The First Star Maureen Crisp, 2022-11-02 Noah can't wait to go home. He doesn't fit in and his family won't miss him. He never dreamed he would end up living in a nightmare. Who can he trust? The pirates who take him in, his protector who abandoned him, or is he just bait in an elaborate trap? *The First Star* continues the story of the Fraser family caught between worlds, hunted by aliens, and holding the key to the survival of Earth.

How Much for Just the Planet? John M. Ford, 2000-09-22 A thrilling *Star Trek: The Original Series* adventure featuring Captain James T. Kirk and the *USS Enterprise* in a strange battle for dilithium crystals against the Klingons. Dilithium. In crystalline form, the most valuable mineral in the galaxy. It powers the Federation's starships...and the Klingon Empire's battlecruisers. Now on a small, out-of-the-way planet named Direidi, the greatest fortune in dilithium crystals ever seen has been found. Under the terms of the Organian Peace Treaty, the planet will go to the side best able to develop the planet and its resources. Each side will contest the prize with the prime of its fleet. **A Distant Star** Raymond Hardcastle, 2020-05-11 This book approaches in novel form what steps Humanity needs to take to become a more than

single planet species so we humans don't become extinct. The dinosaurs didn't have a Space Program. Picture a Tyrannosaurus in a space suit. It uses current and projected developments to advance into low Earth orbit, the Moon and the Lagrangian balanced gravity points. A small dedicated crew of explorers advance beyond earth orbit to Mars, the Asteroid Belt and dwarf planet Ceres. On an exploration of Jupiter's Trojan points in search of geologic resources they discover something that leads them eventually to a Star Gate. Established Scientists keep telling them what they are doing can't be done, but then take credit for their accomplishments.

*My Inflatable Friend* Gerald Everett Jones, 2018-09-19 Trying to make your girlfriend jealous with a life-sized rubber doll might be a bad idea. A reformed hacker-turned-slacker, twenty-something Rollo Hemphill fantasizes about becoming a top-forty DJ. Unfortunately, he has more talent than ambition. He's settled for a menial job as a car jockey at The Wuthering Palms, a luxury hotel in Beverly Hills. Proximity to all that glitz and glamour soon stirs his attraction to Felicia Ferrulo, the Sicilian hottie who works in the hotel beauty shop. When Felicia doesn't

give him a nod, much less a chance, Rollo devises a desperate plan. It involves dressing up a life-sized doll to look like one of the hotel's reclusive megastar residents and conspicuously driving the fake woman around town in borrowed vehicles. Inspiring jealousy is his goal, but it quickly gets waaaaaaay out of hand. Rollo's clever scheme backfires with stunning success, causing him to fall upward with dizzying speed - as he rockets toward the stars but away from the girl of his dreams. Rollo's fumbling attempts to undo his tangled web is, by turns, pathetic and hysterically funny. My Inflatable Friend is a witty, cautionary tale about the perils of pretending to be someone you're not - and the hazards of stroking every male's most private and vulnerable part - his swelling ego! - Fast, funny, and sufficiently out there to be banned in Pasadena. Check with your doctor before reading. - Peter Lefcourt, author of *The Woody* and *The Manhattan Beach Project* While the entire story is built on the most unbelievable and unrealistic of scenarios, this book is not intended to aim for an award in journalism. What it is, however, is an entrée into the land of the ridiculous, and I just couldn't stop laughing. An extremely humorous, excruciatingly funny account of one poor soul as he attempts to win the heart of his beloved (whom he has never even gotten a first date with!). Hold onto your stomach because you'll be laughing so hard you won't be able to catch your breath! - The International Review of Books Gentlemen, this is a book for every one of us that has had a glorious, highly sexual relationship, albeit imaginary, with the most beautiful woman in the world. Unbelievably funny, unexpected, and very challenging for our boy Rollo. An entertaining read... recommended for those who like a good laugh. - Dan Whitman, Allbooks Review Straddles the line between outright drawing-room silliness

and romantic comedy... You may root for the charmingly dense Rollo. - Kirkus Should be read aloud before large groups for maximum effect. Do not invite your wife or girlfriend. - Marvin J. Wolf, co-writer, Ladies' Night, USA Networks Being single and on the make is tough enough when you've had some experience, even if it ended badly. But seeing poor Rollo go splat, it hurts so well when I laugh! - Tom Blake, syndicated columnist, Single Again, Orange County Register

**Wild in the Plaza of Memory** Pamela Uschuk, 2012 Blending the personal with the political, these poems explore the deleterious effects of adversity and trauma on a global scale, focusing on such subjects as immigration laws, environmental degradation, multinational corporate greed, and the effects of war on women and children. The poet makes unexpected connections between disparate things, drawing from wild nature for imagery while also passionately engaging the reader to become aware of injustice and suffering at home and abroad. The poems are crafted using lyrical language that is at once precise, figurative, and celebratory, creating a collection that is humanitarian and emotionally resonate.

Inflata-pals and bouncy BFFs Cactus, Flamingo, Donut, and Watermelon are ready for a fresh wave of drama in this hilariously action-packed graphic novel series that's perfect for fans of Dog Man and The Bad Guys! Cactus knows there is something not quite ripe about new float Avocado. So when she discovers he's actually a two-faced Avocadon't and he's planning to take over the park, her mission is clear. But can Cactus convince the inflata-gang to help her stop Avocadon't and save the spray before it's too late?

**The Inflatable Woman** Rachael Ball, 2015-10-22 A Guardian Best Graphic Book of 2015 Iris (or balletgirl-42 as she's known on the internet dating circuit) is a zookeeper looking for love when she is diagnosed with breast cancer. Overnight, her life becomes populated with a carnival of daunting hospital characters. Despite the attempts of her friends - Maud, Granma Suggs, Larry the Monkey and a group of singing penguins - to comfort her, Iris's fears begin to encircle her until all she has to cling to is the attention of a lighthouse keeper called sailor\_buoy\_39. The Inflatable Woman combines magic realism with the grit of everyday life to create a poignant and surreal journey inside the human psyche.

Star Ark Rachel Armstrong, 2016-11-13 As space ventures have become more numerous, leading scientists and theorists have offered ways of building a living habitat in a hostile environment, taking an 'ecosystems' view of space colonization. The contributors to this volume take a radical multi-disciplinary view of the challenge of human space colonization through the ongoing project Persephone. This book fundamentally challenges prevalent ideas about sustainability and proposes a new approach to resource austerity and conservation and providing truly sustainable approaches that are life-promoting. Readers will learn the details of the plans for Persephone - a real project that is part of the company Icarus Interstellar's plans for the design and engineering of a living interior on a worldship to be constructed in Earth's orbit within 100 years. Although the timeframe itself is only an estimate, since it is contingent on many significant developments, including funding and technological advances, the industry consensus is that within 100 years we will see manned space exploration beyond our solar system. This notion is shared by organizations such as the Initiative for

Interstellar Studies and the DARPA-funded 100-year starship project. This book specifically develops the principles for the construction of a living habitat within a worldship – a multi-generational starship that contains its own world that supports colonists as it travels across great distances between stars at a speed much slower than light. Far from being a sterile industrial setup, such as the ISS, or even being a bucolic suburbia as proposed by Gerard O'Neill in the 1970s, this worldship will provide the pre-conditions for sustaining life beyond Earth's environment, which may also lead to the evolution of non-terrestrial ecologies. Drawing on the principles of ecopoiesis and insights offered by the Biosphere 2 experiment that demonstrated what we have to learn about ecosystem construction, this book proposes first designing the soils of such a space. It should then be possible to set up the conditions that a first generation of colonists may experience in leaving our solar system to find new worlds to settle – perhaps in spreading life throughout the universe. Although the book takes a unique view of ecology and sustainability within the setting of a traveling starship it is equally concerned with the human experience on artificial worlds. Chapters come from a range of multi disciplinary thinkers who shed light on the brave new future ahead from different angles.
