Supercell's Supercell Featuring Hatsune Miku Keisuke Yamada,2017-08-10 The lead singer on Supercell's eponymous first album is Hatsune Miku-a Vocaloid character created by Crypton Future Media with voice synthesizers. A virtual superstar, over 100,000 songs, uploaded mostly by fans, are

attributed to her. Supercell is a Japanese creator music group with the composer Ryo leading ten artists, who design album illustrations and make music videos. It provides a sense of how interactive new media and an empowered fan base combine to engage in the creation processes and enhance the circulation of DTM works. 33 1/3 Global, a series related to but independent from 33 1/3, takes the format of the original series of short, music-basedbooks and brings the focus to music throughout the world. Encyclopedia of Artificial Intelligence Philip L. Frana, Michael J. Klein, 2021-04-07 This authoritative reference work will provide readers with a complete overview of artificial intelligence (AI), including its historic development and current status, existing and projected AI applications, and present and potential future impact on the United States and the world. Some people believe that artificial intelligence (AI) will revolutionize modern life in ways that improve human existence. Others say that

the promise of AI is overblown. Still others contend that AI applications could pose a grave threat to the economic security of millions of people by taking their jobs and otherwise rendering them obsolete—or, even worse, that AI could actually spell the end of the human race. This volume will help users understand the reasons AI development has both spirited defenders and alarmed critics; explain theories and innovations like Moore's Law, mindcloning, and Technological Singularity that drive AI research and debate; and give readers the information they need to make their own informed judgment about the promise and peril of this technology. All of this coverage is presented using language and terminology accessible to a lay audience.

The Flesh of Animation Sandra Annett,2024-04-30 How animation can reconnect us with bodily experiences Film and media studies scholarship has often argued that digital cinema and CGI provoke a sense of disembodiment in viewers; they are seen as merely fantastic or unreal. In her in-depth exploration of the phenomenology of animation, Sandra Annett offers a new perspective: that animated films and digital media in fact evoke vivid embodied sensations in viewers and connect them with the

lifeworld of experience. Starting with the emergence of digital technologies in filmmaking in the 1980s. Annett argues that contemporary digital media is indebted to the longer history of animation. She looks at a wide range of animation-from Disney films to anime, electro swing music videos to Vocaloids-to explore how animation, through its material forms and visual styles, can evoke bodily sensations of touch, weight, and orientation in space. Each chapter discusses well-known forms of animation from the United States, France, Japan, South Korea, and China, examining how they provoke different sensations in viewers, such as floating and falling in Howl's Moving Castle and My Beautiful Girl Mari, and how the body is mediated in films that combine animation and live action, as seen in Who Framed Roger Rabbit and Song of the South. These films set the stage for an exploration of how animation and embodiment manifest in contemporary global media, from CGI and motion capture in Disney's "live action remakes" to new media installations by artists like Lu Yang. Leveraging an array of case studies through a new approach to film phenomenology. The Flesh of Animation offers an enlightening discussion of why animation provides a sensational experience for viewers not replicable through other media forms.

Mechademia 10 Frenchy Lunning,2015-12-20 Mechademia 10 revolves around a maelstrom of events: the devastation of 3/11—the earthquake, tsunami, and nuclear reactor crises—and the ongoing environmental disasters that have recently overtaken Japan. Because anime and manga have long proposed (and illustrated) alternative worlds—some created after catastrophes—it is fitting that this volume should consider this propensity for "world renewal." Individual essays range widely, from a poetic and personal reflection on the ritual of tôrô nagashi (the lighting of floating paper lanterns that

has traditionally commemorated souls lost in great public cataclysms, such as war) to a study of the various counterfactual histories written about the historical figure of Toyotomi Hideyoshi, a former peasant farmer who became a military dictator of feudal Japan. The book also includes an original manga, Nanohana, from the popular artist Hagio Moto, who is quoted as saying: "I want to think together with everyone else about Fukushima and Chernobyl, about the future of the Earth, about the future of humankind, and to keep thinking moving forward."
