The Legend of Final Fantasy VII Nicolas Courcier, Mehdi El Kanafi, 2019-02-19 What gamer hasn't tried Final Fantasy VII? The game, released in 1997, is now the standard-bearer of a whole generation, and it's also the one which catapulted Sony's PlayStation onto center stage. To celebrate this mythic video game's 15th anniversary, Third Editions wanted to throw itself back into this unbelievable universe. This carefully crafted publication takes a look back at all the titles that helped forge Final Fantasy VII's mythology (including the Compilation of FF VII), and deciphers their content through examination and original analysis. This book was written by Nicolas Courcier and Mehdi El Kanafi, former authors and now publishers. The first print was released in 2011. An essential book to (re) discover the universe of the mythical series Final Fantasy! EXTRACT To celebrate one of the most important RPGs in the history of video games, Third Editions has decided to publish a tribute book: a heartfelt edition, but also one that truly analyzes the games that revolve around this legendary RPG. Indeed, the subject of this book is not only Final Fantasy VII, but the entire Compilation of Final Fantasy VII, from Advent Children to Before Crisis, including Crisis Core and Dirge of Cerberus, without forgetting Last Order. To get this journey off on the right foot and refresh your memory, we begin by summarizing the Final Fantasy VII saga. For the first time ever, the full story will be told in chronological order: from the Planet's origins to the awakening of Genesis, as depicted in the secret ending of Dirge of Cerberus. Once the entire saga has been told, we will take you behind the scenes so that you can discover how the video game compilation was created. You will learn about the people whose unexpected decisions changed the game's design. We will also provide a number of anecdotes pertaining to the game's overall development. A complete interpretation will then be offered for each title, paving the way for numerous reflections. ABOUT THE AUTHORS Nicolas Courcier and Mehdi El Kanafi - Fascinated by print media since childhood, Nicolas Courcier and Mehdi El Kanafi wasted no time in launching their first magazine, Console Syndrome, in 2004. After five issues with distribution limited to the Toulouse region of France, they decided to found a publishing house under the same name. One year later, their small business was acquired by another leading publisher of works about video games. In their four years in the world of publishing, Nicolas and Mehdi published more than twenty works on major video game series, and wrote several of those works themselves: Metal Gear Solid. Hideo Kojima's Magnum Opus, Resident Evil Of Zombies and Men, and The Legend of Final Fantasy VII and IX. Since 2015, they have continued their editorial focus on analyzing major video game series at a new publishing house that they founded together: Third. Grégoire Hellot is a French freelance journalist who specializes in video games. He began his career in the field more than twenty years ago when he joined Joypad magazine. As a pioneer dealing in Japanese video games, he has contributed to the French public's acceptance of these unique titles. Today, he contributes to the Gamekult website and is also the Managing Director of Kurokawa Editions, created in 2005 by the publishing house Univers Poche. Grégoire is also known for his role as the Silver Mousquetaire in the TV series France Five.

My Warsaw Jacek Kadaj, 2015-07-30 Jacek Kadaj's My Warsaw is a celebration of how post-communist architecture is reshaping Poland's capital. The city was largely rebuilt following the destruction of the Second World War and Jacek Kadaj's gaze reveals how Warsaw continues to be master of reinvention. The architecture of the prewar city, both surviving and rebuilt, features here too, as poignant traces of what was once the 'Paris of the East'. And Jacek Kadaj also captures the receding socialist-realist cityscape: a wistful testament to the Warsaw of his childhood. But it is the entrepreneurial energy of Warsaw's recent past and present that is the central focus of the photographer's lens. In these photographs, Jacek Kadaj frames a view of the Warsaw of today and tomorrow. Kathy Jones

Reciprocal Constructions Vladimir P. Nedjalkov, 2007-11-06 This monograph constitutes the first comprehensive investigation of reciprocal constructions and related phenomena in the world's languages. Reciprocal constructions (of the type The two boys hit each other, The poets admire

each other's poems) have often been the subject of language-particular studies, but it is only in this work that a truly global comparative picture emerges. Nine stage-setting chapters dealing with general and theoretical matters are followed by 40 chapters containing in-depth descriptions of reciprocals in individual languages by renowned specialists. The introductory papers provide a conceptual and terminological framework that allows the authors of the individual chapters to characterize their languages in comparable terms, making it easy for the reader to see points of commonality between languages and constructions that have never been compared before. This set of volumes is an indispensable starting point and will be a lasting reference work for any future studies of reciprocals.

Arab Americans in Metro Detroit Anan Ameri, Yvonne Lockwood, 2001 Arab Americans have been an integral part of Detroit's history since the 1880s. Early Arab immigrants worked as peddlers, grocers, and unskilled laborers, first settling downtown and later on the east side of Detroit. Their numbers increased after the First World War. They were attracted to the area by the booming automobile industry, and Ford's \$5 for an 8-hour work day. This visual journey explores the history of four generations of Arab Americans in metro Detroit. It takes us to the days that preceded the automobile to modern 21st-century Arab America. Through more than 180 images, this book portrays the challenges and triumphs of Arabs as they preserve their families, and build churches, mosques, restaurants, businesses, and institutions, thus contributing to Detroit's efforts in regaining its position as a world class city.

Applications of Geodesy to Engineering Klaus Linkwitz, Viktor Eisele, Hans-Joachim Mönicke, 2012-12-06 Accuracy requirements of fractions of a millimeter for the positioning of beam-guiding magnets in synchrotrons, monitoring of speedy sub-sea tunnelling with lengths exceeding 25 km, the construction of extremely long bridges of suspension or cast-and push-type, but also geometrical industrial quality control and robot calibration in real time, and even the analysis of prestressed cable nets, are few examples of the challenging new tasks demanding responses from the modern engineering-geodesist. In this volume, a general view of Engineering Geodesy is presented, its state of the art and up-to-date information about recent scientific tasks, aims and methods. The contributions focus on Theoretical Aspects, Techniques of Measurements, Techniques of Data Processing and Computing, Reports About Selected Executed Projects, Special Tasks, e.g. Realtime Positioning and Navigation, Industrial Managements, Image Processing. But also the role of geodesists in collaboration with civil and mechanical engineers, technical designers and architects is outlined. As a reference book, this volume will be useful for researchers, students and practitioners in Engineering Geodesy and neighbouring disciplines.

Gender, Nation and Women Politicians in Serbia and Kosovo Gordana Subotić, 2022-03-30 This book examines the ways women politicians in Serbia and Kosovo have imagined, constructed, and politicised national identity and gender while engaging with politics in the context of the democratisation process. The first book to focus on the work of women inside political structures, it draws on participant observation and interview material to answer the question of how women in positions of power and influence deal with their national identity and gender in societies deeply divided along ethnic lines. Based on close studies of the work of a small number of women from different ethnic backgrounds, the author offers comparative analyses of the ways in which women politicians of different ethnicities respond to similar events in their everyday work. An original political ethnography that considers engagement of women in formal politics, this volume will appeal to scholars across the social sciences with interests in political structures and political participation, particularly as these relate to questions of gender, nation and ethnicity.

Arab Detroit Nabeel Abraham, 2000-08-01 Metropolitan Detroit is home to one of the largest, most diverse Arab communities outside the Middle East, yet the complex world Arabic-speaking immigrants have created there is barely visible on the landscape of ethnic America. In this volume, Nabeel Abraham and Andrew Shryock bring together the work of twenty-five contributors to create a richly detailed portrait of Arab Detroit. The book goes behind the bulletproof glass in Iraqi Chaldean liquor stores. It explores the role of women in a Sunni mosque and the place of nationalist politics in a Coptic church. It follows the careers of wedding singers, Arabic calligraphers, restaurant owners, and pastry chefs. It examines the agendas of Shia Muslim activists and Washington-based lobbyists and looks at the intimate politics of marriage, family honor, and adolescent rebellion. Memoirs and poems by Lebanese, Chaldean, Yemeni, and Palestinian writers anchor the book in personal experience, while over fifty photographs provide a backdrop of vivid, often unexpected, images. In their efforts to represent an ethnic/immigrant community that is flourishing on the margins of pluralist discourse, the contributors to this book break new ground in the study of identity politics, transnationalism, and diaspora cultures.
