Karl Heinrich Tschampel

Hitler's Final Fortress Richard Hargreaves,2015-04-01 In early 1945, the Red Army plunged into the Third Reich from the east, rolling up territory and crushing virtually everything in its path, with one exception: the city of Breslau, which Hitler had declared a fortress-city, to be defended to the death. This book examines in detail the notorious four-month siege of Breslau. • The first full-length English-language account of the bloody siege • Chronicles the bitter struggle as the Red Army encircled Breslau and eventually pillaged the city, taking savage retribution on the survivors • Details the brutal methods used by the city's Nazi leaders to keep German troops fighting and maintain order

New Tourism Ventures Dimitri Tassiopoulos,2008 An entrepreneurial and managerial approach. Continual increases in wealth and leisure time have given a sharp rise to tourism, which resulted in the rapid development of tourism - related ventures such as hotels, bed and breakfast accommodation, travel agencies, restaurants, theme parks, event companies, resorts, tourist guides and tour operators, to mention a few. New Tourism Ventures: An Entrepreneurial and Managerial Approach provides a definitive grounding of how to create and manage such tourism ventures. It takes an entrepreneurial and managerial approach to the subject, underpinning the various concepts associated with entrepreneurship and demonstrating the linkages of the subject with the tourism economy within the context of international best practice and research.

Microcosm Norman Davies,Roger Moorhouse,2011-12-31 The story of Central Europe is anything but simple. As the region located between East and West, it has always been endowed with a rich variety of migrants, and has repeatedly been the scene of nomadic invasions, mixed settlements and military conquests. In order to present a portrait of Central Europe, Norman Davies and Roger Moorhouse have made a case study of one of its most colourful cities, the former German Breslau, which became the Polish Wroclaw after the Second World War. The traditional capital of the province of Silesia rose to prominence a thousand years ago as a trading centre and bishopric in Piast Poland. It became the second city of the kingdom of Bohemia, a major municipality of the Habsburg lands, and then a Residenzstadt of the kingdom of Prussia. The third largest city of nineteenth-century Germany, its population reached one million before the bitter siege by the Soviet Army in 1945 wrought almost total destruction. Since then Wroclaw has risen from the ruins of war and is once again a thriving regional centre. The history of Silesia's main city is more than a fascinating tale in its own right. It embodies all the experiences which have made Central Europe what it is - a rich mixture of nationalities and cultures; the scene of German settlement and of the reflux of the Slavs; a Jewish presence of exceptional distinction; a turbulent succession of imperial rulers; and the shattering exposure to both Nazis and Stalinists. In short, it is a Central European microcosm.

Is Inequality Harmful for Growth? Torsten Persson,1993

Polarization, Politics, and Property Rights Philip Keefer,Stephen F. Knack,2000 One strand of research argues that polarized societies find it difficult to reach political consensus on appropriate responses to crises. Another strand focuses on redistribution, asking whether income inequality stifles growth by increasing political incentives to redistribute. Which is right?

Methodology of History Jerzy Topolski,1976

The Humanities in Architectural Design Soumyen Bandyopadhyay,Jane Lomholt,Nicholas Temple,Renée Tobe,2010-02-25 Offering an in-depth consideration of the impact which humanities have had on the processes of architecture and design, this book asks how we can restore the traditional dialogue between intellectual enquiry in the humanities and design creativity. Written by leading academics in the fields of history, theory and philosophy of design, these essays draw profound meanings from cultural practices and beliefs. These are as diverse as the designs they inspire and include religious, mythic, poetic, political, and philosophical references. This timely and important book is not a benign reflection on humanities' role in architectural design but a direct response to the increased marginalization of humanities in a technology driven world. The prioritization of technology leaves critical questions unanswered about the relationships between information and knowledge, transcription and translation, and how emerging technologies can usefully contribute to a deeper understanding of our design culture.
