Business Organizations William K. Sjoström, 2019-09-13 *Business Organizations: A Transactional Approach*, Third Edition, by William K. Sjoström, Jr., teaches from a transactional perspective and shows how the legal concepts are written in the real world. It has numerous actual provisions from the various documents corporate lawyers draft and review, so that students gain a sense for what corporate lawyers do in practice. With content selected through a corporate lawyer lens, and emphasis on real-world provisions, this is the only Business Organizations casebook on the market allowing students to work with complete transactional documents (e.g., limited liability partnership agreements, LLC operating agreements, certificates of designation, warrant agreements, and shareholders' agreements). Featuring numerous exercises, designed to reinforce the covered material and help students develop the planning and problem-solving skills of a corporate lawyer as well as expose students to the documents and issues at the heart of a transactional practice, the book also contains more narrative and fewer cases--legal concepts are covered in concise explanatory text instead of judicial opinions. New to the 3rd Edition: Expanded coverage of LLCs in light of their increasing importance Newer cases involving widely recognized companies (Priceline.com, Tesla) Updated and improved corporate documents Coverage of 2018 changes to federal income taxation of individuals and businesses Professors and students will benefit from: Straightforward text makes it easier to teach complicated concepts Numerous exercises make the book ideal for problem method teaching Practice-oriented--students exposed to real-world provisions and agreements Transaction-oriented--students get a sense for what corporate lawyers do Problem oriented--students get to repeatedly apply what they've learned

Transnational Television in Europe Jean K. Chalaby, 2009-02-19 Today transnational TV networks count among television's most prestigious brands and rank among Europe's leading TV channels. This is the first, dynamically told story of the extraordinary journey of transnational television in Europe from struggling origins to its present day boom. It is based in extensive research into the international television industry and makes full use of its author's remarkable access to leading industry figures, from Sky and Turner to Discovery and BBC World. The tale begins with a few cross-border TV channels, who fought hostile governments, faced antagonism from the broadcasting establishment and provoked the contempt of advertisers. But, Jean Chalaby argues, the planets came into alignment for pan-European television in the late 1990s, when a transnational shift in European broadcasting was produced. He shows how transnational television and globalization have transformed one another, and how transfrontier TV networks reflect - and help sustain - a global economic order in which the connection between national territory and patterns of production and distribution have broken down.

Mobile Marketing Alex Michael, Ben Salter, 2006-08-11 In the past 10 years mobile phones have gone from being high-end gadgets only the wealthy could afford to an essential accessory, now owned by a large portion of the population of the world. The integration of the Internet, mobility and communications at the device, service and transport level has created a new set of business opportunities. Mobile marketing has become a mainstream marketing tool and marketers must now identify and reach their mobile audience. This book is designed to teach marketers how to tap into this potential. Mobile Marketing is as different from traditional marketing as Internet marketing was, and this book outlines methods and techniques for: * Defining and implementing a wireless marketing strategy * Making sense of what can be a technically and commercially confusing industry * Providing a wealth of carefully chosen international cases and examples to demonstrate techniques in the real world Written by experienced practitioners with experience of advising major international companies on both strategy and individual campaigns in the mobile sector it is an essential guide and reference for professional marketers.

La Télé : un destin animé Pierre Faviez, 2010-08 En quelque trente ans, le public jeunesse a vu se développer pour lui une offre de programmes de plus en plus étoffée, spécialisée et segmentée. Une histoire qui débute avec Caliméro, qui culmine avec Dorothee et la vague de l'animation japonaise, qui se poursuit avec l'apparition de nouveaux diffuseurs sur câble et satellite. Une histoire mouvementée, pas si sereine que l'on pourrait le supposer, faite de concurrence, de critiques, d'audaces et de déconfitures, que Pierre Faviez retrace à travers un ouvrage qui ne manquera pas de toucher ceux qui ont gardé la nostalgie des mercredis devant leur poste de télé, mais aussi ceux qui aiment pénétrer dans les coulisses des chaînes, là où la lutte pour l'audience se fait âpre. Quels ont été les dessins animés phares de la jeunesse ? Pourquoi les productions nippones ont-elles connu un désamour de plus en plus fort, pour mieux revenir sur le devant de la scène ? Quels sont les grands pôles de productions de programmes destinés aux jeunes ? De Goldorak à Pokemon, en passant par l'apparition tonitruante des premières sitcoms françaises et la disparition de La Cinq, des dessins animés tombés dans les oubliettes de la télé à ceux qui continuent à soulever l'enthousiasme toutes générations confondues, une réjouissante immersion dans le monde, sucré et cruel, de la programmation jeunesse !

Walt Disney Shashi Ambaru, 2009 The great American film maker Walt Disney holds the record for the most Oscar awards won. His honours include the Legion d'Honneur in France, a special medal in 1935 from the League of Nations for creating Mickey Mouse, the Presidential Medal of Freedom in 1964 and an honoured place in the California Hall of Fame. He even had a minor planet named after him 4017 Disney! Read the exciting story of the man who created Mickey Mouse and Donald Duck and many unforgettable movies based on fairytales.

Screening Gender on Children's Television Dafna Lemish, 2010-04-05 *Screening Gender on Children's Television* offers readers insights into the transformations taking place in the presentation of gender portrayals in television productions aimed at younger audiences. It goes far beyond a critical analysis of the existing portrayals of gender and culture by sharing media professionals' action-oriented recommendations for change that would promote gender equity, social diversity and the wellbeing of children. Incorporating the author's interviews with 135 producers of children's television from 65 countries, this book discusses the role television plays in the lives of young people and, more specifically, in developing gender identity. It examines how gender images presented to children on television are intertwined with important existential and cultural concerns that occupy the social agenda worldwide, including the promotion of education for girls, prevention of HIV/AIDS and domestic violence and caring for 'neglected' boys who lack healthy masculine role models, as well as confronting the pressures of the beauty myth. *Screening Gender on Children's Television* also explores how children's television producers struggle to portray issues such as sex/sexuality and the preservation of local cultures in a profit-driven market which continually strives to reinforce gender segregation. The author documents pro-active attempts

by producers to advance social change, illustrating how television can serve to provide positive, empowering images for children around the world. Screening Gender on Children's Television is an accessible text which will appeal to a wide audience of media practitioners as well as students and scholars. It will be useful on a range of courses, including popular culture, gender, television and media studies. Researchers will also be interested in the breadth of this cross-cultural study and its interviewing methodology.

Cultural Barriers to the Success of Foreign Media Content Ulrike Rohn,2009 What media content attracts audiences across cultures and what does not? What does the cross-cultural audience demand depend on? The author takes a new approach to understanding cultural barriers to the success of foreign media content by analyzing the entry strategies of Time Warner, Disney, Viacom, News Corporation, and Bertelsmann with regard to China, India, and Japan in terms of their respective localization efforts. In-depth interviews with companies' representatives give an insight into how they view the need for locally-produced media in these countries. The author develops and employs the Lacuna and Universal Model that provides a new theoretical classification of reasons for the cross-cultural success and failure of media content, as well as the Vertical Barrier Chain that locates cultural barriers in the wider context of legal, political, and economic barriers to successful entry into foreign media markets.
