Kamov - 27-32 Family Yefim Gordon,Dmitriy Komissarov,2006 This book provides an in-depth study of the Kamov Ka-27, a military helicopter developed for the Soviet Navy and currently in service in Russia, Ukraine, Vietnam, South Korea, China and India. With relatively little in print covering helicopters, this detailed book will prove to be a valuable resource for aviation enthusiasts and modelers seeking technical details and development and service history information on the Ka-27 and its variants.

Helicopters Stanley S. McGowen,2005-05-24 First envisioned by Leonardo da Vinci and first deployed in World War II, the helicopter is now a universal icon of modern warfare, a key component of combat planning around the world, and one of the military's most versatile and effective tools. Helicopters: An Illustrated History of Their Impact covers the development of helicopters from a concept in Leonardo daVinci's mind to the first successful machines in the early 1900s to the latest tilt-rotor designs. Time and again, in a story of constant innovation, designers answered the concerns of military planners with more maneuverable, more capable rotorcraft. With expert analysis and specific details of every significant model ever used, Helicopters shows how these once denigrated machines became essential to a variety of missions (reconnaissance, transport, attack, support, evacuation, urban combat, quick strikes behind enemy lines, and more). In addition, the book looks at the impact of rotorcraft beyond the military, including their ever-widening role in emergency medical care, police work, traffic control, agriculture, news reporting, and more.

The Military Balance 2024 The International Institute for Strategic Studies (IISS),2024-02-13 The Military Balance has been published since 1959. The 2024 edition provides an open-source assessment of the armed forces and equipment inventories of over 170 countries, with accompanying defence economics data. In addition to detailed country data, The Military Balance assesses, region-by-region, important military issues. It includes graphics to illustrate defence personnel, equipment, and procurement developments. The 65th edition examines emerging lessons from Russia's full-scale invasion of Ukraine, details Chinese military activity around Taiwan, and identifies developments in uninhabited aerial vehicle exports. The accompanying wallchart spotlights the important issues around critical national infrastructure in the Euro-Atlantic. The book draws on the breadth of data in the Military Balance+ online database. The Military Balance and Military Balance+ are indispensable sources of information for those involved in defence and security policymaking, analysis, and research.

The Military Balance 2023 The International Institute for Strategic Studies (IISS),2023-02-15 The Military Balance has been published annually since 1959. The 2023 edition provides an open-source assessment of the armed forces and equipment inventories of 173 countries, with accompanying defence economics data. Alongside detailed country data, The Military Balance assesses important military issues, region-by-region, and includes graphics to illustrate these as well as noteworthy equipment developments. Maps this year include a focus on Russia's full-scale invasion of Ukraine and select China-Russia military cooperation activities. The book draws on the range of data carried in the Military Balance+ online database, particularly the procurement features in each regional section. The accompanying wallchart explores the military use of outer space, an increasingly important element of defence capabilities, focusing on China, Russia and the United States. For those involved in defence and security policymaking, analysis and research, The Military Balance is an indispensable source.

Soviet Air Power of the Cold War Michael Green,2023-04-28 At the peak of the Cold War in the 1950s the Soviet Union possessed some 12,000 aircraft, making it the largest air force of all the protagonists. By the 1990s this had declined to around 8,000, the reduction largely reflecting the increase in aircraft capability. As well as fighters and bombers, the Soviet inventory included trainers, transports, seaplanes, electronic warfare and ground attack aircraft, as well as an impressive helicopter fleet, notably the Mi-24 'Hind' gunship and the massive Homer transport. The Tu-4 'Bull' was the first Russian nuclear-capable bomber, a copy of the US B-29, which was followed by their range of jet bombers, the Il-28 'Beagle', Tu-16 'Badger' and M-4 'Bison'. The prop driven Tu-20 'Bear' and its successors including the Tu-22 'Backfire' and finally the Tu-160 'Backfire', were all formidable. The jet-

engined MiG-15 fighter entered service in 1948 and proved itself during the Korean War. The MiG-17, MiG-19 and MiG-21 followed. Ground-attack aircraft included the Su-7 'Fitter' and M-23 'Flogger'. The 1970s saw the MiG-25 'Foxbat' interceptor, followed by the MiG-29 'Fulcrum' and Su-27 'Flanker', coming into service. All these aircraft and many more are authoritatively described and vividly illustrated in this comprehensive work.

New sections on trends in contemporary armed conflicts in Afghanistan and Syria, as well as trends in defence capability areas, with a focus on equipment, technological or doctrinal developments. There is also an essay on trends in defence economics and procurement, one on European defence industries, and another on anti-access/area denial, detailed analysis of regional and national defence policy and economic issues for selected states, updated graphics feature on comparative defence statistics, with focus on defence economics, and major land, sea and, air capability concerns, tables, graphics and analysis of defence economics issues, additional national capability summaries, additional data on, land forces: combat support and combat service support, new graphics and maps on defence capability issues and additional data on cyber capabilities.

The Military Balance 2014 The International Institute for Strategic Studies (IISS), 2021-12-24 The Military Balance 2014 contains region-by-region analysis of the major military and economic developments affecting defence and security policies and the trade in weapons and other military equipment. Detailed entries describe the military capabilities of 171 countries, displaying key equipment inventories and defence economics. Comprehensive tables detail major training activities, UN and non-UN deployments, and international comparisons of defence expenditure and military personnel.

Aircraft Carriers Norman Polmar, 2008-01-31 In the post-1945 era, the aircraft carrier has remained a valued weapon despite the development of nuclear weapons, cruise and ballistic missiles, and highly capable submarines. At times, as in the early days of the Korean and Vietnam Wars and in the Falklands conflict, carriers alone could deploy high-performance aircraft to the battlefield. In other operations, such as enforcing the no-fly zones and the U.S. invasions of Afghanistan and Iraq, only carriers could provide the bases needed for sustained combat and support operations. This second volume of Norman Polmar's landmark study details the role of carriers in the unification of the U.S. armed forces and strategic deterrence, fiscally constrained Great Britain, the development of British Commonwealth and ex-colonial navies, and the efforts of France and the Netherlands to rebuild their fleets. The role of the modern carrier-nine nations currently possess them-is discussed, as are the issues confronting nations that might acquire them. Chapters on the Soviet Union's effort to produce carriers are included for the first time. The development of both carrier planes and the many oddball aircraft that have flown from carriers-such as the U-2 spy plane-are also examined. Appendixes include comprehensive data on all carriers built and converted through 2006. This volume is a valuable companion to the critically acclaimed Volume I, which

covers aircraft carrier development and operations from 1909 to 1945.

The Military Balance 2012 The International Institute for Strategic Studies (IISS),2020-03-26 The Military Balance is the International Institute for Strategic Studies annual assessment of the military capabilities and defense economics of 170 countries worldwide. It is a useful resource for those involved in security policy making, analysis and research.The book is a region-by-region analysis of the major military and economic developments.

China's Quest for Great Power Bernard D Cole,2016-09-15 This book examines China's national security strategy by looking at the three major elements—foreign policy, energy security, and naval power—all interactive and major influences on China's future and its relations with the United States. A decade and a half into the twenty-first century, Beijing requires reliable access to energy resources, the navy to defend that access, and foreign policies to navigate safely toward its goals. Most importantly, the People's Liberation Army-Navy (PLAN) must be able to safeguard China's regional maritime interests, especially the sovereignty disputes involving Taiwan and the Yellow, East China, and South China Seas. Many Chinese naval officers and analysts think the United States is determined to contain China and prevent it from achieving the dominant historical position to which it is entitled. This view has been strengthened by Washington's shift to Asia, transfer of naval units to the Pacific, and the March 2015 Maritime Strategy released by the U.S. Navy, Marine Corps, and Coast Guard. China's relationship with the United States is vital to both countries and to the world. The relationship is based on both common and divergent interests in economics, military operations, and political goals and methods. China's international trading economy and ambition for a world-class navy require effective foreign diplomacy and participation in global affairs. This policy trifecta in large part defines China's posture to the world. Beijing is approximately halfway toward its mid-century goal of deploying a navy capable of defending China's perceived maritime interests. China's priorities follow President Xi Jinping's definition of national security as "comprehensive, encompassing politics, the military, the economy, technology, the environment and culture." What this means for future Chinese foreign policy choices, as naval modernization and energy security concerns enable different courses of action, lies at the center of this book's conclusions.
