BattleTech: Forever Faithful Blaine Lee Pardoe, 2019-02-23 SEMPER FIDELIS In the year 3060, the reborn Star League has destroyed Clan Smoke Jaguar, conquered their home world Huntress, and scattered the few remaining Jaguar warriors to the winds. Now the League seeks to end the Clan invasion for good by using former Smoke Jaguars against their own people. Meanwhile, two bitter enemies seek to salvage a future for the last Jaguars in existence: Trent, who betrayed his wayward Clan to help them regain their honor, and Paul Moon, a disgraced warrior torn between his pledged loyalty to the Star League and a duty to the Smoke Jaguar civilization he was born to protect. But power-hungry predators lurk in Clan space, waiting for the right time to strike the vulnerable Star League forces. And to the victor will go the spoils: the priceless artifacts of a destroyed Clan and the sacred genetics of the final generation of Smoke Jaguar warriors. Trent and Paul Moon must fight tooth and nail against would-be conquerors to save the soul of the surviving Jaguar people before they are consigned to the annals of history. But will their divergent plans tear the survivors apart, or lead them toward freedom?

BattleTech: Jaguar's Leap Reed Bishop, 2022-08-26 FIVE AGAINST ONE... It was supposed to be just another exercise—a Star of light 'Mechs against one assault 'Mech. Jackson is a ristar cadet in Clan Smoke Jaguar, renowned—and envied—for never losing a battle. The five cadets beneath him in the rankings plan to hand him his first defeat. But the training goes terribly wrong, and before the day is over, there are winners and losers—and one cadet will not survive the day. That training exercise sets in motion a chain of actions that encompasses both events that occurred decades earlier, and those yet to

come. Now a full MechWarrior, Star Captain Jackson searches for answers—both about his past, and what had happened that fateful day. But what he learns are secrets that threaten to upend his entire life—and make him reconsider what it means to be a Smoke Jaguar...

BattleTech: No Substitute for Victory Blaine Lee Pardoe, 2022-01-30 TOO OLD TO FIGHT, TOO YOUNG TO DIE... For nearly a decade, the relentless warriors of Clan Jade Falcon have held the world of Jangso in the A Place system, using it as a training ground for their next generation of warriors. When the planet's garrison departs to join other Falcon forces in the fight for Terra, the Clans' ultimate prize, aging Star Commander Hasara is ordered to remain behind. Deemed too old to be worthy of going to Terra, he still embraces his honor, and vows to safeguard the planet and all of the cadets too young to join the fight. The Lyran Commonwealth, still stinging from losing Jangso to the Falcons, resolves to exploit their absence by taking back the planet before the Falcons can return. Armed with military intelligence and smuggled BattleMechs, Lyran natives on Jangso launch critical strikes at Hasara, his ex-MechWarrior partner, and the Falcon cadets under their wings, luring them into a trap. But the Lyrans have greatly underestimated the Falcons' indomitable spirit and the lengths they will go to when driven to the brink of desperation. As Hasara wrestles with his own sense of honor, and faces dwindling morale and diminishing returns against troops seeking to exterminate him and his cadets, he must prove there is still enough fight left in his old bones to secure a victory for the future of his Clan.

BattleTech: Slack Tide Jason Schmetzer, Philip A. Lee, 2020-02-21 PEACE MAY SELL...BUT WHAT IF NO ONE'S BUYING? On 21 May 3052, the seemingly unstoppable military

juggernaut of the invading Clans was defeated in a pitched campaign on the quiet world of Tukayyid. This astonishing victory bought the weary armies of the Inner Sphere a fifteen-year stay before the invasion can resume. But despite the truce, the fire driving the Clans' centuries-long quest to conquer Terra, the birthplace of humankind, and rebuild Inner Sphere civilization in their warmongering image has not been extinguished. Conflict still rages above the truce line, and the Clans are biding their time until the tide of war can surge up and flood the Inner Sphere once more. Slack Tide collects nine stories that chronicle the life-and-death struggles still being waged in the wake of Tukayyid's so-called peace. Fan-favorite authors such as Jason Hansa, Philip A. Lee, and Craig A. Reed, Jr. spin tales of undercover operatives seeking to gain the secrets of Clan BattleMech technology, Inner Sphere MechWarriors attempting dangerous escapes from Clan-controlled planets, and mercenaries fighting to protect the only things that truly matter to them—theirselfs and their loved ones. The Clans' invasion may have been temporarily halted, but the true battles for the future of the Inner Sphere have only just begun...

It not only describes the nature of conservation but also provides an ethical framework to which the conservation of objects can be related. Drawing on case studies of well-known objects such as the body of Lindow Man and the Statue of Liberty it addresses the following issues: * perception, judgement and learning * reasons for preserving the past * the nature and history of conservation * conservation ethics * recording, investigating, cleaning objects * stabilisation and restoration * preventive conservation * decision making and responsibilities.

Histories of Conservation and Art History in Modern Europe Sven Dupré, Jenny Boulboulle, 2022-03-14 This book traces the development of scientific conservation and technical art history. It takes as its starting point the final years of the nineteenth century, which saw the establishment of the first museum laboratory in Berlin, and ground-breaking international conferences on art history and conservation held in pre-World War I Germany. It follows the history of conservation and art history until the 1940s when, from the ruins of World War II, new institutions such as the Istituto Centrale del Restauro emerged, which would shape the post-war art and conservation world. The book will be of interest to scholars working in art history, conservation history, historiography, and history of science and humanities.

Organophosphorus Chemistry David W Allen,John C Tebby,2007-10-31

Organophosphorus Chemistry provides a comprehensive annual review of the literature. Coverage includes phosphines and their chalcogenides, phosphonium salts, low coordination number phosphorus compounds, penta- and hexa-coordinated compounds, tervalent phosphorus acids, nucleotides and nucleic acids, ylides and related compounds,

and phosphazenes. The series will be of value to research workers in universities, government and industrial research organisations, whose work involves the use of organophosphorus compounds. It provides a concise but comprehensive survey of a vast field of study with a wide variety of applications, enabling the reader to rapidly keep abreast of the latest developments in their specialist areas. Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

The Smell of Risk Hsuan L. Hsu, 2020-12-15 A timely exploration of how odor seeps into structural inequality Our sense of smell is a uniquely visceral—and personal—form of

experience. As Hsuan L. Hsu points out, smell has long been spurned by Western aesthetics as a lesser sense for its qualities of subjectivity, volatility, and materiality. But it is these very qualities that make olfaction a vital tool for sensing and staging environmental risk and inequality. Unlike the other senses, smell extends across space and reaches into our bodies. Hsu traces how writers, artists, and activists have deployed these embodied, biochemical qualities of smell in their efforts to critique and reshape modernity's olfactory disparities. The *Smell of Risk* outlines the many ways that our differentiated atmospheres unevenly distribute environmental risk. Reading everything from nineteenth-century detective fiction and naturalist novels to contemporary performance art and memoir, Hsu takes up modernity's differentiated atmospheres as a subject worth sniffing out. From the industrial revolution to current-day environmental crises, Hsu uses ecocriticism, geography, and critical race studies to, for example, explore Latinx communities exposed to freeway exhaust and pesticides, Asian diasporic artists' response to racialized discourse about Asiatic odors, and the devastation settler colonialism has reaped on Indigenous smellscape. In each instance, Hsu demonstrates the violence that air maintenance, control, and conditioning enacts on the poor and the marginalized. From nineteenth-century miasma theory to the synthetic chemicals that pervade twenty-first century air, Hsu takes smell at face value to offer an evocative retelling of urbanization, public health, and environmental violence.

Annual Reports in Medicinal Chemistry, 1996-12-02 *Advances in Medicinal Chemistry* provides timely and critical reviews of important topics in medicinal chemistry together with an emphasis on emerging topics in the biological sciences, which are expected to provide

the basis for entirely new future therapies.
