*American Flying Boats and Amphibious Aircraft* E.R. Johnson,2016-03-29 This work is a comprehensive, heavily illustrated history of the many flying boats and amphibious aircraft designed and built in the United States. It is divided into three chronological sections: the early era (1912-1928), the golden era (1928-1945), and the post-war era (1945-present), with historical overviews of each period. Within each section, individual aircraft types are listed in alphabetical order by manufacturer or builder, with historical background, technical specifications, drawings, and one or more photographs. Appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage.

*Grumman JF/J2F Duck* Steve Ginter,2009 The JF/J2F Duck was one of those military workhorses moving around in the background before and during WWII which did a tremendous job but never got the publicity of its' more glamorous teammates. Some said the Duck could be more aptly named the Ugly Duckling. Be that as it may; when no other bomber could be found, it carried bombs; when no other transport could be found, it transported; when no other photo plane could be found, it photographed and when no other rescuer could be found, it rescued. When it came to Utility Craft, the JF/J2F was the definitive.

Volume II: U.S. Navy, U.S. Marine Corps and U.S. Coast Guard Aircraft Lost During World War II - Listed by Squadron Campbell,Ph. D. Douglas E. Campbell,2011-07 During World War II, the U.S. military lost some 35,000 aircraft to enemy action, training

incidents, typhoons, aircraft carrier deck mishaps, mechanical failures or just normal wear-and-tear where aircraft were scrapped and used for parts to keep others flying. Many just failed to return from their missions. To date, the 15,069 aircraft represented in this 3-volume set is information initially transferred from hand-written Aircraft History Cards and are the total number of U.S. Navy, Marine Corps and Coast Guard aircraft lost between 7 December 1941 and 15 August 1945, and lost outside the continental United States (CONUS). Volume II represents the information on any aircraft lost that was attached to any of the 713 squadrons listed in the database. Given the thousands of hours that went into this effort, the author hopes that, as a 3-volume set of reference books, it provides assistance to others who are researching ship, squadron and aircraft histories.

**Aircraft Listing, July 1, 1949** United States. Civil Aeronautics Administration, 1949

**United States Naval Aviation, 1919-1941** E.R. Johnson, 2011-04-29 Within six months of the devastating attack on Pearl Harbor, the U.S. Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original "Defeat Germany First" strategy. That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1,000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation. This thorough study, with detailed drawings and photographs, explains and illustrates the trial and error process which went into developing the aircraft, airships and ships of the interwar period. The critical factors that shaped Naval Aviation after World War I—naval treaties, fleet tactics, government programs, leadership and organization, as well as the emergence of Marine Corps and Coast Guard aviation—are discussed in depth.

United States Marine Corps Aircraft Since 1913 E.R. Johnson,Lloyd S.

Jones,2018-04-03 Among the world's military air arms, United States Marine Corps Aviation occupies a unique tactical niche. As the air component of a combined-arms expeditionary force, it exists primarily to support Marine combat forces on the ground in their amphibious assault mission. From the Banana Wars of the 1920s to the present day War on Terror, Marine aviation has undergone a lengthy fine-tuning process not only in terms of warfare doctrines and tactics, but also in the types of aircraft needed to accomplish the mission. This comprehensive survey provides the history, technical specifications, drawings, and photographs of every type of fixed and rotary-wing aircraft used by Marine Air from its origins prior to World War I up to current operations.

The Encyclopedia of Weapons of World War II Chris Bishop,2002 The encyclopedia of weapons of world war II is the most detailed and authoritative compendium of the weapons of mankind's greatest conflict ever published. It is a must for the military, enthusiast, and all those interested in World War II.

*American Military Transport Aircraft Since 1925* E.R. Johnson,2013-04-23 Without the support of airlift, the modern American military machine would be brought to a standstill. Since World War II--beginning with the Cold War and continuing up to the present day--the U.S. armed forces have come increasingly to rely upon airlift for mobility. The power to rapidly move and thereafter support a military operation--anywhere in the world, at any time--has become a foundational element of American defense policy. This work provides the reader with a comprehensive historical survey--including technical specifications, drawings, and photographs--of each type of fixed-wing aircraft used by U.S. military forces

over a nearly 90-year period to carry out the airlift mission.

**Organic Compounds of Sulphur, Selenium, and Tellurium** D H Reid, 2007-10-31  
Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

U.S. Military Commanders and Aircraft on the Island of Oahu, Hawaii: December 7, 1941 Louis Bontya III, 2022-02-09 U.S. Military Commanders and Aircraft on the Island on Oahu, Hawaii: December 7, 1941 By: Louis Bontya III U.S. Military Commanders and Aircraft on the Island on Oahu, Hawaii: December 7, 1941 contains factual information on

commanders and aircraft that were present at the time of the attack on Dec. 7, 1941. More of the military history pertaining to the commanders and aircraft that has not been published in many previous books has been documented here. It is important to preserve the historical information about individual commanders and specific aircraft that have not been previously published. This book provides a comprehensive compilation of research regarding specific people and events that historical day. It will help to teach family members whose relatives may have served during this period of our history. This book will help many historians to see the actual commanders' names and also to provide model builders with historically correct aircraft color profile and identification.

**Surviving Trainer & Transport Aircraft of the World** Don Berliner,2013-05-20

This final volume in the three-volume set covering more than 300 types of Surviving World War II aircraft includes the less-glamorous ones that couldn't qualify for two volumes on Fighters and Bombers. They were the ones that served absolutely vital purposes like the Army's Jeeps and trucks and the Navy's freighters and landing craft. Clearly, they made the great machine work, for without the transports and trainers and gliders and helicopters and the scout airplanes and the others, the fighters and bombers wouldn't have had fuel for their engines, nor bullets for their guns, nor food for their crews. Their pilots and navigators and radio operators and ground crews may not have had as many stories to tell of narrow escapes from massed enemy guns, but they knew that they played

roles that can never be ignored. They wore the same uniforms and shed as many tears for their departed comrades. That scores of their aircraft have been lovingly restored to like-new condition and placed on display is a tribute to their sacrifices.
