Crazy People in Court Judge Robert C. Coates, 2016-12-19 CRAZY PEOPLE IN COURT presents a Judge's look at the variety of interesting mental disorders and persons one finds in those "magnets of humanity", America's courtrooms. Shakespeare's Hamlet told his friend, "There are more things in heaven and earth than are dreamt of in your philosophy, Horatio." Similarly, there are stranger persona in Judge Coates' world than a reader may have experienced. This book is therefore an exploration, an adventure. And Judge Coates makes it fun - because, for Judge Coates, the serious business of justice is also great fun. Delightful! He has said: "My IQ is not high enough for me to get bored." Try out Sergeant Major Ninja. Or, Reefer Bob. Or Randorino who buried his dead mother in the back yard and collected her Social Security. Or the veteran who lost a fight with a police horse. Or, the genius attorney in "I Believe I'll Have a Drink." And kicking the book off, we find Judge Coates' own Story. Check it out.

A Court of Refuge Ginger Lerner-Wren, Rebecca A. Eckland, 2018-03-06 The story of America's first Mental Health Court as told by its presiding judge, Judge Ginger Lerner-Wren—from its inception in 1997 to its implementation in over 400 courts across the nation As a young legal advocate, Ginger Lerner-Wren bore witness to the consequences of an underdeveloped mental health care infrastructure. Unable to do more than offer guidance, she watched families being torn apart as client after client was ensnared in the criminal system for crimes committed as a result of addiction, homelessness, and mental illness. She soon learned this was a far-reaching crisis—estimates show that in forty-four states, jails and prisons house ten times more people with serious mental illnesses than state psychiatric hospitals. In A Court of

Refuge, Judge Ginger Lerner-Wren tells the story of how the first dedicated mental health court in the United States grew from an offshoot of her criminal division, held during lunch hour without the aid of any federal funding, to a revolutionary institution. Of the two hundred thousand people behind bars at the court's inception in 1997, more than one in ten were known to have schizophrenia, bipolar disorder, or major depression. To date, the court has successfully diverted more than twenty thousand people suffering from various psychiatric conditions from jail and into treatment facilities and other community resources. Working under the theoretical framework of therapeutic jurisprudence, Judge Lerner-Wren and her growing network of fierce, determined advocates, families, and supporters sparked a national movement to conceptualize courts as a place of healing. Today, there are hundreds of such courts in the US. Poignant and compassionately written, A Court of Refuge demonstrates both the potential relief mental health courts can provide to underserved communities and their limitations in a system in dire need of vast overhauls of the policies that got us here. Lerner-Wren presents a refreshing possibility for a future in which criminal justice and mental health care can work in tandem to address this vexing human rights issue--and to change our attitudes about mental illness as a whole.

Executing the Mentally Ill Kent S. Miller, Michael L. Radelet, 1993-06-25
This book is an excellent primer on a subject that Americans are likely to debate for the foreseeable future. --Bimonthly Review of Law Books
Unlike every other western democracy in the world, capital punishment is an active part of the criminal justice system in the United States. By the end of 1992, 2,700 men and 41 women were living under the sentence of death in America. *Executing the Mentally Ill* examines the compelling case of Florida death-row

inmate Alvin Ford, which led the U.S. Supreme Court to rule that executions of severely psychotic death-row inmates are in violation of the Eighth Amendment's ban on cruel and unusual punishment. But how should mental illness be defined for purposes of exemption from execution? How should mental health professionals evaluate competence for execution? What happens when the professionals disagree among themselves about the defendant's mental health? How strong should doubts about mental status be before the execution is stopped? And what should be done with the prisoner who is found incompetent? In telling the powerful story of Ford's history, crime, mental state, and how he was handled by the criminal justice system, the authors confront questions about modern capital sentencing and the administration of the death penalty in America today. *Executing the Mentally Ill* provides a thought-provoking read for students and professionals in mental health, criminal justice, and legal fields, as well as policymakers and others concerned with capital punishment. Those seeking a clearer context for the ambiguities and dilemmas that characterize the ongoing debate over exemption of the mentally ill from execution will find valuable historical and cross-cultural references here. The case of Alvin Ford provides a new perspective for measuring the gaps between the vagueness of the criteria used by mental health professionals in determining competence and its various legal definitions. . . . An underlying message for the reader is that questioning whether mentally ill or mentally retarded death-row inmates should be executed implies questioning the use of the death penalty for anyone. -- Readings: A Journal of Reviews and Commentary in Mental Health The case of Alvin Ford, a Florida man convicted of killing a police officer during a bungled armed robbery, provides a specific focus for Miller and Radelet's

wide-ranging discussion of mental illness and the death penalty. . . . Miller is a psychologist and longstanding student of mental disability issues; Radelet is a leading contemporary authority on the death penalty. Their combined expertise provides readers with a thorough exploration of the competence to die issue, and they also touch on other death penalty issues such as proportionality and racial bias. . . . This book cannot, of course, decisively resolve all the issues involved in the death penalty debate, but it is a worthwhile contribution to the literature. Advanced undergraduates and above. --Choice

The life of Alvin Ford and his 17-year odyssey through Florida's complex capital-punishment process is the subject of *Executing the Mentally Ill*. In telling this fascinating and often macabre story, professors Miller and Radelet expose an inherent and often ignored moral dilemma with capital punishment. The book provides compelling empirical support for the dictum that 'though the justice of God may indeed ordain that some should die, the justice of man is altogether and always insufficient for saying who these may be' (Black, 1974, p. 96). The authors also use the Ford case to examine other important issues about the death penalty in the United States including racism and ineffective assistance of counsel. This well-documented volume should appeal both to an academic audience and to the general public. --Robert M. Bohm, Ph.D., University of North Carolina

Over the last five years, I have reviewed about a dozen books, mostly for university presses, and found this particular piece to be the most well-written and well-researched document to date. The scholarship is sound and 'workmanlike.' I was impressed with the authors' scholarship and ability to apply a wide range of data (e.g. psychiatric testimony, appellate decisions, interviews, and personal letters) to a critical social issue that will continue to haunt our

society: the execution of the mentally ill offender. This book makes a very important contribution to the literature in psychology and the law. The book could be used as a supplementary text in criminal justice programs, sociology, psychology, law, and public policy. This book should be read by every appellate-level judge, felony district-court judge, prosecutor, and defense attorney in America. It leads the way in clarifying the practical, moral, and ethical issues. Legislators should also read this account. --James W. Marquart, Ph.D., Sam Houston State University It is an important book, addressing an area that has only recently become the focus of much attention for mental health professionals. Miller and Radelet have undertaken a comprehensive and carefully articulated look at the issue of competency for execution and the way in which it affects mental health professionals, interwoven as it is with the politics of capital punishment. --Kirk Heilbrun, Ph.D., Department of Mental Health, Mental Retardation, and Substance Abuse Services, Central State Hospital, Virginia

Criminal Trials and Mental Disorders Thomas L. Hafemeister, 2019-02-05 The complicated relationship between defendants with mental health disorders and the criminal justice system The American criminal justice system is based on the bedrock principles of fairness and justice for all. In striving to ensure that all criminal defendants are treated equally under the law, it endeavors to handle similar cases in similar fashion, attempting to apply rules and procedures even-handedly regardless of a defendant's social class, race, ethnicity, or gender. Yet, the criminal justice system has also recognized exceptions when special circumstances underlie a defendant's behavior or are likely to skew the defendant's trial. One of the most controversial set of exceptions -often poorly articulated and inconsistently applied - involves

criminal defendants with a mental disorder. A series of special rules and procedures has evolved over the centuries, often without fanfare and even today with little systematic examination, that lawyers and judges apply to cases involving defendants with a mental disorder. This book provides an analysis of the key issues in this dynamic interplay between individuals with a mental disorder and the criminal justice system. The volume identifies the various stages of criminal justice proceedings when the mental status of a defendant may be relevant, associated legal and policy issues, the history and evolution of these issues, and how they are currently resolved. To assist this exploration, the text also offers an overview of mental disorders, their relevance to criminal proceedings, how forensic mental health assessments are conducted and employed during these proceedings, and their application to competency and responsibility determinations. In sum, this book provides an important resource for students and scholars with an interest in mental health, law, and criminal justice.

Ending Discrimination Against People with Mental and Substance Use Disorders National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Science of Changing Behavioral Health Social Norms, 2016-09-03 Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more

than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

Running for Judge Tim Fall, 2020-02-17 You don't often hear of elected

officials who are battling mental illness. Social, professional, and political stigma are the problem, yet a quarter of our population has anxiety, depression, or both, and continue to be productive and effective on the job, in their families, and around their communities. This is a mental health memoir even more than a memoir of a judicial election. Judges, as much as anyone else, carry huge responsibilities. Faith, family, friends, and good medical care are part of the process for addressing mental illness that threatens to interfere with those responsibilities. If you battle mental illness or know someone who does (and you do, statistics show), others may try to convince you that mental illnesses like depression and anxiety are all in your head. Tell them this: Of course, mental illness is all in your head. And a heart attack is all in your chest. Go see a doctor either way. This book will help you feel better equipped to tell them that yourself.

People With Mental Illness in the Criminal Justice System Group for the Advancement of Psychiatry, Committee on Psychiatry and the Community, 2016-03-22 Written by a committee of the Group for the Advancement of Psychiatry, People With Mental Illness in the Criminal Justice System: Answering a Cry for Help represents the collective wisdom of leaders in community psychiatry and is the third in a series of successful publications that have used Dear Abby letters as source material. The letters, submitted by readers with experience with mental illness and the criminal justice system, constitute a rich, real-world repository for the case stories presented in this fascinating volume. Using the experiences shared in the letters, the authors employ the Sequential Intercept Model to present a series of chapters offering detailed recommendations for psychiatrists, group practices, and criminal justice entities on partnering with individuals who

are at risk and their families, with the goal of improving outcomes. The book's many features and functions make it relevant to a diverse audience: The Dear Abby letters on which the book's stories are based are heartfelt and human, providing a depth of emotion and understanding that cannot be found elsewhere, and the down-to-earth writing style and real-world material are designed to be useful and compelling to both practitioner and layperson. The case-based recommendations for effective interventions are very specific and practical to promote and enhance clinical skill development. A robust set of appendices presents information for professionals on a variety of critically important topics, including principles for criminal justice and community psychiatry; sequential intercept mapping; stages of engagement with the criminal justice system; HIPAA regulations; screening and mental status/criminal justice history; essential systems of care; and the risk-need-responsivity model. An extensive section of criminal justice/mental health online resources addresses areas such as law enforcement, courts, corrections, evidence-based practices, veterans, organizations, and miscellaneous topics, providing avenues of information and assistance for individuals, families, and clinicians. This simple, evidence-based guide challenges psychiatrists to initiate changes in their clinical work; in the operation of their agencies, programs, and teams; and in their partnerships with local criminal justice and behavioral health providers to positively impact people with behavioral health conditions in the criminal justice system. Implementing the approaches described so eloquently in *People With Mental Illness in the Criminal Justice System: Answering a Cry for Help* can potentially reduce the overrepresentation of people with mental illnesses in justice settings, provide alternatives to incarceration, and divert

individuals who do not pose a public safety risk from jail.

Tough Cases Russell Canan, Gregory Mize, Frederick Weisberg, 2018-09-25 "Tough Cases stands out as a genuine revelation. . . . Our most distinguished judges should follow the lead of this groundbreaking volume." —Justin Driver, The Washington Post A rare and illuminating view of how judges decide dramatic legal cases—Law and Order from behind the bench—including the Elián González, Terri Schiavo, and Scooter Libby cases Prosecutors and defense attorneys have it easy—all they have to do is to present the evidence and make arguments. It's the judges who have the heavy lift: they are the ones who have to make the ultimate decisions, many of which have profound consequences on the lives of the people standing in front of them. In *Tough Cases*, judges from different kinds of courts in different parts of the country write about the case that proved most difficult for them to decide. Some of these cases

received international attention: the Elián González case in which Judge Jennifer Bailey had to decide whether to return a seven-year-old boy to his father in Cuba after his mother drowned trying to bring the child to the United States, or the Terri Schiavo case in which Judge George Greer had to decide whether to withdraw life support from a woman in a vegetative state over the wishes of her parents, or the Scooter Libby case about appropriate consequences for revealing the name of a CIA agent. Others are less well-known but equally fascinating: a judge on a Native American court trying to balance U.S. law with tribal law, a young Korean American former defense attorney struggling to adapt to her new responsibilities on the other side of the bench, and the difficult decisions faced by a judge tasked with assessing the mental health of a woman who has killed her own children. Relatively few judges have publicly shared the thought processes behind their decision making. *Tough Cases* makes for fascinating reading for everyone from armchair attorneys and fans of Law and Order to those actively involved in the legal profession who want insight into the people judging their work.

The Criminal Justice System and Mental Retardation Ronald W. Conley, Ruth Luckasson, George N. Bouthilet, 1992

Court of Last Resort Carol A. B. Warren, 1984-08 The Court of Last Resort looks at decision making in a mental-health court and at the dilemmas of treating mental illness while protecting patients' legal rights. Carol Warren spent seven years studying hearings in a large California court where people who had been involuntarily committed to institutions for psychiatric treatment could petition for their release. In this book she confronts questions of whether mental illness is real or only a label for societal control, whether the government should be involved in committing the deviant

to institutions, and how the interaction of judges, psychiatrists, families, police, and other individuals and agencies affect the court's administration of mental-health law. Though the cases in this book fall under California's Lanterman-Petris-Short Act, Warren's analysis of conflicts between legal and medical models of behavior is of national and international importance both to sociologists and to the many professionals who work at the juncture of mental health and the law.

The Power of Dignity Judge Victoria Pratt, 2022-05-10 A renowned judge wonders: What would criminal justice look like if we put respect at the center? The Black and Latina daughter of a working-class family, Victoria Pratt learned to treat everyone with dignity, no matter their background. When she became Newark Municipal Court's chief judge, she knew well the inequities that poor, mentally ill, Black, and brown people faced in the criminal justice system. Pratt's reforms transformed her courtroom into a place for problem-solving and a resource for healing. She assigned essays to defendants so that the court could understand their hardships and kept people out of jail through alternative sentencing and nonprofit partnerships. She became the judge of second chances, because she knew too few get a first one. With a foreword from Senator Cory Booker, *The Power of Dignity* shows how we can transform courtrooms, neighborhoods, and our nation to support the vulnerable and heal community rifts. That's the power of dignity.

A Prescription for Dignity Professor Michael L Perlin, 2013-08-28 Examining the treatment of persons with mental disabilities in the criminal justice system, this book offers new perspectives that are crucial to an understanding of the ways in which society projects onto criminal defendants prejudices and attitudes about responsibility, free will, autonomy, choice,

public safety, and the meaning and purpose of punishment, all with a focus on ways to enhance dignity in the criminal trial process. It is a detailed exploration of issues of adequacy of counsel; the impact of international human rights law, following the ratification of the United Nations Convention on the Rights of Persons with Disabilities (CRPD); the role of mental health courts; and the influence of therapeutic jurisprudence, procedural justice, and restorative justice on the legal process. It considers all of these perspectives in the context of criminal justice system issues such as competency findings, the insanity defense, and sentencing. Demonstrating how the question of treatment of persons with mental disabilities in the criminal justice system is not only a vital one for both scholars and practitioners, but also a central facet of international human rights law, this book suggests policy development, further scholarly inquiries, and newly invigorated thinking and action to place dignity at the core of the criminal justice system.

Therapeutic Justice Karen A. Snedker, 2018-06-14 This book examines Mental Health Courts (MHC) within a socio-legal framework. Placing these courts within broader trends in criminal justice, especially problem-solving courts, the author draws from two case studies with a mixed-methods design. While court observational and interview data highlight the role of rituals and procedural justice in the practices of the court, quantitative data demonstrates the impact of incentives, mental health treatment compliance and graduating patterns from MHC in altering patterns of criminal recidivism. In utilising these methods, this book provides a new understanding of the social processes by which MHCs operate, while narrative stories from MHC participants illustrate both the potential and limitations of these courts.

Concluding by charting potential improvements for the functioning and effectiveness of MHCs, the author suggests potential reforms and 'best practices' for the future in tandem with rigorous analysis. This book will be of value and interest to students and scholars of criminology, law, and social work, as well as practitioners.
