## **II-VI Semiconductor Materials and their Applications MariaC.**

Tamargo,2018-05-04 II-VI Semiconductor Materials and Their Applications deals with II-VI compound semiconductors and the status of the two areas of current optoelectronics applications: blue-green emitters and IR detectors.

Specifically, the growth, characterization, materials and device issues for these two applications are described. Emphasis is placed on the wide bandgap emitters where much progress has occurred recently. The book also presents new directions that have potential, future applications in optoelectronics for II-VI materials. In particular, it discusses the status of dilute magnetic semiconductors for magneto-optical and electromagnetic devices, nonlinear optical properties, photorefractive effects and new materials and physics phenomena, such as self-organized, low-dimensional structures. II\_VI

Semiconductor Materials and Their Applications is a valuable reference book for researchers in the field as well as a textbook for materials science and applied physics courses.

**Chinese Ghost Stories** Lafcadio Hearn,2012-02-21 Chinese Ghost Stories offers a selection of entertaining Chinese tales of the fantastical and paranormal. Author Lafcadio Hearn had a great affinity for the traditional ghost stories of China, and these stories clearly inspired him as he penned subsequent works. Set in richly atmospheric locales, these tales speak of heroic sacrifice, chilling horror, eerie beauty and otherworldly intervention. The six ghost stories include: The Soul of the Great Bell The Story of Ming Yi The Legend of Zhi Nu The Return of Yan Zhenjing The Tradition of the Tea Plant The Tale of the Porcelain God This completely reset and pinyin-converted edition of Hearn's classic work contains a new

foreword by Victoria Cass, which places the stories, their author, and his love for the strange and mysterious into perspective. If you're seeking insights into the traditional Chinese world of ghosts, goblins and demons--or just want to feel a chill run down your spine on a dark and lonely night--then this book is the perfect companion.

**Radiomics in Gastric Cancer** Bo Zhang, Damiano Caruso, 2023-12-28 Gastric cancer (GC) is one of the most common malignancies worldwide. It is particularly challenging due to common detection at the advanced stages of the diseases preventing potential therapeutic and treatment strategies for patients. Common forms of treatment include chemotherapy which has been found to improve the survival rate and overall quality of life for patients with unresectable, locally advanced or at the metastatic stages of the disease. However, chemotherapy has also proven to cause significant side effects in some patients. Lymphatic metastasis has been found to be common in gastric cancer patients. Lymph vascular invasion (LVI) has been identified to be associated to the infiltration of tumor cells in the arteries, veins or lymphatic vessels. This has been identified to prompt local recurrence and the distant metastasis of various tumors. This has led to the LVI status as an independent prognostic factor and studies have found the occurrence of pathological LVI is associated with gastric cancer progression and linked to poor clinical prognosis and low survival rate.
