*Modelling the Jagdpanzer 38(t) 'Hetzer'* Gary Edmundson, 2012-03-20 In the second half of World War II the German Army faced numerically superior armoured forces on the Eastern and Western Fronts. In order to counter this threat, tank destroyer production was increased. One of these tank destroyers was the Jagdpanzer 38 (t), or 'Hetzer', which proved to be a successful design with over 2,500 being produced in the 14 months before the end of the war. This title provides all the information that AFV modellers will need to build variants of the Jagdpanzer 38 (t) 'Hetzer', including the Bergepanzer 38 (t) recovery vehicle. It also includes camouflage, paint schemes and markings.

*Hetzer - Jagdpanzer 38 Tank Destroyer* Dennis Oliver, 2021-08-04 By 1944 the German army was on the defensive on all fronts and Allied bombing was putting increasing pressure on the nation's industrial output. Since the earliest days of the war the Germans had experimented with mounting anti-tank weapons on obsolete chassis and one of the most successful of these would prove to be the Jagdpanzer 38, more often referred to today as the Hetzer. Small and unimposing the Hetzer's appearance belied its effectiveness. Armed with the powerful 7.5cm L/48 gun, the same weapon fitted to the Jagdpanzer IV, the Hetzer featured armour sloped armour plates of up to 60mm thickness and was capable of a top speed of 42 kilometres per hour. Almost 3,000 examples were assembled and its low cost and ease of production meant that it was Germany's most important tank killer of the late war period. In his latest book in the TankCraft series Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Hetzer tank destroyers and the units of the German Army and Waffen-SS that operated them during the last months of the Second World war. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of these historic tanks.

**Hetzer & G-13** George Parada, Robert Wroblewski, Stefan Draminski, Mike Koenig, 2009-12-15 \* Includes free decals and masking foil Highly detailed publication covering the World War II German tank destroyers, the Hetzer and the G-13. The Hetzer (baiter), was a German light tank destroyer of the Second World War based on a modified prewar Czechoslovakian Panzer 38(t) chassis. It was intended to be more cost-effective than the much more ambitious Jagdpanther and Jagdtiger designs of the same period. Using a proven chassis, it avoided the mechanical problems of the larger armored vehicles. Containing dozens of archive black and white and color photos, including both close-up and walk-around shots, as well as color artwork profiles, this is an ideal reference for both the enthusiast and modeler, with masking foil included. About the Series Photosniper is a classic series of highly illustrated photo books on the best machines of war, creating, with numerous images, a close-up, walk-around view for each aircraft or vehicle. With emphasis on the key features of each machine, including their variations, artwork, markings, insignia and modifications, customizing and creating a model could not be easier. Includes a free decal sheet.

*Hitler's Light Panzers at War* Paul Thomas,2015-02-28 Hitler's Light Panzers at War is a highly illustrated record of the German light tank from its beginnings in the 1930s to the key battles it fought in Poland, France, North Africa, Russia and North Western Europe. The book analyses the development of the light Panzer, which ranged from the Panzer I, II and the Czech built Panzer 35 & 38t. It describes how the Germans carefully utilized the development of these light machines for war, and depicts how these tanks were adapted and up-gunned to face the ever-increasing enemy threat.??Using 250 rare and unpublished photographs together with detailed captions and accompanying text, Hitler's Light Panzers At War provides a unique insight into the many

variants that saw action on the battlefield. It provides a vivid account of light Panzer operational deployment from the early Blitzkrieg campaigns to the final demise of the Nazi war machine.

**Hitler's Light Tanks** Paul Thomas,2019-10-30 This fully illustrated WWII history examines the varieties of German light tanks and their usage throughout the conflict with rare wartime photographs. At the outbreak of the Second World War, Hitler's Wehrmacht led the way in armored warfare as blitzkriegs overwhelmed Poland and North West Europe. The contribution of light tanks such as Panzers I, II and 35(t) was critical. As the war spread to the Balkans, north Africa and the invasion of Russia, German engineers modified existing light tanks and developed new models. These included tank destroyers such as the Marder III Panzerjäger, SdKfz 138/1 and 139. There were anti-aircraft variants, including the Flakpanzer 38(t), and reconnaissance tanks such as the SdKfz 140/1 and the Aufklarungspanzer 38(t). This superbly illustrated book gives a comprehensive overview of the multitude of German light tanks that came into service. With the text and captions providing technical data, the images show this formidable array of fighting vehicles in action across the theatres of war.

*Pakwagen SDKFZ 234/3 and 234/4 Heavy Armoured Cars* Dennis Oliver,2022-10-24 ...squeezes a lot of useful information into a modest 64 pages and is a useful addition to any library of German armored cars. — War Wheels Experience in the Polish and French campaigns had convinced the German high command of the value of fast-moving, armed reconnaissance vehicles. But it was realised that many of the early designs were too lightly-armed and development of a heavy eight-wheeled prototype resulted in the Sdkfz 234 series of armored cars, the first of which entered service in late 1943. Built by the firm of Büssing-NAG, these sturdy and reliable vehicles were gradually up-armed and served in the infantry support role and eventually as tank killers, largely as the result of Hitler's desperation to arm as many vehicles as possible with anti-tank weapons. Drawing on official documentation and unit histories Dennis investigates the formations that operated these vehicles and uses archive photos and extensively researched color illustrations to examine the markings, camouflage and technical aspects of the Sdkfz 234/2, 234/3 and 234/4 armored cars that served on the Western and Eastern Fronts in the last months of the war. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeller needs to recreate an accurate representation of these historic vehicles.

*German Self-Propelled Artillery Guns of the Second World War* Craig Moore,2019-03-19 • One of the few books that explores the design and deployment of German artillery self-propelled guns (SPGs) to support tanks and infantry during the Second World War • A great reference book for military modellers, historians and tank wargamers interested in German SPGs • A comprehensive guide to German SPGs between 1939 and 1945 in one volume for the very first time, including previously unpublished information on the little-known Hummel-Wespe proving that at least twelve units were built • Authentic camouflage suggestions for military modellers A single towed artillery gun required a team of six horses and nine men. During the Second World War, German engineers mounted an artillery gun on top of a tank chassis; this new technology reduced the amount of valuable war resources as self-propelled guns only required a four- or five-man crew. They could also be made ready to fire more rapidly. German Self-Propelled Artillery Guns of the Second World War covers the development and use of this new weapon between 1939 and 1945. One type was successfully deployed in the invasion of France in 1940 and more were used on the Eastern Front against Soviet forces from 1941 until the end of the war. The 'Desert Fox' (Ewin Rommel) demanded artillery guns that could keep up

with his panzers in North Africa. He was sent 15-cm howitzers mounted on top of Panzer II tank chassis' and captured French Army Lorraine 37L-tracked armoured supply vehicles. Rommel's forces in northern France were equipped with a variety of new self-propelled guns, which were used against the Allies on the beaches of Normandy during D-Day in 1944. • Includes 81 colour photographs

**Panther Medium Tank** Dennis Oliver,2022-03-15 In July 1943 the German army launched what was to be its last major offensive on Soviet soil. Codenamed Operation Citadel, the attack had initially been scheduled to commence in May but was postponed by Hitler on a number of occasions to allow the divisions in the East to be reinforced and to ensure that the new Panther tanks could be deployed. In the fifth book on the Panther in this series Dennis Oliver examines the first vehicles that left the assembly plants to go into service against the Red Army as part of Operation Citadel and the units that arrived in the late summer and early autumn of 1943. In addition to archive photographs and painstakingly researched, exquisitely presented color illustrations, a large part of this book showcases available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeller needs to recreate an accurate representation of the Panther tanks that fought in the East in 1943.

**Captured Panzers** Marek Jaszcolt,Arkadisuz Wrobel,2014-04-19 A big decal sheet with 1:72, 1:48 and 1:35 markings for no less than 16 German armored fighting vehicles captured by Allied troops and used against their former owners. The decal sheet was printed by Cartograf. Each painting scheme is depicted on beautifully drawn color profile and described in the 18 page guidebook with English and Polish text. The authors selected the following vehicles: - Pz.Kpfw. II Ausf. F of the 1st Ranger Battalion, Tunisia, spring 1943, - Sd.Kfz. 222 of No. 2 ACC, North Africa, 1943, - Jagdpanzer 38(t) Chwat, Warsaw, Poland, August 1944, - Pz.Kpfw. V Panther Ausf. J of the 5th Independent Self-Propelled Artillery Squadron, 6th Infantry Division, Poland, May 1945.

**Panzerjaeger** Thomas L. Jentz,2005-01-01 Panzer Tracts No. 7-2 - Panzerjaeger (7.62 cm F.K.(r) auf gp. Sfl. to 7.5 cm Pak 40 Sfl.) Marder I, II, and 38T We spent hundreds of hours accurately measuring survivors and over a thousand hours drawing at full-scale to create as-built drawings for the first time - accurate to the same tight tolerances demanded of the original assembly firms. In our 35-year search for original records (created by those responsible for the designing, producing, and using these Panzerjaeger), we have uncovered the real facts on their names, production, modification, issue, organization, and frontline employment. Hundreds of research hours went into finding previously unnoticed modifications. This book features new ultra-accurate, as-built 1/35th scale

drawings of the Befehlsjaeger 38 Ausf.M, Panzerjaeger 38 Ausf.M, Panzerjaeger 38 Ausf.H, Panzerjaeger II, and Pz.Sfl.II. This 96 page book is illustrated with 23 scale drawings and 87 clear/rare large-format photos.

**M10 Tank Destroyer vs StuG III Assault Gun** Steven J. Zaloga,2013-08-20 The Allies' M10 Tank Destroyer and the Germans' Sturmgeschütz (StuG) III were the unsung workhorses of the northwest European battlefields of 1944–45. While their mission was not principally fighting one another, their widespread use ensured their frequent encounters, from the Normandy Bocage, to the rubble-strewn streets of Aachen. The StuG III was the quintessential assault gun, a low-slung, heavily armoured, turret-less vehicle intended to provide direct fire support for infantry formations, whilst the M10 3in Gun Motor Carriage was originally developed as a tank destroyer. However, by 1944 the 3in gun proved ineffectual against the most thickly armored German tanks, and was consequently relegated to infantry support too. Widely deployed in roles their designers had not envisaged, these two armoured fighting vehicles clashed repeatedly during the 11-month campaign, which saw the Allies advance from Normandy to the heart of the Reich. Fully illustrated with specially commissioned artwork, this is the story of their confrontation at the height of World War II.

**Hitler's Tank Destroyers** Paul Thomas,2017-10-30 This WWII pictorial history of Nazi anti-tank vehicles illustrates the Germans' ever-increasing need for defense against Allied armor. During World War II, combatants on both sides developed increasingly effective armored vehicles and tactics. The German military's answer to American Shermans and British Cruisers was to create dedicated anti-tank vehicles such as the Panzerjger I, Sturmgeschütz, Marders, Nashorn. Hetzer, Jagdpanzer, Elefant, Jagdtiger IV and Jagdpanther. Fully illustrated with rare wartime photographs, Hitler's Tank Destroyers covers the each of these models, detailing their development and technology throughout the war. As the war progressed, larger and more powerful tank destroyers entered the battlefield. Due the overwhelming enemy opposition, they were compelled to not only attack armor, but also support ground troops. This comprehensive account covers all the Nazis mobile anti-tank vehicles in words and images.
