SU-152/ISU-152 vs Tiger David Greentree,2022-04-28 This fully illustrated volume compares two of the most iconic AFV's: the SU-152/ISU-152 and the Tiger, used on the Eastern Front during World War II. On the Eastern Front in 1943, the Tiger-equipped heavy Panzer battalions gave German armoured divisions an unmatched capability that cost the Red Army dearly. The Tiger's 88mm gun had the potential to carve through Soviet defences in the attack and cause havoc amongst advancing Soviet armoured formations when used in defence. Neither of the Red Army's heavy tanks (the KV-1 and KV-2) could match the Tiger's gun, and, more importantly, penetrate its armour at anything approaching standard combat range. The Soviet response was a stopgap Tiger-killing vehicle that mounted a 152mm artillery piece onto the KV tank's chassis: the SU-152. The latter would evolve into the ISU-152 in late 1943 (mounting the same powerful gun on an IS chassis). This fascinating book describes the mighty duels fought between these opposing AFVs. The colour illustrations explore key details of both the SU-152/ISU-152 and Eastern Front Tigers, including armament, ammunition and crew positions, and the period photographs show rarely seen views of these iconic AFVs in action. How each attempted to best the other using its strengths and advantages is documented across a wide range of dramatic Eastern Front armoured battles.

World of Tanks - The SU-152 and Related Vehicles Yuri Igorevich Pasholok,Dana Lombardy,Christopher Parker,2017-05-19 In 2012, the company that created World of Tanks, the phenomenal world-wide massive, multi-player online game, started publishing a series of books in Russian that utilized Soviet documents and archival materials that had never before been seen by outsiders or published in any language about the design, procurement, development, manufacturing, and combat employment of Soviet armored fighting vehicles (AFVs) during World War Two (the Great Patriotic War to Russians). Now these remarkable books are being published in English with the obvious aphorism The Russian View. Hundreds of photos, illustrations, tables, and diagrams tell the story about the development of the SU-152 tank-killer.

IS-2 Heavy Tank 1944-73 Steven J. Zaloga,2011-03-15 The Iosef Stalin tanks were the ultimate heavy tanks developed by the Soviet Union and were popularly called 'Victory tanks' due to their close association with the defeat of Germany in 1945. Yet in spite of their reputation, the Stalin

tanks emerged from a troubled design, had a brief moment of glory in 1944 and 1945, and disappeared in ignominy after 1960. This title covers the events contributing to the Soviet Union's need to design the new series, with particular reference to the unsuccessful KV series and the advent of a new generation of heavy German tanks including the Tiger. It also covers their development, operational history and myriad variants.

Allied Armoured Fighting Vehicles of the Second World War Michael Green, 2017-04-30 Expert author Michael Green has compiled a full inventory of the armored fighting vehicles developed and deployed by the Allied armies during the six year war against Nazi Germany and her Axis partners. Tank destroyers included the US Army's M18 Hellcat and M36 Jackson, the British Archer and Achilles and the Soviets SU-85, SU-100 and SU-122. Self-propelled artillery vehicles provide indirect fire support. Examples of these were the British Bishop and Sexton, the US M7 Army Priest and The Red Army's SU-152 Beast Slayer. For reconnaissance the Allies fielded armored cars and scout cars such as the Daimler Dingo, the US M8 Greyhound and T17 Staghound, and the Russian BA-10, -20 and -64. AFVs such as the British full tracked Universal Carrier and US M3 halftracks were fitted with a range of weapon systems, such as mortars or machine guns. All these and many more AFVs are expertly described in words and captioned images in this comprehensive work which is the companion volume to the authors Allied Tanks of the Second World War.

Soviet Tanks in Manchuria 1945 William E. Hiestand, 2023-03-16 A new illustrated study of the devastating, but little-known, Soviet armored blitzkrieg against the Japanese in the last weeks of World War II, and how it influenced Soviet tank doctrine as the Cold War dawned. Although long overshadowed in the West by the dropping of the atomic bombs on Hiroshima and Nagasaki, the USSR's lightning strike into Manchuria in August 1945 was one of the most successful and unique campaigns of the era. Soviet forces, led by over 5,500 tanks and self-propelled guns, attacked across huge distances and deserts, marshes, and mountains to smash Japan's million-strong Kwantung Army in a matter of days. Japanese forces were short of training and equipment, but nevertheless fought fiercely, inflicting 32,000 casualties on the Soviets. Red Army operations were characterized by surprise, speed, and deep penetrations by tank-heavy forces born of the brutal lessons they had learned during years fighting the Wehrmacht. Lessons from the campaign directly shaped Soviet Cold War force structure and planning for mechanized operations against the West. Illustrated with contemporary artwork and rare photos from one of the best collections of Soviet military photos in the West, this fascinating book explains exactly how the last blitzkrieg of World War II was planned, fought, and won, and how it influenced the Red Army's plans for tank warfare against NATO in Europe.

Modelling the IS Heavy Tank Nicola Cortese, 2012-02-20 The IS (Iosef Stalin) heavy tanks were some of the most widely used AFVs produced by the USSR. First entering combat in 1944, the IS-2 went head-to-head with German tanks such as the Panther, Tiger and King Tiger, and post war IS-2s and IS-3s were exported to China, Cuba and North Korea. This book is packed with easy to follow super-detailing and finishing instructions for building the IS-2, IS-3, and IS-3M variants, as well as for the prototype ISU-152, and features kits from manufacturers such as Dragon, Tamiya, and Fujimi. Advanced scratch-building techniques and working with photo-etched and other after-market accessories in 1/35 and 1/76 scales are covered, making this highly accessible book a welcome addition to any modeller's library.

The Encyclopedia of Weapons of World War II Chris Bishop, 2002 The encyclopedia of weapons of world war II is the most detailed and authoritative compendium of the weapons of mankind's greatest conflict ever published. It is a must for the military, enthusiast, and all those interested in World War II.

Soviet T-10 Heavy Tank and Variants James Kinnear, Stephen Sewell, 2017-06-29 A highly illustrated study of the T-10 Heavy Tank that served from the 1950s through to the end of the Soviet Union. When it was introduced into service in 1953, the T-10 represented a return to the "classic" Soviet heavy tank. Although considered a major threat to NATO tank forces, it also represented the end of an era. All gun heavy tanks like the T-10 would eventually be made effectively redundant by

later models like the T-62 which had powerful next generation armament and new ammunition types. The tank was gradually withdrawn from service in the 1970s, though the last tanks would only leave Russian service, by decree of the President of the Russian Federation, in 1997. As such the T-10 outlived the Soviet state that had created it. Never exported outside of the Soviet Union and rarely used in combat, the T-10 has remained a mysterious tank, with many of its variants unknown in the West until very recently. This study, written from original Russian and Ukrainian primary source documents that have only recently been made available, uncovers the history of this enigmatic tank using 130 stunning contemporary and modern photographs of the T-10 as well as full colour side-view artwork.

Red Army Weapons of the Second World War Michael Green, 2022-09-21 While the Red Army's arsenal at the start of the Second World War included weapons dating back to the Great War or earlier, the 1930s' modernization program had introduced the automatic Tokarev pistol and self-loading Tokarev rifle. Its small arms were soon replaced by mass-produced sub-machine guns, such as the PPSH 1941, nicknamed the 'PePeSha,'. Supplementing the submachine guns, the Degtyarev Light Machine Gun DP-27. Fitted with a circular pan magazine, it received the not-unsurprising nickname 'Record Player.' New mortars and towed artillery pieces, ranging from 76mm to 203mm, entered service in the pre-war years. In addition to a wide range of towed, self-propelled and anti-tank guns, the Soviets fielded the Katyusha rocket launchers in 1941, nicknamed the 'Stalin's organ' by the Germans. The 1930s saw the introduction of the BT light tank series. The iconic T-34 medium tank series came into service in late 1940, joined by the IS-2 heavy tank from early 1944, the prefix letters 'IS' translates to Joseph Stalin. These formidable AFVs led the Red Army to victory in May 1945 over Nazi Germany. All these weapons and more are covered with numerous images in this authoritative overview of the subject.

Soviet/Russian Armor and Artillery Design Practices, 1995

Commanding the Red Army's Sherman Tanks Dmitriy Fedorovich Loza, 1996-01-01 Hero of the Soviet Union Dmitriy Loza has carefully crafted his World War II experiences with U.S.-provided Sherman tanks into a highly readable memoir. Between the fall of 1943 and August 1945, Loza fought in the Ukraine, Romania, Hungary, Czechoslovakia, and Austria. He commanded a tank battalion during much of this period and had three Shermans shot out from under him. Loza's unit participated in such well-known combat actions as the Korsun-Shevchenkivskiy Operation, the Jassy-Kishinev Operation, and the battles for Budapest, Vienna, and Prague. Following the German surrender, Loza's unit was sent to Mongolia, where it participated in the arduous trek across the Gobi Desert to attack the Japanese Kwantung Army in Manchuria. This is the first available detailed examination of the Red Army's exploitation of U.S. war materiel during World War II and one of the first genuine memoirs available from the Russian front. Loza also provides firsthand testimony on tactical command decisions, group objectives and how they were accomplished, and Soviet use of combat equipment and intelligence. Only after the collapse of the USSR and concomitant relaxing of prohibitions against publication of materials related to the Lend-Lease Program there could this account be made available. Dmitriy Loza served as an instructor at the Frunze Academy after the war, retiring in 1967 with the rank of colonel. He resides in Moscow. James F. Gebhardt, now a

defense contractor at Fort Leavenworth, is a Vietnam veteran. He is the author of *Blood on the Shores: Soviet Naval Commandos in World War II*.

Companion to the Red Army 1939-1945 Steven J. Zaloga, Leland S. Ness, 2009-12-07 Stalin's Red Army entered World War II as a relatively untried fighting force. In 1941, with the launch of Operation Barbarossa, it joined battle with Hitler's army, the most powerful in history. After a desperate war of attrition over four years, the Red Army beat the Nazis into defeat on the Eastern Front and won lasting fame and glory in 1945 by eclipsing the military might of the Third Reich. This book begins with a review of the historical background of the Red Army in the years leading up to the outbreak of war in 1939, and follows with a discussion of the major themes in the development of Soviet forces during the Great Patriotic War that ensued in 1941. The Red Army's organizational structures are examined, from high command down to divisional level and below; Soviet combat arms and weaponry are also described in detail.

Russia at War [2 volumes] Timothy C. Dowling, 2014-12-02 This easy-to-use reference explores the people and events that shaped Russian military history—and impacted Europe, Asia, and the world—over the past eight centuries. Russian military history is an often-overlooked field. Yet Russia is and has long been an important player in global politics, and its military exploits have been central to its role on the world stage. This study of Russia's military past provides insights into European and U.S. history, including the conduct of the two World Wars and the Cold War, and will help readers better appreciate the current geopolitical situation. This work covers major events and figures in Russian military history from the end of Mongol domination in the 14th century to the present day. More than 650 entries by scores of expert contributors detail events, individuals, organizations, and ideas that have influenced Russian warfare over 800 years. Two alphabetically arranged volumes explore such conflicts as the Russo-Polish Wars, the Great Northern War, the Russo-Turkish Wars, the Napoleonic Wars, the Crimean War, the Russo-Japanese War, World War I, World War II, and the Cold War, including the Soviet invasion of Afghanistan. Cross references and further readings in each entry serve as jumping-off points for further exploration.

Colossus Reborn David M. Glantz, 2005 Beyond the battles themselves, Glantz also presents an in-depth portrait of the Red Army as an evolving military institution. Assessing more clearly than ever before the army's size, strength, and force structure, he provides keen insights into its doctrine, strategy, tactics, weaponry, training, officer corps, and political leadership. In the process, he puts a human face on the Red Army's commanders and soldiers, including women and those who served in units - security (NKVD), engineer, railroad, auto-transport, construction, and penal forces - that have till now remained poorly understood.--BOOK JACKET.

The T-34 Goes to War Andrei Ulanov, Dmitrii Shein, 2017 For the first time, translated Soviet archival documents, including more than 100 photos and illustrations, are used to present the Russian view of the legendary T-34 tank.
