**The Iron Sword** Jocelyn A. Fox,2014-02-21 Tess O'Connor has never fought in a duel, ridden a Fae steed descended from a dragon, or touched taebramh, the magical substance that gives mortals dreams. She has never faced down a garrelnost or traveled the hidden mysterious pathways between the mortal world and the realm of the Fae. She has never felt a magnetic attraction to a perilously handsome Sidhe knight with eyes as deep and impenetrable as the ocean. Tess O'Connor stopped believing in fairy tales as a child when her father died...but all that changes when she discovers that her best friend Molly is half-Fae—and has been summoned to the Unseelie Court by Queen Mab herself. The Queen of Night and Winter sends Finnead, one of her trinity of Named Knights, to escort Molly to Court, willingly or unwillingly. Mab believes that Molly is the fulfillment of a prophesy, the half-Fae child foretold to become the bearer of the Iron Sword, a legendary weapon that could mean the difference between victory and defeat for the Fae in their struggle against an ancient evil. While Tess quickly learns she is no match for the shadow spreading through the Fae world, she refuses to let her best friend face it alone; and as the first mortal in Queen Mab's court in over five hundred years, she must use all her quick wit and tenacity to keep herself and Molly alive in the beautiful, dangerous Fae world as they hurtle toward the war that could destroy it...

The Iron Sword Jocelyn A Fox,2011-05-01 When Tess O'Connor is invited to spend Thanksgiving in Texas with her best friend, Molly, she doesn't anticipate more than a quiet holiday in the middle of nowhere. However, things are not always as they seem. Sometimes dreams speak the truth and Tess discovers that Molly has been hiding a secret from everyone for years. Molly has been summoned to the Unseelie Court of the Sidhe and before she knows it, Tess is drawn into the mystical and dangerous world of the Fae. For there is darkness rising beyond the veil, and even though Tess knows she is no match for the evil stalking the Sidhe, she has no intention of leaving her best friend to face it alone...

**Iron Metabolism** ,2022-10-05 Iron is an essential element for numerous fundamental biologic processes. Iron-containing proteins are required for vital cellular and organismal functions including oxygen transport, mitochondrial respiration, intermediary and xenobiotic metabolism, nucleic acid replication and repair, host defense, and cell signaling. However, excess iron is toxic. This book provides a comprehensive overview of the essential role of iron in biology, the regulation of systemic and cellular iron homeostasis, and how imbalances in iron homeostasis contribute to disease.

**Rome Falls** David Mather,2017-11-17 Much has been written about the so called 'barbarian' invasion between 300 and 500 AD that ultimately led to the Fall of the Roman Empire. Long before this, twelve thousand Celts crossed the Alps looking to conquer new lands. After treachery and murder, Rome dispatched four of her legions - twenty four thousand men - to confront the invaders on the 18th July 390BC. The battle took place next to a small river called Allia. This book follows both sides, the perilous journey the Celts made to get there and what the Romans did to provoke them in to battle. The story is set towards the end of the Bronze Age, so when a new stronger and lighter metal has been discovered men are prepared to steal and kill to possess the knowledge of how to make iron. We follow the son of one of the Romans sent to negotiate peace, and the small band of warriors, a druid and a necromancer sent by the Celts to pave the way for the main army.

British Iron Age Swords and Scabbards Ian Mathieson Stead,Janet Lang,2006 British Iron Age swords and scabbards are here catalogued in detail for the first time. They are grouped on the basis of typologies of components and are discussed with special reference to their decoration, context and chronology. Artefact studies have been neglected for many years, and this subject was last tackled in a paper published in 1950. Since then, the material available for study has tripled, from 93 to 274 items, and new archaeological discoveries include several elaborately decorated scabbards. Illustrations include 71 full pages of line drawings, while additional contributions examine the technology of some of the swords and provide a discussion of their enamelled decoration. Contents: Introduction; Typology and terminology; Group A: Swords of medium length and scabbards with open chape ends; Group B: Swords of medium length and scabbards with closed chape ends; Group C: Long swords and scabbards with campanulate mouths; Group D: Long swords and scabbards with straight mouths; Group E: Earlier swords and scabbards in the north; Group F: Later swords and scabbards in the north; Group G: Short swords in the south and the north; Group H: Swords and scabbards of mixed traditions; Discussion; Appendices; The technology of some of the swords; Weapons and fittings with enamelled decoration; The Isleworth sword: a note on the brass foils; A technical report on the Orton Meadows scabbard; The scientific examination of the Asby Scar sword and scabbard; The extraction of swords from their scabbards; Catalogue; Bibliography.

*Empire of White Gold* David Mather,2017-12-08 The Celtic army receive a thousand pounds in weight of gold in payment for abandoning their capture of Rome. They accept the huge payment and head home. The Chieftain, Brennus, traverses back through the Alps whilst our Silurian warriors head west to the port of Civita Vecchia in search of a sea passage to return to their homeland. During this voyage, they meet a salt trader from Hallstatt who owns several salt mines. However, the bronze tools his men are using are failing and he needs to find stronger and more robust tools to access the untapped mountains of salt that lie deeper underground.Their vessel is

attacked whilst crossing the sea by a Carthaginian warship. During this skirmish, the salt trader witnesses the shattering of the Carthaginian leader's bronze sword by the Celt's weapon - a sword that he later discovers was made from iron. This new metal could be the answer he has been looking for in his quest to fabricate stronger tools. The battle sees our Celtic hero Arenwen making a new enemy, one who will follow him through the Pillars of Hercules, desperate for revenge. The adventure sees them putting to many ports to re-stock their supplies where they discover new and ancient lands where they enlist the tribes to help them along their journey. Our heroes return to their home town of Pont-y-ty-pridd where they manufacture iron tools and weapons for the salt trader - the man who trades in white gold.

**The Iron Dream** Norman Spinrad, 2014-06-30 Norman Spinrad's 1972 alternate history, gives us both a metafictional what-if novel and a cutting satire of one of the 20th century's most evil regimes . . . In 1919, a young Austrian artist by the name of Adolf Hitler immigrated to the United States to become an illustrator for the pulp magazines and, eventually, a Hugo Award-winning SF author. This volume contains his greatest work, Lord of the Swastika: an epic post-apocalyptic tale of genetic 'truman' Feric Jagger and his quest to purify the bloodline of humanity by ruthlessly slaughtering races of the genetically impure - a quest Norman Spinrad expertly skewers through ironic imagery and over-the-top rhetoric. Spinrad hoped to expose some unpalatable truths about much of SF and Fantasy literature and its uncomfortable relationship with fascist ideologies - an aim that was not always apparent to neo-fascist readers. In order to make his aims clear to the hard-of-understanding, Spinrad added an imaginary critical analysis by a fictional literary scholar, Homer Whipple, of New York University.

The Sword and the Crucible Alan Williams, 2012-05-03 The sword was the most important of weapons, but relatively little has been written about its metallurgy. The results of the microscopic examination of over a hundred swords are used to tell the story of the making of swords from the first examples through the Middle Ages to the 16th century.

**Iron Sharpens Iron** Hans Fleurimont, 2021-07-12 In Iron Sharpens Iron, Hans shares some of his own story and his teachings of how he sharpened his mind by transforming his mindset. He uses the process of creating a sword as a way to illustrate the process of transforming the mind.

Ariadne's companions travel to the corners of the Westland to raise the forces to stop him. **Blood and Iron** Jon Sprunk, 2014-03-11 This action-heavy EPIC FANTASY SERIES OPENER is like a sword-and-sorcery Spartacus set in a richly-imagined world. It starts with a shipwreck following a magical storm at sea. Horace, a soldier from the west, had joined the Great Crusade against the heathens of Akeshia after the deaths of his wife and son from plague. When he washes ashore, he finds himself at the mercy of the very people he was sent to kill, who speak a language and have a culture and customs he doesn't even begin to understand. Not long after, Horace is pressed into service as a house slave. But this doesn't last. The Akeshians discover that Horace was a latent sorcerer, and he is catapulted from the chains of a slave to the halls of power in the queen's court. Together with Jirom, an ex-mercenary and gladiator, and Alyra, a spy in the court, he will seek a path to free himself and the empire's caste of slaves from a system where every man and woman must pay the price of blood or iron. Before the end, Horace will have paid dearly in both. From the Trade Paperback edition.

**The Perfect Sword** Paul Gething, Edoardo Albert, 2022-11-03 The story of the Bamburgh Sword – one of the finest swords ever forged. In 2000, archaeologist Paul Gething rediscovered a sword. An unprepossessing length of rusty metal, it had been left in a suitcase for thirty years. But Paul had a suspicion that the sword had more to tell than appeared, so he sent it for specialist tests. When the results came back, he realised that what he had in his possession was possibly the finest, and certainly the most complex, sword ever made, which had been forged in seventh-century Northumberland by an anonymous swordsmith. This is the story of the Bamburgh Sword – of how and why it was made, who made it and what it meant to the warriors and kings who wielded it over three centuries. It is also the remarkable story of the archaeologists and swordsmiths who found, studied and attempted to recreate the weapon using only the materials and technologies available to the original smith.
