Rcaf War Prize Flights, German and Japanese Warbird Survivors Harold A. Skaarup,2006-05-23 This handbook concerns the collection of Air Technical Intelligence, and the test flying of war prizes carried out by two RCAF bomber pilots who were posted to the Royal Aircraft Establishment's Foreign Aircraft Flight, Farnborough, in the United Kingdom in May 1945. Their primary task was to visit former Luftwaffe airfields, and to find and fly back any aircraft they deemed worthy of evaluation. The list of aircraft found here does not include every German combat aircraft of the Second World War, as it focuses on those warbirds captured and flown by members of the RCAF, or sent to Canada as war prizes. Very few of these rare aircraft exist today, and therefore, information on known locations where German, Japanese and Italian warbird survivors may be found is included. As a member of the Canadian Aviation Preservation Association and the Canadian Aviation Artists Association, the author strongly supports the preservation of Canada's aviation heritage. The primary intent of this handbook is to provide information for aviation artists and enthusiasts looking for that unusual never before painted military aviation subject, and to support the efforts of those engaged in the search for those missing warbirds for which no examples currently exist.

Wings of the Rising Sun Mark Chambers,2018-11-29 In the Pacific War's early years, Japanese air power was dominant. The only way for the Allies to defeat their enemy was to know it. This made the task of maintaining productive intelligence gathering efforts on Japan imperative. Establishing Technical Air Intelligence Units in the Pacific Theatre and the Technical Air Intelligence Center in Washington DC, the Allies were able to begin to reveal the secrets of Japanese air power through extensive flight testing and evaluation of captured enemy aircraft and equipment. These provided an illuminating perspective on Japanese aircraft and aerial weapon design philosophy and manufacturing practice. Fully illustrated throughout with a wealth of previously unpublished photographs, Mark Chambers explores Allied efforts to evaluate the strengths and weaknesses of Japanese air power during the war years, and how this intelligence helped them achieve victory in the Pacific.

Surviving Fighter Aircraft of World War Two Don Berliner,2011-11-02 This is a guide to the existing WWII aircraft to be found in aviation museums throughout the world. Each DPS contains a colour photo of an example of the aircraft as viewed in an aviation museum, examples of different marks (wartime shots in mono) and a textual resume of the type with statistics. The aircraft can be viewed in the USA, UK, France, Czechoslovakia, USSR, Canada, Australia, Finland, Holland, Poland, Germany, Italy, Japan, Sweden and Spain

Operation Lusty Graham M. Simons,2016-07-31 A fascinating overview of the Allies' post-WWII program to gain access to advanced Nazi war machines and the technology they ultimately recovered. Prior to the Allied D-Day assault on Normandy, France, rumors had already been circulating that high-tech Nazi super-weapons (wunderwaffe) had reached or were near completion. At the war's end, a mad scramble ensued to discover the enemy's secrets, fueled in large part by a US desire to regain its technological edge and to keep these weapons out of Soviet hands. Operation Lusty (LUftwaffe Secret TechnologY) was in full swing. In Operation Lusty, aviation historian Graham M. Simons delivers a comprehensive and detailed history of the program while cataloging the advanced war equipment that was ultimately discovered—from U-boats, carriers, and battleships to radar equipment and operating systems, to fighters, bombers, rockets, and other V-weapons. With access to previously unreleased documentation and wide-ranging archival materials, Simons distinguishes what was fact in the Nazi arsenal from what was pure fantasy, dreamed up by Joseph Goebbels's powerful propaganda machine. Operation Lusty sheds new light on the furious race for postwar technological superiority, and offers an insider's look at the full spectrum of military spoils that were gained.

The sun will rise! Mark H Lewis,2013-12-19 Mark Lewis has been employed all of his working life in the packaging industry in a laboratory environment. He has interests in military history, aviation, competition photography and martial arts. Mark has studied judo, kendo, aikido and is currently studying Tai Chi. As an avid modeller he has written articles and book reviews on aviation and modelling subjects. His main area of interest is WW2 aircraft, which has led to his first book "Project Z". By writing the "Air War Japan 1946" series he hopes to stimulate interest in Japanese wartime aviation.

The Rise and Fall of the Japanese Imperial Naval Air Service Peter J. Edwards,2010-11-20 This book describes in considerable detail the people, events ships and aircraft that shaped the Air Service from its origins in the late 19th century to its demise in 1945. The formative years began when a British Naval Mission was established in Japan in 1867 to advise on the development of balloons for naval purposes. After the first successful flights of fixed-wing aircraft in the USA and Europe, the Japanese navy sent several officers to train in Europe as pilots and imported a steady stream of new models to evaluate. During World War One Japan became allied with the UK and played a significant part in keeping the German fleets of ships and submarines at bay in the Pacific and Indian Oceans. However, in the international naval treaties that followed they felt betrayed, since the number of capital ships, battleships and cruisers, that they were allowed was below those of the USA and the UK. Aircraft carriers were not included, so a program of carrier building was started and continued until World War Two. At the same time they developed an aircraft industry and at the beginning of war their airplanes were comparable, and in some instances superior, to those of the British and Americans. Much prewar experience was gained during Japan's invasion of China, but their continued anger with America festered and resulted in their becoming allied with Germany, Italy and the Vichy France during World War Two. There followed massive successful attacks on Pearl Harbor, the Philippines, the Southern Islands, Port Darwin and New Guinea. The British were decimated and the USA recoiled at the onslaught, taking over a year to regroup and take the war to the Imperial Japanese forces. Throughout the conflict many sea battles were fought and the name Zero became legendary. When Japan eventually capitulated after the Atomic bombs were dropped the Japanese Imperial Air Service was disbanded.

PROJECT Z: AIR WAR JAPAN 1946 Mark Lewis,2010-07-08 Following the disastrous defeat of the Japanese naval forces

at the Battle of Midway the head of the Nakajima Aircraft Company drew up a new battle plan. He clearly understood that the enormous industrial capacity of America would soon make the war unwinnable for Japan if the current war strategy did not change. In August 1943 after consultation with his board and design staff Nakajima approached the Japanese military bureaucracy with a series of radical changes to alter what he felt was the current defeatist Japanese war strategy. With these changes in place Nakajima was confident Japan could regain the superiority in the war. Project Z was born from one of these proposals. Project Z was the codename for the long range heavy bomber project designed to strike back at the American mainland and cripple the American economy. This book describes how the Japanese aircraft industry as a whole attempted to stave off defeat by adopting new technologies and the latest aeronautical developments. In a blending of fact and fiction the air combat scenarios over Japan and the Pacific theatre are described.

Fighters of the Dying Sun Justo Miranda,2021-07-11 The first B\29 flew over Tokyo on 1 November 1944. It was a photographic reconnaissance aircraft ironically named 'Tokyo Rose'. The Ki.44 fighters of the 47th Sentai took off to intercept it but as it turned out the Superfortress flew at such an altitude and speed that they could not reach it. The Ki\44\II\Otsu had been specifically designed for this type of interception and could reach the astonishing rate of climb of 5,000 m in four minutes; however it was not good enough. During the following ten months, a devastating bombing campaign of thousands of Superfortress destroyed 67 Japanese cities and half of Tokyo. The cultural shock and the political consequences were huge, when it was realised that the Japanese industry was not able to produce the specially heat and stress\resistant metallic alloys that were required to manufacture the turbo superchargers needed by the fighters in charge of defending the Japanese mainland. They lacked the essential chromium and molybdenum metals to harden the steel. This fact thwarted the manufacturing of numerous advanced projects of both conventional fighters and those derived from the transfer of German technology fitted with turbojets and rocket engines. They are thoroughly described in this book.

Maryland, Virginia, and Washington D.C. Warbird Survivors 2003 Harold Skaarup,2003-04-07 North America is replete in aviation history, both military and civilian. The sheer size of the United States dictated an early interest in air defense and profoundly influenced the nation's dependence on air travel. It is no wonder that the United States developed as an "air-faring" nation. A large part of the leadership that contributed to that development can be traced to America's Air Force. Indeed, its proud military heritage is embodied in the dedicated individuals who have served and continue to do so--and in the marvelous aircraft they have flown. The preservation and public display of these aircraft is a labor of love for many, including the editor of this book. If you are an enthusiast of military aviation history, or one with a passing interest who simply wishes to learn more, you will find a wealth of information in these well-researched pages.

Path of a Ghost Mark Lewis,2012-02-14 After the turn of the 20th century the leadership of Imperial Japan looked at ways to increase the size and economic power of the Empire. These ideals were also in the forefront of the competing European nations and America. Quickly realizing their military forces would require substantial enlargement to apply "adequate political pressure" the Japanese government undertook a major directional change in policy. The Japanese navy and air force were enlarged and reorganized along European lines. These expansionist policies soon raised the ire of the competing nations. Japan had always been looked down upon as a second class nation and this attitude stung many young Japanese officers and bureaucrats into action. By the end of the First World War Japan had already obtained overseas bases in the Pacific as war reparations. The IJA and IJN sought to improve these bases for a future conflict with other nations. Path of a Ghost primarily looks at the lives of three young men serving the Empire. Each man would follow his own path, along the way achieving success in his chosen field of participation. Just before the end of the Second World War the paths of all three men would cross. Post war political plotting and subversive actions lead Japan down an unenviable path where foreign soldiers control part of Japan. The tensions between nations boil over leading to a final battle that would forever affect world politics. This book, second in a series, follows on from Project Z: air war japan 1946.
