Friendship Across the Seas Naoyuki Agawa, 2023-08-06 This Open Access book describes the history of the relationship between the Japan Maritime Self-Defense Force (JMSDF), the heir to the Imperial Japanese Navy (IJN), and the United States Navy (US Navy), with a focus on the individuals who helped build it. Former enemies who fought fiercely on the seas and in the air during the Pacific War, the two navies came to respect each other in action. Soon after the war, when the Cold War turned hot, they began to work together as allies, driven by their respective national interests. With the generous assistance of the US Navy, the JMSDF was established as its counterpart. Over the years, these two navies have gradually built strong ties. Individual officers and sailors on both sides overcame mixed feelings about their erstwhile foes to feel respect for and trust in each other. This was made possible by conducting countless joint exercises and operations at sea. US Navy leaders began to realize that this small maritime force, notwithstanding domestic political, constitutional, and legal limitations, does its job well, is reliable, and can be fully trusted. The JMSDF realized that, sharing common interests and values, there was no better navy in the Asia-Pacific region to ally with. Over seventy years of accumulated shared experiences have transformed this into perhaps the most successful navy-to-navy partnership in the world. The US-Japan maritime alliance today is anchored in this history. Numerous admirals, officers, and sailors of the two navies working together have greatly contributed to the stability and prosperity of the Asia-Pacific region for the past seven decades. This book is intended for readers interested in the history of US-Japan relations and for naval officers and sailors from the US and other countries. It is the author's

sincere desire that they read this book and appreciate the longstanding cooperation between the JMSDF and the US Navy.

External and Internal Factors Shaping the Japan Maritime Self-Defense Force (JMSDF) Shinji Tsukigi,1993 This thesis examines factors shaping the Japan Maritime Self-Defense Force (JMSDF). It focuses on issues concerning Japan's financial resources to improve the JMSDF in the future and the level of complementarity between the JMSDF and the U.S. Navy. The examination reveals that there is a high level of complementarity overall between the JMSDF and the U.S. Pacific Fleet. This relationship is most likely going to continue into the future. The JMSDF most likely will not to have the financial resources it will need to enhance its inventory much beyond its current force level because of the mounting pressure of other domestic budgetary needs and a lower expected Gross National Product (GNP) rate of growth. It is concluded that the future direction of the JMSDF will be that of keeping an effective complementary relationship with that of the U.S. Navy ... Japan Maritime Self-Defense Force.

Japan's Navy Peter J. Woolley, 2000 An examination of the development and potential of the Japanese navy in the context of the US-Japan alliance. It presents Japan's coming of age as a military - primarily naval - power in a series of case studies on sea-lane defence, minesweeping and participation in UN peacekeeping operations.

Sealane Defense Ted Shannon Wile, 1981 Japan's economy, the third largest in the world, is totally dependent on the sea lines of communication for the importation of 90 percent of its energy requirements and strategic metals and for over 70 percent of its food. Despite the importance of the sealanes to Japanese security, the Japanese Maritime Self Defense Force (JMSDF) remains incapable of protecting those sealanes against interdiction. Although the JMSDF is currently the seventh largest navy in the world, future expansion has been stymied by Japan's steadfast refusal to increase defense spending above one percent of the GNP. Long-range procurement plans focus on qualitative improvements with a primary emphasis on anti-submarine warfare, a strategy which could foreshadow a building program to enable the JMSDF to control the vital sea lanes. On the other hand, political and domestic constraints on a strong military indicate a continuing reliance on the United States for Japan's security. This study examines the factors affecting military decision-making in Japan, looks into the problems and realities of sealane defense and analyzes the future prospects for the JMSDF. (Author).

Defense Policy of Japan Maritime Self-Defense Force (JMSDF) in the Early 21st Century Mitsuhsa Mashiko, 1995 This thesis analyzes the defense policy of the Japan Maritime Self-Defense Force (JMSDF) in the early 21st century. The primary research question is 'Should the defense force structure of the JMSDF in the early 21st century remain the same as it has been in the last 10

years?' To answer this question, I made a brief analysis of current and future prospects for Japan and her neighboring countries in terms of their politics, diplomacy, economy and military. These countries included China, North and South Korea, Russia and the U.S. Finally, I evaluated the cost of baseline and alternative force structure. The alternative force structure may require some revision of current legal limitations and increased defense expenditures. Japan, however, should undertake this correction not only for her own security needs, but also to make a more equitable contribution to ensure the Japan-U.S. security arrangement viable in the coming decade.

Post-war Japan as a Sea Power Alessio Patalano, 2015-04-23 In Post-war Japan as a Sea Power, Alessio Patalano incorporates new, exclusive source material to develop an innovative approach to the study of post-war Japan as a military power. This archival-based history of Asia's most advanced navy, the Japanese Maritime Self-Defence Force (JMSDF), looks beyond the traditional perspective of viewing the modern Japanese military in light of the country's alliance with the US. The book places the institution in a historical context, analysing its imperial legacy and the role of Japan's shattering defeat in WWII in the post-war emergence of Japan as East Asia's 'sea power'.

India's Naval Strategy and Asian Security Anit Mukherjee, C. Raja Mohan, 2015-11-19 This book examines India's naval strategy within the context of Asian regional security. Amidst the intensifying geopolitical contestation in the waters of Asia, this book investigates the growing strategic salience of the Indian Navy. Delhi's expanding economic and military strength has generated a widespread debate on India's prospects for shaping the balance of power in Asia. This volume provides much needed texture to the abstract

debate on India's rise by focusing on the changing nature of India's maritime orientation, the recent evolution of its naval strategy, and its emerging defence diplomacy. In tracing the drift of the Navy from the margins of Delhi's national security consciousness to a central position, analysing the tension between its maritime possibilities and the continentalist mind set, and in examining the gap between the growing external demands for its security contributions and internal ambivalence, this volume offers rare insights into India's strategic direction at a critical moment in the nation's evolution. By examining the internal and external dimensions of the Indian naval future, both of which are in dynamic flux, the essays here help a deeper understanding of India's changing international possibilities and its impact on Asian and global security. This book will be of much interest to students of naval strategy, Asian politics, security studies and IR, in general.

BuNos! Disposition of World War II USN, USMC and USCG Aircraft Listed by Bureau Number Douglas E. Campbell, 2012-02-01 A snapshot in time. After thousands of hours of research and data entry over a 35-year period, the information on the disposition of some 25,000 US Navy, US Marine Corps and US Coast Guard aircraft needs to be published. These aircraft mainly represent those built and lost during World War II - between 7 December 1941 and 15 August 1945 - but this book also contains aircraft built before WWII that were lost during WWII or disposed of after WWII (lost during the Korean War, lost on training exercises, sold to private investors, currently located in museums and even some still proudly sitting as gate guards across the US, etc.).

The Tools of Owatatsumi Desmond Ball, Richard Tanter, 2015-01-21 Japan is

quintessentially by geography a maritime country. Maritime surveillance capabilities - underwater, shore-based and airborne - are critical to its national defence posture. This book describes and assesses these capabilities, with particular respect to the underwater segment, about which there is little strategic analysis in publicly available literature. Since the end of the Cold War, Chinese oceanographic and navy vessels have intruded into Japanese waters with increasing frequency, not counting their activities in disputed waters such as around the Senkaku (Diaoyu) Islands and Okinotorishima where China and Japan have overlapping territorial claims. These intrusions have increasingly involved warships, including submarines, sometimes acting quite aggressively. Japan maintains an extraordinary network of undersea hydrophone arrays, connected to shore-stations which are typically equipped with electronic intelligence (ELINT) systems, for monitoring, identifying and tracking submarine and surface traffic in its internal straits and surrounding seas. Some parts of this network are operated jointly with, and are of crucial importance to, the US Navy. Japan's superlative submarine detection capabilities would be of decisive advantage in any submarine engagement. But the relevant facilities are relatively vulnerable, which makes them very lucrative targets in any conflict. This introduces compelling escalatory dynamics, including the involvement of US forces and possible employment of nuclear options.

Naval Modernisation in Southeast Asia, Part Two Geoffrey Till,Collin Koh
Swee Lean,2017-09-18 This edited volume starts with an account of the submarine in naval warfare and moves on to review the nature and consequences of naval modernisation in Southeast Asia by considering their acquisition by the small and medium navies of the region. It explores the reasons for these navies taking on this very substantial and demanding challenge, the problems they are facing and the consequences of the deployment of submarines for regional stability. Given the backdrop of growing tensions over the South China Sea and increasing competition between the United States and China in the region, will the arrival of submarines in the area help or hinder the cause of peace? This volume will be of substantial interest not just to those interested in submarines and naval development but also to students and teachers concerned about the very volatile developing situation in and around the South China Sea.

Navies in the 21st Century Conrad Waters,2016-09-30 "A range of naval experts . . . build[s] a diverse and deeply-thought out picture of where maritime warfare is now and where it is likely to go."—Army Rumour Service
What is the purpose of navies in the modern world, and what types of warship does this require? This book tackles these questions by looking at naval

developments, both technological and operational, in the quarter century since the end of the Cold War. It provides the overall political and economic context, assesses significant naval operations from the first Gulf War to Russia's annexation of Crimea, reviews changes in the objectives and composition of the principal fleets, describes major design developments amongst the main warship types, and examines wider technological and operational developments, including naval aviation, shipbuilding and manning. "A high quality publication with a great many superb photographs. For those wishing to keep fully informed on world naval affairs, it is excellent value and strongly recommended."—Scuttlebutt "This new book follows the successful approach and format of the very popular naval annual Seaforth's World Naval Review. Under the same editor, a new team of specialists have been assembled to write authoritative articles in their particular fields of expertise. The absorbing text is fully supported by many outstanding images—Most Recommended."—Firetrench "Provides a most useful contextual analysis of the post-Cold War period, explaining how technological developments and a range of world events have variously shaped the fleets of today."—Warship

A Study of the Measures of Effectiveness for the JMSDF Aegis Destroyer in a Littoral, Air Defense Environment Hideto Ito, 1995 Maritime operations in a littoral area demand a fundamental change in the future defense build-up of the Japanese Maritime Self Defense Force (JMSDF). The anti-air warfare (AAW) capability of the JMSDF in the littoral area, especially against very low altitude anti-ship cruise missiles (ASCMs), should be improved. To achieve the required future air defense lethality, the JMSDF must optimize the resource allocation within a limited budget. Therefore, it is important to understand the essential elements of air defense lethality by the JMSDF Aegis

destroyer in order to improve their operational effectiveness. In this study, a measure of effectiveness (MOE) for Aegis lethality against an ASCM attack is defined as 'a denial area at an acceptable risk.' Using this MOE, spread sheet lethality models based on Aegis weapons characteristics, target detection range, reaction time, and ASCM speed, are developed and used to study several alternative improvements to Aegis.
