Survival Kit for the Physiology Lecturer Francisco Suárez, José Miguel Biscaia, Miguel Marchena, Javier Vicente-Tejedor, 2021-10-19 This book offers a toolbox to ease the physiology exam-making process. It provides lists of physiological concepts for each topic, according to basic, advanced or specialized areas of knowledge. Depending on their requirements, the reader is able to use this book in two ways: either by grabbing questions "on demand", or by making lists of concepts interspersed in the questions. In addition, the book provides a suggested bibliography depending on the level of experience of the reader. Each chapter details a number of teaching schedules, and will help the reader to enjoy the joys of physiology and, of course, teaching.

Making Short Films, Third Edition Clifford Thurlow, Max Thurlow, 2013-05-25 Making movies is the most exciting way to earn a living and it is not surprising that media and film studies remain the most popular courses at colleges across the western world. A short film provides an opportunity for elliptical, poetic, condensed story telling. Shorts can take risks rarely seen in features. It is the arena where a strong voice or individual vision is possible; an invitation for experimentation and originality. Making Short Films, 3rd edition is entirely revised and restructured, providing a much more complete and detailed guide to filmmaking, with more information on new technology, illustrations and ideas for best practice.
