[Henry J. Kaiser: Western Colossus](#) Albert P. Heiner,2024-02-22 Henry John Kaiser (1882-1967) was an American industrialist known for his shipbuilding and construction projects, and for fostering modern American health care. Prior to World War II, Kaiser’s company was one of those that built the Hoover and Grand Coulee dams. He established the Kaiser Shipyards, which built Liberty ships during World War II, after which he formed Kaiser Aluminum and Kaiser Steel. Kaiser organized Kaiser Permanente health care for his workers and their families. He led the automobile companies Kaiser-Frazer and Kaiser Motors. Kaiser invested in real estate, later moving into television broadcasting. He established the Kaiser Family Foundation, a charitable organization. “Albert Heiner has written a captivating story of one of the strongest personalities ever to dominate the American scene and he has done it with skill. Henry J. Kaiser was quite as Heiner depicts him and as I knew him — an incredible business genius and fascinating personality.” — Norman Vincent Peale “Through a good portion of Henry J. Kaiser’s career, Al Heiner was there — as a public relations officer for Kaiser Steel, but also as an eye-witness to many of the events that make this biography such lively reading. He then supplemented these firsthand experiences with extensive research in the massive Kaiser Archives now on deposit at the Bancroft Library at Berkeley. This biography teems with vivid, frequently tumultuous anecdotes, each of them set- pieces of skilled narrative.” — Kevin Starr, Author and Historian “In the fifties, the moment I saw the pilot for the television show ‘The Maverick’ I said, ‘that’s Mr. Kaiser.’ I flew out to Hawaii and met with him, and when he saw the picture he flipped, because he saw himself as James Garner... The Maverick. In my opinion he was one of the great showmen of our day and he had fantastic foresight as to how to sell the Kaiser company. I agree with your appraisal of him as one of the great American pioneers.” — Leonard H. Goldenson, Retired Chairman, American Broadcasting Company “Henry J’s extraordinary life, his relish for work and the results of his dreams are fondly described with a particular warmth that could only be captured by an author who witnessed much of the saga.” — Gene Trefethen, Retired President, Kaiser Industries Corporation

[The Kaiser’s Army](#) David Stone,2015-06-01 In this comprehensive book, David Stone describes and analyses every aspect of the German Army as it existed under Kaiser Wilhelm II, encompassing its development and antecedents, organisation, personnel, weapons and equipment, its inherent strengths and weaknesses, and its victories and defeats as it fought on many fronts throughout World War I. The book deals in considerable detail with the origins and creation of the German Army, examining the structure of power in German politics and wider society, and the nation’s imperial ambitions, along with the ways in which the high command and general staff functioned in terms of strategy and tactical doctrine. The nature, background, recruitment, training and military experiences of the officers, NCOs and soldiers are examined, while personal and collective values relating to honour, loyalty and conscience are also analysed. There is also an evaluation of all aspects of army life such as conscription, discipline, rest and recuperation and medical treatment. In addition the army’s operations are set in context with an overview of the army at war, covering the key actions and outcomes of major campaigns from 1914 to 1918 up to the signature of the Armistice at Compiegne. For anyone seeking a definitive reference on the German Army of the period – whether scholar, historian, serving soldier or simply a general reader – this remarkable book will prove an invaluable work.

[Transit Talk](#) Robert W. Snyder,1997 New York City may seem to be a place where everyone is a stranger, yet transit workers provide a human presence on a late-night bus or an empty subway platform. Few of us give any thought to these invisible workers-until something goes wrong. Transit Talk takes readers into the world of MTA New York City transit employees, as they describe their lives and work, from the most visible subway conductor to the seemingly invisible mechanic. There are nearly 44,000 transit workers like those you will meet in Transit Talk , and every day they help five million of us travel to work, to school, to weddings, to funerals, to hospitals, to vacations. These workers labor daily on subway tracks inches from high-voltage powerlines, risking their lives for passengers they’u never know. The city can feel large and fragmented, but the transportation system and its workers create common threads in the lives of all New Yorkers, threads we take for granted. Together, their stories create a human tableau of life and labor in the city within a city that is the MTA New York City Transit. Transit workers find satisfaction in fixing a damaged subway car, gain wisdom from mastering a dangerous workplace, nurse emotional wounds from tending to someone injured in an accident, battle frustration from difficulties with management, and express satisfaction when reflecting on a productive career. They tell of how years spent in the same shop create bonds between workers. They talk of the burden of laboring in a twenty-four-hour system with night shifts and weekend workdays that take them away from families. You’u hear painful tales of informing next-of-kin of a death on the tracks as well as joyous anecdotes of workers delivering a baby in a subway car.

[Mesophotic Coral Ecosystems](#) Yossi Loya,Kimberly A. Puglise,Tom C.L. Bridge,2019-05-22 This book summarizes what is known about mesophotic coral ecosystems (MCEs) geographically and by major taxa. MCEs are characterized by light-dependent corals and associated communities typically found at depths ranging from 30-40 m. and extending to over 150 m. in tropical and subtropical ecosystems. They are populated with organisms typically associated with shallow coral reefs, such as macroalgae, corals, sponges, and fishes, as well as specialist species unique to mesophotic depths. During the past decade, there has been an increasing scientific and management interest in MCEs expressed by the exponential increase in the number of publications studying this unique environment. Despite their close proximity to well-studied shallow reefs, and the growing evidence of their importance, our scientific knowledge of MCEs is still in its early stages. The topics covered in the book include: regional variation in MCEs; similarities and differences between mesophotic and shallow reef taxa, biotic and abiotic conditions, biodiversity, ecology, geomorphology, and geology; potential connectivity between MCEs and shallow reefs; MCE disturbances, conservation, and management challenges; and new technologies, key research questions/knowledge gaps, priorities, and future directions in MCE research.

[Criteria for Highway Routing of Hazardous Materials](#) Deborah K. Shaver,1998 This synthesis will be of interest to staff of state departments of transportation responsible for highway routing, traffic engineering, traffic operations and signing, and maintenance. It will also be useful to state police, who may also be responsible for routing, and other enforcement personnel, as well as to emergency and fire personnel. The trucking industry will also find the information of value to their operations. Information is presented on the current practices of states for the highway routing of vehicles that transport hazardous materials. The Federal Highway Administration (FHWA) in 1994 issued guidelines for applying criteria to designate routes for transporting hazardous materials, which are used by agencies that elect to designate such routes. This report of the Transportation Research Board is based on information obtained from a survey of states concerning the routing of hazardous materials vehicles that asked respondents to rate the importance of 24 factors in the categories of roadway, environment, population, or other criteria in establishing routing policy. The survey also identified the principal agencies responsible for routing, as well as other agencies that typically participate in the routing plan. Enforcement and cost issues are discussed, as is risk assessment. This report presents a unique discussion of the issues as identified by interviews with trucking trade associations and other organizations involved with hazardous materials transport. In addition, technology applicable to more effective monitoring and enforcement is described. The appendices include commodity flow studies and route designation case studies for selected jurisdictions.
