**Painting the Floating World** Janice Katz,Mami Hatayama,2019-01-08 From the 17th through the 19th century, artists in Kyoto and Edo (now Tokyo) captured the metropolitan amusements of the floating world (ukiyo in Japanese) through depictions of subjects such as the beautiful women of the Yoshiwara pleasure quarters and performers of the kabuki theater. In contrast to ukiyo-e prints by artists such as Katsushika Hokusai, which were widely circulated, ukiyo-e paintings were specially commissioned, unique objects that displayed the maker's technical skill and individual artistic sensibility. Featuring more than 150 works from the celebrated Weston Collection, the most comprehensive of its kind in private hands and published here for the first time in English, this lavishly illustrated and meticulously researched volume addresses the genre of ukiyo-e painting in all its complexity. Individual essays explore topics such as shunga (erotica), mitate-e (images that parody or transform a well-known story or legend), and poetic inscriptions, revealing the crucial role that ukiyo-e painting played in a sophisticated urban culture.

**Learning from the West, Learning from the East: The Emergence of the Study of Buddhism in Japan and Europe before 1900** Stephan Kigensan Licha,Hans-Martin Krämer,2023-09-04 The essays collected in this volume for the first time foreground the fundamental role Asian actors played in the formation of scholarly knowledge on Buddhism and the emergence of Buddhist studies as an academic discipline in Europe and Asia during the second half of the nineteenth century. The contributions focus on different aspects of the interchange between Japanese Buddhists and their European interlocutors ranging from the halls of Oxford to the temples of Nara. They break the mould of previous scholarship and redress the imbalances inherent in Eurocentric accounts of the construction of Buddhism as an object of professorial interest. Contributors are: Micah Auerback, Mick Deneckere, Stephan Kigensan Licha, Hans Martin Krämer, Ōmi Toshihiro, Jakub Zamorski, Suzanne Marchand, Martin Baumann, Catherine Fhima, and Roland Lardinois.

*Autophagy: Cancer, Other Pathologies, Inflammation, Immunity, Infection, and Aging* M. A. Hayat,2013-12-26 Understanding the importance and necessity of the role of autophagy in health and disease is vital for the studies of cancer, aging, neurodegeneration, immunology, and infectious diseases. Comprehensive and up-to-date, this book offers a valuable guide to these cellular processes whilst encouraging researchers to explore their potentially important connections. Volume 3 explores the role of autophagy in specific diseases and developments, including: Crohn's Disease, Gaucher Disease, Huntington's Disease, HCV infection, osteoarthritis, and liver injury. A full section is devoted to in-depth exploration of autophagy in tumor development and cancer. Finally, the work explores the relationship between autophagy and apoptosis, with attention to the ways in which autophagy regulates apoptosis, and the ways in which autophagy has been explored in Lepidoptera, elucidating the use of larval midgut as a model for such exploration. From these well-developed foundations, researchers, translational scientists, and practitioners may work to better implement more effective therapies against some of the most devastating human diseases. **Psychology and Pathophysiological Outcomes of Eating** Akikazu Takada,Hubertus Himmerich,2021-12-01 The psychology of eating is regulated by neural mechanisms. When not well controlled, eating may result in disorders and health hazards such as obesity, type 2 diabetes mellitus, and vascular diseases. Lifestyles and cultures influence eating habits, thus there are differences in the prevalence of health problems depending upon living environments. This book examines the psychology and the pathophysiological outcomes of eating. Chapters address such topics as the influence of lifestyle, circadian rhythm, sleep, and fragrant odors on appetite and weight regulation; the impact of glucose, sucrose, lactate, and ketone bodies on the brain; the consequences of glycation stress on the skeletal muscle; and much more.

*Comic Book Movies - Virgin Film* David Hughes,2012-10-31 The superheroes are back! Since the 1970s, the film world has found inspiration in comic books and graphic novels. These days no summer is complete without a major blockbuster movie based on a comic: Superman, Batman, Spider-Man, X-Men, Men in Black, Daredevil, and The Hulk. Modern special effects have made large-scale superhero epics possible, but the diversity of the comics being published has made for a wide variety of subjects, as evidenced by Ghost World, From Hell, Akira and Road to Perdition. This book looks in detail at twenty key titles, covering every step of the development from comic book panel to feature film frame. Includes interviews with key creative artists about the evolution of the films from the original comics, and speculates about future films.

**Running Through the Ages, 2d ed.** Edward S. Sears,2015-06-08 Beginning with prehumans running down prey, this book describes how ancient, medieval and modern runners have come to run ever faster. Writers of antiquity left few detailed accounts of running but in the early 1800s detailed accounts of running feats and matches appeared in newspapers, journals and books. Nineteenth century pioneers like George Seward, Harry Hutchens, Walter George and Bernie Wefers are here given long-deserved recognition. The six-day Go-as-You-Please races of the 1870s and 1880s--featuring running's first great female performer, Amy Howard--are discussed. Twentieth century luminaries Helen Stephens, Jesse Owens, Paavo Nurmi, Emil Zatopek, Bob Hayes, Abebe Bikila and Joan Benoit-Samuelson are included, along with the Bunion Derby races of 1928-1929. New material for this revised and expanded second edition includes coverage of the 1970s running boom, women marathon pioneers, the impact of drugs on running, and the feats of 21st century runners such as Usain Bolt, Paula Radcliffe and Haile Gebrselassie.

**Cognitive Development in Chimpanzees** Tetsuro Matsuzawa,Masaki Tomonaga,Masayuki Tanaka,2006-07-25 From an evolutionary perspective, understanding chimpanzees offers a way of understanding the basis of human nature. This book on cognitive development in chimpanzees is the first of its kind to focus on infants reared by their own mothers within a natural setting, illustrating various aspects of chimpanzee cognition and the developmental changes accompanying them. The subjects are chimpanzees of three generations inhabiting an enriched environment, as

well as a wild community in West Africa. There is a foreword by Jane Goodall and 26 color photos of chimpanzees in the laboratory and in the field in West Africa are included.

**The Toho Studios Story** Stuart Galbraith, IV,2008-05-16 Since its inception in 1933, Toho Co., Ltd., Japan's most famous movie production company and distributor, has produced and/or distributed some of the most notable films ever to come out of Asia, including Seven Samurai, Godzilla, Ringu, and Spirited Away. **Neuroglia Molecular Mechanisms in Psychiatric Disorders** Caterina Scuderi,Mami Noda,Alexei Verkhratsky,2019-01-21 Neuropsychiatric disorders have long been considered as specific dysfunctions of neuronal functions. Studies of the recent decade, however, have challenged this simplistic view, highlighting the important role played by neuroglial cells in the onset and/or progression of neuropsychiatric diseases. In the central nervous system (CNS) non-excitabile neuroglia are represented by cells of ectodermal origin (astrocytes, mainly responsible for CNS homeostasis and oligodendrocytes that provide myelination and support for axons) and mesodermal origin (microglial cells that are scions of foetal macrophages entering the neural tube early in development; these cells provide for CNS defence and contribute to shaping neuronal networks). Pathological changes of neuroglia are complex; these changes are classified into reactive gliosis (astrogliosis, activation of microglia and hypertrophy of oligodendroglial precursors), gliodegeneration with loss of function and glial pathological remodelling. Combination of these processes defines the evolution of neurological diseases in general and neuropsychiatric disorders in particular. In this research topic we addressed the contribution of neuroglia to major neuropsychiatric pathologies including major depression, schizophrenia, and addictive disorders.

*Japan's Favorite Mon-star* Steve Ryfle,1998 Bigger, badder, and more durable than Hollywood's greatest action heroes, Godzilla emerged from the mushroom cloud of an H-bomb test in 1954 to trample Tokyo. More than 40 years later, he reigns as the undisputed monarch of movie monsters, with legions of fans spanning several generations and countless international boundaries.
