved in the regulation of metabolic status, keeping the musculoskeletal system healthy is important for improving abnormal glucose metabolism toward normal levels and is vital, as well, for maintaining normal activities of daily living. Muscle is a target of insulin for enhancing the entry of glucose; thus it is conceivable that sarcopenia and muscle containing fat streaks causes insulin resistance in diabetic patients. Furthermore, bone is an organ that regulates Ca and Pi levels in serum by releasing or resorbing Ca and Pi to and from bone tissue. It is now known that bone is a definitive endocrine organ for regulating glucose metabolism and Pi metabolism by secreting osteocalcin and FGF-23 from osteocytes/osteoblasts. Readers will learn of the recent findings in this area, and this book will benefit physicians who deal with diabetes, particularly orthopedists and bone specialists, as well as all physical therapists.
