Junkers Ju 87 Eddie J. Creek,2012-06-07 This large format hardback is packed with information on the Ju87 Stuka. Highly illustrated, it represents a comprehensive, detailed reference work to be used by enthusiasts and modelers for one-stop ease of access to information to one of the most well-known aircrafts of World War II. Unquestionably, the Junkers Ju 87 was one of the most devastatingly effective and psychologically terrifying weapons of war ever produced. The howl of its sirens during a dive-bombing attack struck fear into those on the ground. Spearheading the German advances in Poland, Norway, the Low Countries, the Mediterranean, and Russia between 1939 and 1943, the Luftwaffe's Ju 87 Stuka became synonymous with the art of Blitzkrieg warfare. Next to the fighter aces, it was perhaps the Stuka crews who were held in the highest esteem by both German commanders and the German people and their accomplishments became legendary. This will be the book sought after by aviation enthusiasts and modelers.

Junkers Ju 87 Stukageschwader 1937-41 John Weal,2012-11-20 The Ju 87 Stuka was the most feared weapon in the German arsenal in the first year of World War 2, the Luftwaffe using it to deadly effect during the Blitzkrieg between September 1939 and June 1940. Although vulnerable to the enemy fighters due to its moderate speed in level flight and general lack of manoeuvrability, the Ju 87 nevertheless soon came to symbolise the might of Nazi Germany as the mere handful of Stukageschwader supporting the Wehrmacht rampaging out of the Fatherland took a heavy toll of the Allied forces.

Junkers Ju 87 - The Stuka Mantelli - Brown - Kittel - Graf,2015-03-24 The Stukas if you did not know you knew definitely looking from the deafening roar and fury disruptive. The Stuka was also famous for the scream that emitted launching into beaten against a target. In almost all versions, in fact, was mounted in the basket a siren that you drove with the beaten and emitted, in fact, a kind of scream. This served to terrorize the enemies on the ground and, for this reason, the Stuka earned a reputation even more terrible, the Junkers Ju 87 Stuka also said (in German Sturzkampfflugzeug, literally combat aircraft swooping), was a bomber swooping wing single-engine configuration with inverted gull wing. Although designed in 1933 by the German Junkers GmbH, the Stuka remained in production for over nine years, staying for the duration of the war, essentially unchanged in structure and basic configuration, test the overall validity of the machine. Were built more than 5,700 copies in a dozen versions, which fought on all fronts. In an attack dive against ground targets the greatest operational flaw lay in violent lateral acceleration experienced by the pilot, not having available at that time in chemical suits differentiated compression fainted at the height of the effort (coinciding with the release of the bomb). So not being able to regain control of the plane ended up crashing to the ground ... The German designers solved the problem by designing an automatic recall of the bar that was activated before the dive, and that allowed to bring back to share the plane after the attack in case of fainting of the pilot, who had so everything time to recover his senses and control apparatus.

Ju 87D/G STUKA versus T-34 Robert Forsyth,2023-09-28 An examination of two of the most high-profile air and land weapons to be deployed on the Eastern Front in World War II. In late 1942, as part of its attempts to strike back at ever-increasing numbers of Soviet tanks, the German air ministry authorised the development of an adaptation and enhancement of the longspan Junkers Ju 87D-5 Stuka dive-bomber. The aircraft was duly fitted with two underwing pods containing 37 mm BK cannon – an anti-aircraft cannon with its origins dating back to 1933. The solid, slow, Ju 87 airframe offered the Luftwaffe an ideal platform for specialist, low level, 'tank-killing' operations. Despite the wealth of experience possessed by some of the Luftwaffe's ground-attack and dive-bomber aces, knocking out T-34 tanks from the air was a demanding and difficult process. Nevertheless, some Luftwaffe pilots notched up impressive tank scores, and the Ju 87 is credited with the destruction of more than 100 tanks across the central and southern sectors of the Eastern Front, including during the Battle of Kursk. Including personal accounts from Stuka pilots and biographies of the anti-tank aces, together with detailed photographs of the cannon installation into the Ju 87G and details of the construction of the T-34 illustrated using specially commissioned artwork, this book covers the epic clash of two legendary machines of World War II.

Junkers Ju 87 Stuka Mike Guardia,2014-07-20 In the opening days of the Blitzkrieg campaign, few aircraft could invoke as much terror as the Junkers Ju 87. Nicknamed the “Stuka” (an abbreviation of Sturzkampfflugzeug – the German term for “dive-bomber”), the Ju 87 was perhaps the most feared tactical bomber of the ETO. With its fixed landing gear and inverted gull wings, the Stuka was the most recognizable aircraft of the Blitzkrieg era. With profile plates, close-up photographs and battlescene artwork, this book reveals the design and development history of the aircraft and how the inclusion of its dive-activated siren changed it from a reliable and sturdy dive bomber into a psychological weapon, spreading panic in ground units. Mike Guardia goes on to explain how the Stuka became easy prey for Allied aircraft and how its influence waned in the final years of the war.

The Junkers Ju 87 Stuka Peter C. Smith,2011 Utilizing this slow and relatively lightly armed WWII warplane the German Luftwaffe spearheaded the Blitzkrieg assaults from Poland in 1939, through to North Africa and beyond. From the very first day of WWII to the very last, the Ju 87 operated on the front line. Famed for its precision bombing, the Stuka's accuracy paid handsome dividends against such pinpoint targets as rail and road bridges, artillery, communications, fortresses, and enemy armor. Its added ability to linger over the combat zone providing continuous close air support to troops in the field and proven capability in the field proved a major asset to the Luftwaffe throughout WWII. For a land-based aircraft, the Stuka earned a formidable reputation as an anti-shipping weapon. Off the coast of Norway, Dunkirk, in the Mediterranean and Arctic, the English Channel, and Black Sea, the Ju 87 chalked up a formidable list of destroyed ships. Later in the war she achieved legendary fame as a specialist anti-tank and night-attack aircraft. Peter C. Smith, a leading authority on the history of dive-bombers and dive-bombing, relates the history of the Stuka and all its variants in great detail. Complemented by more than 250 photographs, comprehensive appendices, equipment and instrument layouts, and color profiles The Junkers Ju87 Stuka provides essential reading for researchers, historians, and modelers alike.

Junkers Ju 87d/G Marek Murawski,Marek Ryś,2014-04-19 Part two of the monograph on the legendary World War II dive bomber takes a closer look at the history of the final production versions the Ju 87: the Dora - a dedicated dive bomber and strike platform and the Ju 87 G tank buster. In addition to combat histories of the front-line units that operated the types, the book presents profiles of some of the most prominent Stuka pilots. The text is supplemented by firsthand accounts of the men who flew the Ju 87s in combat, as well as a large selection of original photographs and 3D drawings offering a great insight into the intricacies of the aircraft's design.

Junkers Ju 87 Stukageschwader of the Russian Front John Weal,2012-10-20 This final volume of the Osprey trilogy on the Luftwaffe dive-bomber charts its fortunes in the toughest theatre of all: the Eastern Front. Written by John Weal, a leading authority on the Luftwaffe, this book examines how, following its comprehensive defeat over the English Channel in the summer of 1940, the Stuka was able to restore its fearsome reputation over the Eastern Front.

Junkers Ju 87 D-G Stanislaw Mokwa,2009-12-15 Includes free decals and masking foil A comprehensive reference for the modeler or enthusiast alike The Junkers Ju 87 or Stuka (from Sturzkampfflugzeug, dive bomber) was a two-seat (pilot and rear gunner) German ground-attack aircraft. Designed by Hermann Pohlmann, the Stuka first flew in 1935 and made its combat debut in 1936 as part of the Luftwaffe's Condor Legion during the

Spanish Civil War. The D-series saw extensive use in the Eastern Front and the Middle East. With the G variant the aging airframe of the Ju 87 found new life as an anti-tank aircraft. This was the final operational A-T version of the Stuka and was deployed on the Eastern Front. The change in German military fortunes after 1943 and the appearance of huge numbers of well armored Soviet tanks caused Junkers to adapt the existing design to combat this new threat. This is a detailed technical guide to these formidable variants, and provides exceptional reference for any modeler or enthusiast. About the Series This series of highly illustrated books presents detailed scale drawings of aircraft and vehicles, with supporting color profile artwork. With detailed captions on the history, combat action and development of each machine, each volume is an exceptional reference tool for modelers, with extras such as free decals, masking foil and photo-etched brass.

Hitler's Stuka Squadrons John Ward, 2004 Hitler's Stuka Squadrons is a book that separates fact from fantasy regarding the achievements and military career of the Ju 87 aircraft. Able to deliver its bombs accurately onto a target, the Stuka wreaked havoc in Poland and France against ground targets and refugee columns. Hitler's Stuka Squadrons charts the Ju 87's career in 1939-40, when German aerial superiority ensured aircraft losses were low. However, against Spitfires and Hurricanes in the Battle of Britain in 1940 the Stuka was shot out of the skies. The campaign in Russia saw the re-establishment of the Ju 87's supremacy, and would lead to a change in role to one of tank-busting. Hitler's Stuka Squadrons also covers the individual Stuka squadrons, their campaigns, tactics, and pilots. Illustrated with full-color artworks, which show the various changes in livery and design that the Ju 87 underwent during its career, accompanied by a full specifications table that lists range, armament, performance, dimensions, ceiling and weights;- An authoritative book written by an expert on Military history- First-hand accounts from Stuka pilots- Full-colored artworks- Specifications boxes

Junkers Ju 87 D, G Maciej Noszczak, 2019-09-19 Ju 87 D (Dora) is another version of this popular dive bomber. Despite the weak armor and less sufficient performance, the Stukas were still produced due to the lack of a successor. However, the plane underwent some modifications that allowed it to be used for a variety of tasks. Ju 87 D had a more efficient water and oil cooling system, a more aerodynamic fuselage and modified crew cabin that was more spacious and better thought out. Dora was driven by one of the two Junkers' engines: Jumo 211 J-1 with 1420 hp or Jumo 211 P with 1500 hp. Fuel tanks were increased up to the capacity of 1370 l, which allowed to achieve an average flight length of 2 hours and 15 minutes. In the case of using external drop-tanks, the flight time increased to 4 hours. In relation to the Ju 87 B version D could carry much bigger load of bombs. It was a jump from 500 to about 1200 kg of bombs, and with minimum amount of fuel and for short-distance missions, the aircraft could carry up as much as 1800 kg of bombs. Individual variants - from D-1 to D-4 - differed in the used armor and equipment: D-2 - was planned for tropical operations, D-3 - was planned for night (D-3 N) or tropical missions (D-3/trop), D-4 - torpedo-bomber version,

Junkers Ju 87 Ulrich Elfrath, 1997-01-07 The famous Stuka is shown over a variety of fronts throughout its development.

Junkers Ju 87 Stukageschwader of North Africa and the Mediterranean John Weal, 1998-07-24 The 'terror weapon' of the invasion of Poland at the start of World War II (1939-1945), the assault on Scandinavia and the Blitzkrieg through western Europe, the Ju 87 Stuka had had its reputation severely dented during the Battle of Britain, where its vulnerability to fighter aircraft in hostile skies was savagely exposed. Licking their wounds, the Stukageschwader were sent south-east from their bases in France to the warmer climes of the Balkans in early 1941. In mid-1941, again frustrated at the inability of the Italians to defeat numerically inferior Allied forces, the Germans arrived in North Africa. Included in the force were Ju 87s. However, like operations on the African continent, their efforts were doomed to failure, and from mid-1942 onwards the Stuka proved to be little more than cannon fodder for Allied fighters.

Junkers JU 87 Stuka Manfred Griehl, 2001 Introduced in 1935, the Ju 87 was one of the finest planes flown in the Spanish Civil War. That experience led to modifications, and during the invasion of Poland, where this aircraft played a major role, it proved to be most effective as an accurate and destructive dive-bomber. This book details the development of the Ju 87 from birth to its demise, covering each model and variant. Many wartime photos are included, as well as original drawings and plans. For military enthusiasts and historians.

Junkers Ju 87 Stuka Andy Saunders, 2020-05-19 The Junkers Ju 87 'Stuka' was an aircraft with a single purpose - dive bombing the enemy. Attacking in this way had several advantages: it made the attacking aircraft more difficult to hit, it allowed pinpoint accuracy in the delivery of bombs and it struck terror into the hearts of anyone on the receiving end. After its early successes in the West, the Ju 87 went on to become a vital part of the war on the Eastern Front right up until the war's end. In *Eagles of the Luftwaffe: Junkers Ju 87 Stuka*, historian Andy Saunders offers a detailed profile of this famous warbird.

Black Cross V05 Junkers Ju-87 Helmut Erfurth, Karl-Heinz Regnat, 2004 The Ju 87 is simply one of the best known and distinctive aircraft of World War II. It was commonly known as the Stuka, an abbreviation of the German word Sturzkampfflugzeug, meaning dive-bomber. The prototype, ironically powered by a Rolls-Royce Kestrel engine, first flew in the Spring of 1935. In 1938 the Ju 87 was used in combat for the time as part of the German Condor Legion sent to assist during the Spanish Civil War. At the outbreak of World War II, all nine of the Luftwaffe's Stuka squadrons took part in the attack on Poland. Operating in conditions of air superiority, the Stuka performed well, wreaking havoc on Polish forces and communications. With its sirens wailing, the Stuka dive-bomber was a weapon of terror used to instill fear into the military and civilians alike. The aircraft played an important role in the campaigns against Norway, France and the Low Countries, but it suffered heavy losses when confronted by the Spitfires and Hurricanes of the RAF and was quickly withdrawn from the Battle of Britain and as the war ground on, the Stuka became more vulnerable and less effective. Despite its increasing obsolescence, the type remained in service until the end of the war.
