🔍 [The Ticket](#) Scott Boyter,2009-06-02 Beyond the inside jokes, the fake bits and the banter, The Ticket: Full Disclosure gives you the complete low-down on how The Ticket got started. From the boys at the back of the bus to one of the most imitated sports talk radio stations on the air today, get the full story as told by the guys you tune in to hear on 1310 AM every day. On the occasion of The Ticket’s 15th anniversary, Ticketheads finally have a book revealing all the history and behind-the-scenes hijinks of the Marconi-winning radio station. The ultimate bathroom book for every good, strong P1, this is the true, unvarnished Ticket story of how Mike Rhyner and the gang evolved from press-box yuk monkeys to forming the core of one of the nation’s most popular radio stations.
🔍 [Character and Handwriting Recognition](#) P S P Wang, 1991-08-29 Character and handwriting recognition by computers is attracting much attention particularly because of its potential for application in many areas such as office automation, bank check processing, recognition of postal addresses and ZIP codes, signature verification, and document and text recognition. Over the past four decades, many methods have been proposed, developed and tested for computers to recognize characters, and they have been reported in a variety of publications. The present volume is a coherent and integrated publication containing papers which give new research results in this increasingly active field. It is a boon to researchers, scientists and engineers who need to keep abreast of new developments in character and handwriting methodologies and applications. Contents: Foreword (C Y Suen)OCR and Off-Line Character Recognition:Optical Character Recognition — A Survey (S Impedovo et al.)Transformation-Ring-Projection (TRP) Algorithm and its VLSI Implementation (Y Y Tang et al.)Regularities and Singularities in Line Pictures (J C Simon & O Baret)On-Line Character Recognition:Speed, Accuracy, and Flexibility Trade-Offs in On-Line Character Recognition (C C Tappert)Chinese and Japanese Character Recognition: Some Research Achievements on Chinese Character Recognition in China (J-W Tai)Applications:Understanding Handwritten Text in a Structured Environment: Determining ZIP Codes from Addresses (E Cohen et al.)A Structural Approach to On-Line Character Recognition: System Design and Applications (F Nouboud & R Plamondon)Progress in Verification of Skillfully Simulated Handwritten Signatures (M Ammar)and other papers Readership: Computer scientists, engineers, researchers and industrialists.
🔍 [Structured Document Image Analysis](#) Henry S. Baird,Horst Bunke,Kazuhiro Yamamoto,2012-12-06 Document image analysis is the automatic computer interpretation of images of printed and handwritten documents, including text, drawings, maps, music scores, etc. Research in this field supports a rapidly growing international industry. This is the first book to offer a broad selection of state-of-the-art research papers, including authoritative critical surveys of the literature, and parallel studies of the architectureof complete high-performance printed-document reading systems. A unique feature is the extended section on music notation, an ideal vehicle for international sharing of basic research. Also, the collection includes important new work on line drawings, handwriting, character and symbol recognition, and basic methodological issues. The IAPR 1990 Workshop on Syntactic and Structural Pattern Recognition is summarized,including the reports of its expert working groups, whose debates provide a fascinating perspective on the field. The book is an excellent text for a first-year graduate seminar in document image analysis,and is likely to remain a standard reference in the field for years.
🔍 [Dictionary of Bibliographic Abbreviations Found in the Scholarship of Classical Studies and Related Disciplines](#) Jean S. Wellington,2003-08-30 Trying to identify abbreviated titles of journals and standard bibliographic works is a major difficulty facing researchers and librarians in the field of classical studies. This revised edition has been greatly expanded, with nearly twice the abbreviations (17,000) and bibliographic entries (12,400) as the first edition. Also, the Greek and Cyrillic abbreviations have increased by seven and four fold respectively. Abbreviations for internet sites are now included, as are those for associations in the broad area of classical studies. There are also more entries for Eastern European and regional archaeological publications. This revised volume is divided into two parts. Part One consists of an alphabetical listing of bibliographic abbreviations found in the scholarship of classical studies and related disciplines. Meanwhile, Part Two is an alphabetically arranged bibliographic descriptions for the works published in classical studies and related disciplines. Special efforts were made to increase the coverage in peripheral areas, making this new edition a useful reference tool for scholars in all subjects of study in the ancient and medieval world.
