Geospatial Intelligence: Concepts, Methodologies, Tools, and Applications

Management Association, Information Resources,2019-03-01 Decision makers, such as government officials, need to better understand human activity in order to make informed decisions. With the ability to measure and explore geographic space through the use of geospatial intelligence data sources including imagery and mapping data, they are better able to measure factors affecting the human population. As a broad field of study, geospatial research has applications in a variety of fields including military science, environmental science, civil engineering, and space exploration. Geospatial Intelligence: Concepts, Methodologies, Tools, and Applications explores multidisciplinary applications of geographic information systems to describe, assess, and visually depict physical features and to gather data, information, and knowledge regarding human activity. Highlighting a range of topics such as geovisualization, spatial analysis, and landscape mapping, this multi-volume book is ideally designed for data scientists, engineers, government agencies, researchers, and graduate-level students in GIS programs.

Handbook of Research on Methods and Tools for Assessing Cultural Landscape Adaptation Rosa, Isabel de Sousa,Lopes, Joana Corte,Ribeiro, Ricardo,Mendes, Ana,2018-06-22 In a globalizing and expanding world, the need for research centered on

analysis, representation, and management of landscape components has become critical. By providing development strategies that promote resilient relations, this book promotes more sustainable and cultural approaches for territorial construction. The Handbook of Research on Methods and Tools for Assessing Cultural Landscape Adaptation provides emerging research on the cultural relationships between a community and the ecological system in which they live. This book highlights important topics such as adaptive strategies, ecosystem services, and operative methods that explore the expanding aspects of territorial transformation in response to human activities. This publication is an important resource for academicians, graduate students, engineers, and researchers seeking a comprehensive collection of research focused on the social and ecological components in territory development.

The book will be produced with the full co-operation of JCB, who are likely to take approx 2,000 copies to use for promotional activity to celebrate the company's 70th anniversary in October 2015 (a year of celebrations is planned running until October 2016). JCB has an extensive archive from which material will be drawn for use in the book, and it is envisaged that the 'project vehicle' will be a 'classic'
