The Japanese Destroyer Kagero Waldemar Góralski, 2014-01-19 The Japanese destroyers truly made their mark during the war in the Pacific. Fast, heavily armed and manned by well-trained crews, they took part in some of the most memorable surface and air-sea battles of the Pacific War, but also in hundreds of lesser known actions. Those workhorses of the Imperial Navy were employed in a wide variety of roles - from direct action against enemy fleet to escort duties and even pure transport tasks. Commander Hara Tameichi rightly observes that it was the destroyers that bore the brunt of the fighting at sea, and very few among them were as good as the Kagero class warships.

Imperial Japanese Navy Destroyers 1919-45 (2) Mark Stille, 2013-09-20 During the Pacific War the most successful component of the Imperial Japanese Fleet was its destroyer force. These ships were larger and, in most cases, better-equipped than their Allied counterparts. Armed with a powerful, long-ranged torpedo, these ships proved formidable opponents. Initially, they were instrumental in an unbroken string of Japanese victories, but it was not until the Guadalcanal campaign that these ships fully demonstrated their power. In a series of daring night actions, they devastated Allied task forces with their deadly torpedoes. This volume details the history, weapons and tactics of the Japanese destroyers built just before and throughout the war, including the famous Kagero and Yugumo classes, the experimental destroyer Shimakaze that boasted a top speed of almost 40 knots and 15 torpedo tubes, and the Matsu class that represented the Japanese equivalent to an Allied destroyer escort. These ships were designed to be built quickly and cheaply, but proved to be very tough in combat.

USN Destroyer vs IJN Destroyer Mark Stille, 2012-11-20 This book covers the fierce night naval battles fought between the US Navy and the Imperial Japanese Navy during late 1942 as the Allies advanced slowly up the Solomons Islands toward the major Japanese naval base at Rabaul. During this period, several vicious actions were fought featuring the most modern destroyers of both navies. Throughout most of 1942, the Imperial Navy had held a marked edge and a key ingredient of these successes was their destroyer force, which combined superior training and tactics with the most capable torpedo in the world. Even into 1943 mixed Allied light cruiser/destroyer forces were roughly handled by Japanese destroyers. After these battles, the Americans decided to stop chasing Japanese destroyers with cruisers so the remainder of the battles in 1943 (with one exception) were classic destroyer duels. The Americans still enjoyed the technical edge provided to them by radar, and now added new, more aggressive tactics. The final result was the defeat of the Imperial Navy's finely trained destroyer force and the demonstration that the Japanese were unable to stop the Allies' advance.

The Imperial Japanese Navy in the Pacific War Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the

Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

Kaigun David Evans, Mark Peattie, 2015-01-15 One of the great spectacles of modern naval history is the Imperial Japanese Navy's instrumental role in Japan's rise from an isolationist feudal kingdom to a potent military empire stridently confronting, in 1941, the world's most powerful nation. Years of painstaking research and analysis of previously untapped Japanese-language resources have produced this remarkable history of the navy's dizzying development, tactical triumphs, and humiliating defeat. Unrivalled in its breadth of coverage and attention to detail, this important new study explores the foreign and indigenous influences on the navy's thinking about naval warfare and how to plan for it. Focusing primarily on the much-neglected period between the world wars, David C. Evans and Mark R. Peattie, two widely esteemed historians, persuasively explain how the Japanese failed to prepare properly for the war in the Pacific despite an arguable advantage in capability.

Warship 2016 Stephen Dent, 2016-05-19 Warship 2016 is devoted to the design, development and service history of the world's combat ships. Featuring a broad range of articles from a select panel of distinguished international contributors, this latest volume combines original research, new book reviews, warship notes, an image gallery and much more to maintain the impressive standards of scholarship and research from the field of warship history. This 38th edition features the usual range of diverse articles spanning the subject by an international array of expert authors.

Destroyers Eric W. Osborne, 2005-06-22 On July 4, 1991, the Arleigh Burke class of destroyers, the most powerful surface combatants in naval history, was commissioned. It was the culmination of a century-and-a-half evolution of the destroyer—an evolution captured in this vivid and timely history of the world's most popular warship. Destroyers: An Illustrated History of Their Impact tells the story of one of the most-recent, most-rapidly evolving additions to the world's navies. Coverage ranges from the 1882 launch of the first destroyer, through the nonstop technical and strategic innovations of the world war eras, to the current high watermarks of destroyer design such as the Arleigh Burke class (named for the navy's most-famous destroyer squadron combat commander). With its ship-by-ship analysis, this masterful volume shows how destroyers have continually met the challenge of protecting naval and land operations from ever more dangerous attacks. The book also captures the flavor of shipboard life for officers and crew and looks at the crucial role of the destroyer as a standard-bearing status symbol of naval might and political intention.

Japanese Combined Fleet 1941-42 Mark Stille, 2023-09-28 Launching Osprey's new Fleet series, this is a spectacularly illustrated, concise and comprehensive account of the Imperial Japanese Navy's striking force at the height of its power. The Imperial Japanese Navy (IJN) entered the Pacific War as one of the most formidable navies in the world, and its combat power was concentrated into one force, the Combined Fleet. In the months that followed Pearl Harbor it enjoyed an unrivalled string of victories, shattering American, British, Australian, and Dutch naval forces. This period of expansion and constant victories ended at the Battle of Midway, after which the Combined Fleet was forced onto the defensive. In this book, Mark Stille draws on his decades of IJN research to explain what made the Combined Fleet the fighting force that it was. Packed with superb original artwork, explanatory 3D diagrams and maps, it examines the fleet's doctrine, innovative tactics and powerful warships. It also details the qualities and importance of IJN

leadership, logistics, naval infrastructure, and Japan's shipbuilding capability, and gives an account and analysis of the IJN's combat performance during these crucial months – not just in the famous carrier battles, but also exploring lesser-known elements such as IJN amphibious forces and land-based aviation.

It is a must for the military, enthusiast, and all those interested in World War II.

All the World's Fighting Ships Frederick Thomas Jane, 1920

Destroyer Battles Robert Stem, 2008-09-18 Fast, manoeuvrable and heavily armed, destroyers were the most aggressive surface warships of the twentieth century. Although originally conceived as a defensive screen to protect the main battlefleet from torpedo attack, the gamekeeper soon turned poacher, and became primarily a weapon of offence. As such they were involved in many hard-fought battles, using both torpedoes and guns, especially with enemy vessels of the same kind. This book recounts some of the most significant, spectacular or unusual actions in the history of destroyer warfare, from the first employment of torpedo craft during the Russo-Japanese War to the recent terrorist attack on USS Cole. With individual chapters devoted to each incident, the book may be read as a series of dramatic narratives, but each reflects a development in the tactics or technology, so taken as a whole the book amounts to a complete history of the destroyer from an unusual and previously neglected angle.

Java Sea 1942 Mark Stille, 2019-11-28 The battle of the Java Sea, fought in February 1942, was the first major surface engagement of the Pacific War and one of the few naval battles of the entire war fought to a decisive victory. It was the culminating point of the Japanese drive to occupy the Netherlands East Indies (NEI) and, to defend the territory, the Allies assembled a striking force comprised of Dutch, American, British and even an Australian ship, all under the command of a resolute Dutch admiral. On 27 February 1942, the Allied striking force set course to intercept the Japanese invasion force in the Java Sea. In one of the few such times during the whole of World War II a protracted surface engagement was fought unmolested by airpower. For over seven hours, the Allied force attempted to attack the Japanese invasion force, finally breaking off in the early evening. Some three hours later, the Allied force, now reduced to just four remaining cruisers and two destroyers, attempted another attack on the invasion convoy during which Japanese torpedoes scored heavily, sinking two Dutch cruisers and bringing the battle to a conclusion. Over the next two days, as the Allies attempted to flee, five more ships were sunk. From that point on, Allied naval power was eliminated from Southeast Asia. In this illustrated title, Mark Stille tells the full story of the battle of the Java Sea, explaining how and why the Japanese achieved such a resounding victory, and delving into the tremendous impact of the battle on the course of the Pacific War.

Tsushima 1905 Mark Lardas, 2018-11-29 Japan was closed to the world until 1854 and its technology then was literally medieval. Great Britain, France and Russia divided the globe in the nineteenth century, but Japan was catching up. Its army and navy were retrained by Western powers and equipped with the latest weapons and ships. Japan wanted to further emulate its European mentors and establish a protectorate over Korea, yet Japanese efforts were blocked by Imperial Russia who had their own designs on the peninsula. The Russo-Japanese War started with a surprise Japanese naval attack against an anchored enemy fleet still believing itself

at peace. It ended with the Battle of Tsushima, the most decisive surface naval battle of the 20th century. This gripping study describes this pivotal battle, and shows how the Japanese victory over Russia led to the development of the dreadnought battleship, and gave rise to an almost mythical belief in Japanese naval invincibility.

History of World War II. Tim Cooke, Edward Horton, Christer Jorgensen, 2005 Presents a comprehensive discussion of the origins, events, campaigns and personalities of World War II.

B-25 Mitchell vs Japanese Destroyer Mark Lardas, 2021-12-23 Throughout the first year of the war in the Pacific during World War II the USAAF was relatively ineffective against ships. Indeed, warships in particular proved to be too elusive for conventional medium-level bombing. High-level attacks wasted bombs, and torpedo attacks required extensive training. But as 1942 closed, the Fifth Air Force developed new weapons and new tactics that were not just effective, they were deadly. A maintenance officer assigned to a B-25 unit found a way to fill the bombardier's position with four 0.50-cal machine guns and strap an additional four 0.50s to the sides of the bomber, firing forward. Additionally, skip-bombing was developed. This called for mast-top height approaches flying the length of the target ship. If the bombs missed the target, they exploded in the water close enough to crush the sides. The technique worked perfectly when paired with "strafe" B-25s. Over the first two months of 1943, squadrons perfected these tactics. Then, in early March, Japan tried to reinforce their garrison in Lae, New Guinea, with a 16-ship convoy – eight transports guarded by eight destroyers. The Fifth Air Force pounced on the convoy in the Bismarck Sea. By March 5 all eight transports and four destroyers had been sunk. This volume examines the mechanics of skip-bombing combined with a strafing B-25, assessing the strengths and weaknesses of the combatants (B-25 versus destroyer), and revealing the results of the attacks and the reasons why these USAAF tactics were so successful.

The Solomons 1943-44 Mark Stille, 2018-08-23 Victory at Guadalcanal for the Allies in February 1943 left them a vital foothold in the Solomon Islands chain, and was the first step in an attempt to isolate and capture the key Japanese base of Rabaul on New Britain. In order to do this they had to advance up the island chain in a combined air, naval, and ground campaign. On the other hand, the Japanese were determined to shore up their defences on the Solomons, which was a vital part of their southern front, and would bitterly contest every inch of the Allied advance. The scene was set for one of the bloodiest campaigns of the Pacific War. Fully illustrated with specially commissioned maps and artwork, this is the compelling story of the struggle for the Solomons, a key part of the Allied advance towards Japan which saw tens of thousands of casualties and so many ships lost that part of the ocean became known as 'Ironbottom Sound'.

French Destroyers John Jourdan, Jean Moulin, 2015-06-22 Between the wars the French produced some of the largest, and certainly the fastest, destroyers in the world. Known as Contre-Torpilleurs, these striking and innovative super-destroyers form the core of this book, but the more conventional Torpilleurs d'Escadre are also covered. This history combines the technical and service material published in French-language monographs over the past two decades with the authors' own research from primary sources. The structure of the book follows that of the highly successful French Cruisers, with Part I devoted to the design of each of the classes built after 1922. The text is accompanied by detailed data tables and illustrated by a comprehensive set of specially-drawn plans and schemas based on official documents, as well as carefully-selected photographs from French naval sources and from private collections. Coverage runs down to the Le Hardi class, the last pre-war design.. Part II deals with the historical side, covering the

eventful careers of these ships before, during and after the war. This section is illustrated by maps specially drawn for the book, and by contemporary photographs. Like its highly successful predecessors, *French Battleships* and *French Cruisers*, this beautifully presented book blends technical and historical analysis to produce what must become the standard English-language reference work.

Submerged Cultural Resources Assessment of Micronesia Toni Carrell, 1991

Leyte Gulf Mark Stille, 2023-06-08 A fascinating re-examination of the battle of Leyte Gulf, the largest naval encounter in history and probably the most decisive naval battle of the entire Pacific War, and one that saw the Imperial Japanese Navy eliminated as an effective fighting force and forced to resort to suicide tactics. Leyte was a huge and complex action, actually consisting of four major battles, each of which are broken down in detail in this book, using original sources. The plans of both sides, and how they dictated the events that followed, are also examined critically. So much of the accepted wisdom of the battle has developed from the many myths that surround it, myths that have become more firmly established over time. In this new study, Pacific War expert Mark Stille examines the key aspects of this complex battle with new and insightful analysis and dismantles the myths surrounding the respective actions and overall performances of the two most important commanders in the battle, and the “lost victory” of the Japanese advance into Leyte Gulf that never happened.
