It seems an anonymous benefactor has vanished (along with his much-needed holiday donation), and Alice must find out what's going on before the homeless shelter has to close its doors to the poor forever. *The Critique of Digital Capitalism* Michael Betancourt, 2015 Anything that can be automated, will be. The magic that digital technology has brought us - self-driving cars, Bitcoin, high frequency trading, the internet of things, social networking, mass surveillance, the 2009 housing bubble - has not been considered from an ideological perspective. The Critique of Digital Capitalism identifies how digital technology has captured contemporary society in a reification of capitalist priorities, and also describes digital capitalism as an ideologically invisible framework that is realized in technology. Written as a series of articles between 2003 and 2015, the book provides a broad critical scope for understanding the inherent demands of capitalist protocols for expansion without constraint (regardless of social, legal or ethical limits) that are increasingly being realized as autonomous systems that are no longer dependent on human labor or oversight and implemented without social discussion of their impacts. The digital illusion of infinite resources, infinite production, and no costs appears as an end to scarcity, whereby digital production supposedly eliminates costs and makes everything equally available to everyone. This fantasy of production without consumption hides the physical costs and real-world impacts of these technologies. The critique introduced in this book develops from basic questions about how digital technologies directly change the structure of society: why is Digital Rights Management not only the dominant solution for distributing digital information, but also the only option being considered? During the burst of the Housing Bubble burst 2009, why were the immaterial commodities being traded of primary concern, but the actual physical assets and the impacts on the people living in them generally ignored? How do surveillance (pervasive monitoring) and agnotology (culturally induced ignorance or doubt, particularly the publication of inaccurate or misleading scientific data) coincide as mutually reinforcing technologies of control and restraint? If technology makes the assumptions of its society manifest as instrumentality - then what ideology is being realized in the form of the digital computer? This final question animates the critical framework this analysis proposes. Digital capitalism is a dramatically new configuration of the historical dynamics of production, labor and consumption that results in a new variant of historical capitalism. This contemporary, globalized network of production and distribution depends on digital capitalism's refusal of established social restraints: existing laws are an impediment to the transcendent aspects of digital technology. Its utopian claims mask its authoritarian result: the superficial objectivity of computer systems are supposed to replace established protections with machinic function - the uniform imposition of whatever ideology informs the design. However, machines are never impartial: they reify the ideologies they are built to enact. The critical analysis of capitalist ideologies as they become digital is essential to challenging this process. Contesting their domination depends on theoretical analysis. This critique challenges received ideas about the relationship between labor, commodity production and value, in the process demonstrating how the historical Marxist analysis depends on assumptions that are no longer valid. This book therefore provides a unique, critical toolset for the analysis of digital capitalist hegemonics.

*The Oxford Handbook of Synesthesia* Julia Simner, Edward M. Hubbard, 2018-10-23 Synesthesia is a fascinating phenomenon which has captured the imagination of scientists and artists alike. This title brings together a broad

body of knowledge about this condition into one definitive state-of-the-art handbook.

They say dogs are a man’s best friend. True! But what if that man’s girlfriend/boyfriend, wife/husband, or mother-in-law has a cat? Is that the end for him? Showalter offers hope for men everywhere in their quest to understand and love cats. In this intimate portrait of one man’s love for cats, you will learn the answers to burning questions such as: Why are they all aloof and weird and stuff?; They hate me, right?; and Is it true that they have nine lives?
