David R. Higgins

Jagdpanther vs SU-100 David R. Higgins, 2014-04-20 As World War II in Europe reached its end, armour development and doctrine had experienced several years of massively accelerated change, especially within the crucible of the Eastern Front. The German Jagdpanther and Soviet SU-100, both turretless tank-destroyer designs based on a 'traditional' turret-tank chassis, were the culminating examples of how the progression of experience, resources and time constraints produced vehicles that were well suited for roles of defence and offence, respectively. The Jagdpanther represented a well-balanced solution and an excellent use of limited resources, while the SU-100 was a natural progression of the SU-85, where numbers produced compensated for rudimentary construction, poor crew comfort and limited optics.

Jagdpanther Tank Destroyer Dennis Oliver, 2017-11-30 “First class illustration and a very effective text overview . . . covers the development, on the Panther chassis, of a very effective tank destroyer.”— Firetrench Combining the destructive firepower of the 88mm gun with the outstanding mobility of the Panther series, the Jagdpanther is quite probably the best-known tank destroyer of the Second World War. In the vehicle’s first action on 30 July 1944, three Jagdpanthers managed to destroy eleven British tanks in a vicious two-minute fire fight near the village of Les Loges in Normandy, cementing the Jagdpanther’s reputation as a potent tank killer. In his fifth book in the TankCraft series, Dennis Oliver uses contemporary photographs and meticulously researched, superbly presented color and monochrome illustrations to tell the story of these heavy self-propelled antitank guns and the units which operated them in the German defense of the Western Front. As with

all the books in the TankCraft series, a large part of this work showcases available model kits and aftermarket products, complemented by a gallery of expertly constructed and painted models. Technical details as well as modifications introduced during production and in the field are also explained giving the modeler all the information and knowledge required. "Really interesting concept to combine historical, technical and modeling content in one book. Nicely illustrated . . . As a first Jagdpanther book for modelers seeking an economical source on models, accessories and paint schemes, this is valuable... Highly Recommended for Beginner to Intermediate builders."—AMPS

Jagdpanther Andrea Leandroer, 2008-04 Probably the finest Tank destroyer built during the WWII, the Jagdpanther came as an unpleasant surprise to the Allies and it was only thanks to the allied bomber offensive that the industrial firm Alkett didn't manage to produce enough Jagdpanthers to meet the demand. Jagdpanther designs followed on from the more lightly armored Panzerjager designs which took an anti-tank gun and mounted it on top of a tank chassis with supplementary armor fitted around the gun crew. Without the complexity of the rotating turret, Jagdpanzer designs could be quickly produced which was important in supplying fighting vehicles to the Russian front. However in lacking a turret the Jagdpanzers were more limited in use. Generally they were used as a second line or reserve in the attack or to form a defensive line. Which units used the Jagdpanther? What were its drawbacks? How was it modified? What colors were used in camouflage? These questions and many more are answered in this first release of our new Tech series.

Jagdpanther Krzysztof Mucha, 2020-04-19 Sd.Kfz. 173 Jagdpanther is a German tank destroyer developed by Krupp and Daimler-Benz. The order was placed in August 1943

and the vehicle entered service in the first months of 1944. It was armed with a very effective antitank tank gun. PaK 43 cal. 88 mm. The destroyer's combat compartment was armoured with 40 to 100 mm thick (front plate) armor plates. From January 1944, 415 pieces were produced (at the MIAG, MNH and MBA factories). The vehicle was based on the chassis of the Panther Ausf. G, but it didn't have as many technical problems as the mentioned tank. Due to the favorable power-to-weight ratio, Jagdpanther had good performance and maneuverability. Together with a powerful cannon, which was able to destroy any allied armored vehicle that time, it made it an extremely effective and dangerous destroyer. Vehicles were used by independent tank destroyer battalions. Jagdpanthers debuted in Normandy in 1944 (within 555th and 654th Panzerjagerabteilung), achieving great successes. Also during the offensive in the Ardennes, the Allies took a toll on them. They appeared on the Eastern Front in the autumn of 1944, effectively fighting all Soviet armored guns and heavy tanks, including IS-2. The vehicle was produced in two main variants. The early version - designated as G1 - had a smaller yoke that was welded to the hull, a modified engine compartment from the Panther Ausf. A and two driver's visors. In the later version - G2 - the Panther Ausf. G engine compartment was used, one driver's visor and a larger yoke which was bolted to the front plate with screws. There were also many hybrid variants combining the features of both versions. Until September 1944, Jagdpanthers were covered with Zimmerit in the form of characteristic squares, and not the more popular snakes. Jagdpanthers proved to be the most effective German tank destroyers, but they appeared too late and in too few numbers to significantly influence the course of the war.

Jagdpanther Lukasz Gladysiak, Adam Rejmak, 2014-01-19 Self-propelled tank destroyers constituted an essential component of the Third Reich's armored arm. Vehicles, which were especially useful in defensive warfare, in which the German army found itself after losing strategic initiative on the Eastern Front in the summer 1943 and following the Allied landing in Italy and France, with time began to effectively compete in armored sub-units with classic tanks. One of the largest vehicles of that type was Jagdpanther Sd.Kfz. 173, based on the chassis of the famous Panther tank.

Jagdpanther Thomas L. Jentz,2005 Panzer Tracts No. 9-3 - *¿Jagdpanther¿* - Panzerjaeger Panther (8.8 cm Pak) (Sd.Kfz.173) Ausf.G1 und G2 - We spent hundreds of hours accurately measuring survivors and over a thousand hours drawing at full-scale to create as-built drawings for the first time - accurate to the same tight tolerances demanded of the original assembly firms. Hundreds of research hours went into finding the numerous previously unnoticed modifications. Therefore, we have selected the unique approach of using 1/10th scale drawings to illustrate the smallest details, while six-view (including right side and belly) 1/35th scale drawings are still used for the complete Jagdpanther. We also created *¿flat-plane¿* drawings of many components to aid modelers make accurate parts that are hard to replicate when only drawn at angle. This book is also loaded with information on the development history, production, unit organization, issue, tactics, and wartime reports from front-line units. This 92 page book is heavily illustrated with over 200 scale drawings and 45 clear/rare large-format photos.

Jagdpanzer IV - German Army and Waffen-SS Tank Destroyers Dennis Oliver,2020-08-31 Combining the destructive firepower of the 75mm gun with the mobility of the Pzkw IV medium tank , the Jagdpanzer IV was quite possibly the most effective

tank destroyer of the Second World War. From early 1944 these vehicles were allocated to the anti-tank battalions of Panzer and Panzergrenadier divisions and saw action in Normandy, the Ardennes and the final battles in Germany. In his latest book in the TankCraft series, Dennis Oliver uses contemporary photographs and meticulously researched, superbly presented color and monochrome illustrations to tell the story of these self-propelled anti-tank guns and the units which operated them in the German defense of the Western Front. Panther, 2017

Panzers on the Vistula Hans Schäufler, 2018-10-30 This WWII memoir of a Nazi officer is one of the most revealing firsthand accounts of the German retreat on the Eastern Front. A second lieutenant of the 4th Panzer division, Hans Schäufler commanded a Jagdpanther tank destroyer in rearguard actions against the Red Army in East Prussia in 1945. Then, as an infantryman, he took part in the doomed defense of Danzig before escaping across the Baltic in a small boat. His personal story offers a rare glimpse into the chaos and suffering endured by tens thousands of soldiers and civilians during the collapse of the Third Reich in the east. Along with vivid descriptions of the appalling conditions in Danzig and the fear and panic that gripped the city, Schäufler's account provides valuable insight into the German army's tactics as they fell back before the

Soviet advance. While acute shortages of men, equipment, ammunition and fuel crippled the defense, the soldiers went on fighting for a lost cause in the face of certain defeat.

Normandy 1944 Niklas Zetterling, 2019-12-19 A revised and updated single-source reference book accurately detailing the German field forces employed in Normandy in 1944 and their losses. In this book, military historian Dr. Niklas Zetterling provides a sobering analysis of the subject matter and debunks a number of popular myths concerning the Normandy campaign—the effectiveness of Allied air power; the preferential treatment of Waffen-SS formations in comparison to their army counterparts; etc. He supports his text with exhaustive footnoting and provides an organizational chart for most of the formations covered in the book. Also included are numerous organizational diagrams, charts, tables, and graphs. “A valuable reference for anyone seriously interested in the battle for Normandy.” —The NYMAS Review

Heavy Jagdpanzer Walter J. Spielberger, Hilary L. Doyle, Thomas L. Jentz, 2007 This volume in the series presents the Wehrmacht's heavy tank destroyers: Ferdinand, Jagdpanther and Jagdtiger with previously unpublished photos and action reports.

"The Panther." h. j. s Anderton, 1933

Blood and Steel Donald E. Graves, 2013-11-30 Ordered by Hitler 'to hold, or to die' and to fight 'to the last grenade and round', the German army was a formidable opponent during the 1944 Normandy campaign. This book depicts the experience of that army in Normandy through its own records and documentation.??Blood and Steel, The Wehrmacht Archive : Normandy 1944 is an informative and colourful collection of translated original orders, diaries, letters, after action reports, and even jokes, as well as Allied technical

evaluations of German weapons, vehicles and equipment and transcripts of prisoner of war interrogations. The translations also feature comments from wartime Allied intelligence officers which provide an insight into how the German army was regarded by its opponents at the time.??As you read the landser''s letters to wives and families in Germany, his forbidden diaries, his gripes about food, officers, and shortages of just about everything, the daily life of the German soldier in the long and bloody summer of 1944 will come to life. You will also learn from official documents about his superiors' efforts to cope with Allied air and artillery superiority, create new tactical methods for all arms and maintain discipline in the face of overwhelming odds with both exaggerated claims of miraculous new 'Vengeance Weapons' and threats of the ultimate sanction for desertion or surrender.

Panzer Gunner Bruno Friesen,2008-02-19 An insider's account of training and service in Nazi Germany's twenty-fifth Panzer Regiment during World War II. There are few memoirs available of German Panzer crews that focus on the climactic last 12 months of the war on the Eastern Front, 1944-45. What makes Bruno Friesen's account virtually unique is his family background: his parents came from a German-speaking Mennonite community in Ukraine, and were to all intents and purposes culturally German. To make matters even more complex, in 1924 his parents left the Ukraine for Canada, where Bruno was born. In March 1939 he and his brother Oscar found themselves on a ship bound for Bremerhaven in Germany. He barely spoke German, and had never been to Germany, nevertheless his father envisaged that a better life awaited them in the Third Reich. Needless to say, Bruno became caught up in the Second World War, and in 1942 was

drafted into the Wehrmacht. The author provides a full account of his family background, and how, through these unusual circumstances, he found himself a Canadian-born German soldier. The bulk of the book is a detailed account of the author's training, and his subsequent service with 25th Panzer Regiment, part of 7th Panzer Division. As the title suggests, Bruno Friesen served as a gunner aboard, initially, Panzer IVs, before crewing the lesser-known Jagdpanzer IV tank hunter. The author provides a fantastic amount of information about these two vehicles, and how the crews actually fought in battle with them. This kind of 'hands-on' detail has almost never been available before, particularly such extensive information concerning the characteristics and combat performance of the Jagdpanzer IV. Apart from providing a large fund of information about specific German tanks and their combat performance, the author writes in great detail about the combat the experienced on the Eastern Front, including tank battles in Rumania, spring 1944, Lithuania in the summer of 1944, and West Prussia during early 1945. If one wants to know how German tank crews fought the Soviets in the last year of the war, then this book provides an outstanding account, containing material simply not found elsewhere. The author closes his account by reflecting on his post-war efforts to return to Canada, which eventually succeeded in 1950, and his subsequent life there. This book is not just a critique of armored fighting vehicles and tank warfare, it is above all a very human story, told in a lively, conversational and fluid manner, and is a remarkable contribution to the literature of the Second World War.

Jagdpanzer Thomas Anderson, 2024-03-14 This highly illustrated title details the history of the Jagdpanzer, the self-propelled German tank destroyers introduced in the

second half of World War II. Throughout World War II all sides grappled with how to deal with the threat of enemy armour. The German Army had adopted the 3.7cm anti-tank gun in the inter-war years. However, it was already apparent that the towed weapons lacked firepower and more powerful weapons were introduced in 1942 and 1943. By 1942, hard-pressed Panzerjäger (anti-tank) units equipped with towed anti-tank weapons fighting on the Eastern Front increasingly sought assistance from StuG-equipped assault artillery units. By late 1943 the StuG was being issued to new tank destroyer units and at the same time a dedicated Jagdpanzer (hunting tank) was ordered, based on the chassis and running gear of the PzKpfw IV. This highly illustrated study by German armour expert Thomas Anderson uses archival material and after-action reports to describe the development of the Jagdpanzer, and the many variants built on other German tank chassis. It also covers in detail how Jagdpanzer units were organized as well as their operational experience on the battlefield.
