International Financial Policy Mr. Jacob A. Frenkel, Mr. Morris Goldstein, 1991-09-15 During his distinguished career at the IMF, Jacques J. Polak served as both Director of Research and, subsequently as a member of the IMF Executive Board. His distinct contribution to the discipline of international financial policy is highlighted in this book edited by Jacob A. Frenkel and Morris Goldstein. The papers included were prepared for a conference, cosponsored by the Netherlands Bank and the IMF, held in Polak's honor in Washington, D.C., in January 1991.

Economic Theory and Financial Policy Jacques J. Polak, James M. Boughton, 2016-07-22 As former Director of Research and a founding member of the Executive Board of the International Monetary Fund, Jacques J. Polak has advised theoreticians and policymakers worldwide. This collection brings

together his most current writings, and is published under the auspices of the IMF. The hallmark of Dr. Polak's recent research has been his ability to draw on decades of personal experience and reflection to comprehend and describe the context for current policy debates. In the past decade, he has contributed much to the debates on international financial policy and the role of the IMF, and this volume brings together most of these recent papers to make them accessible to a broader audience.

Money and Empire Perry Mehrling, 2022-08-04 Charles Kindleberger ranks as one of the twentieth century's best known and most influential international economists. This book traces the evolution of his thinking in the context of a 'key-currency' approach to the rise of the dollar system, here revealed as the indispensable framework for global economic development since World War II. Unlike most of his colleagues, Kindleberger was deeply interested in history, and his economics brimmed with real

people and institutional details. His research at the New York Fed and BIS during the Great Depression, his wartime intelligence work, and his role in administering the Marshall Plan gave him deep insight into how the international financial system really operated. A biography of both the dollar and a man, this book is also the story of the development of ideas about how money works. It throws revealing light on the underlying economic forces and political obstacles shaping our globalized world.

Regulatory Peptides J.M. Polak, 2013-03-07 J. M. Polak and S. R. Bloom For some time Experientia has published, as a unique feature, interdisciplinary multi-author reviews, giving a comprehensive overview of subjects regarded as 'growing edges' of science. The enthusiasm shown by the readers was contagious and thus it was felt necessary to compile a special volume dealing with the novel aspects of regulatory peptides. This book covers some of the growing areas in regulatory peptide research and, although it is based on the original volume of Experientia, it is expanded and updated. The topic of 'regulatory peptides' is relatively young and has grown at an unprecedented pace, from the embryonic conception of 'gut hormones' or 'brain neuropeptides' some 15 years ago to

the realisation that these active peptides are found, almost without exception, in every part of the body in all vertebrate and many invertebrate species • Why the term 'regulatory peptides'? It represents a convenient label encompassing both the active peptides present in nerves, which are released as (putative) neurotransmitters, and those in endocrine cells, which act locally or at a distance as circulating hormones, these being the main components of the so-called diffuse neuroendocrine or APUD system • Morphological studies support this physiological viewpoint.

Suharto's Cold War Mattias Fibiger, 2023-07-14 This book provides an introduction (from the perspective of Chan/Zen Studies) to the teachings of the key figure of Yuan-dynasty Chan: Zhongfeng Mingben. Zhongfeng was a leading student of Gaofeng Yuanmiao. At Gaofeng's death, Zhongfeng left the mountain and for many years resided in various small mountain hermitages (often called Dwelling-in-the-Phantasmal Hermitages). On occasion, he chose to live on a houseboat. He drew students from

all over East Asia: Yunnan, Turfan, Mongol officials; Koreans, Japanese, and so forth. The primary focus is on illustrating Zhongfeng's Chan style via translation of selected works in his Chan records. The texts selected from his Chan records include the standard genres instructions to the assembly and dharma talks; the miscellany Night Conversations in a Mountain Hermitage (which covers such topics as the nature of the huatou; the relationship between the bodhisattva stages and Chan; numinous knowing versus false knowing, and so forth); one-hundred poems in imitation of the well-known collection Hanshan's Poems (Poems of Cold Mountain); admonitions on cross-legged sitting Chan, and so forth. Zhongfeng's wider social world, cultural context, and idiosyncratic calligraphy are addressed only in passing--
