Political Continuity and Conflict in East Timor Ruth Nuttall, 2021-06-14
This book examines the history of political continuity and conflict in East Timor between 1974 and 2006, and the origins of an unexpected crisis in 2006 which caused an international military intervention and several more years of UN missions. Providing a fresh and empirical political history to explain the crisis, the book offers new dimensions to the understanding of East Timor, its independence struggles, political transition and politics after independence in 2002. The author revisits historical materials and brings to light new resources, making extensive use of the 2005 Report of the Commission for Reception, Truth and Reconciliation and contemporary diplomatic, UN and news media reports, to provide a precise context and chronology for the events in 2006. The book provides an analysis within which factors such as ethnic and inter-communal violence, security sector weaknesses and conflict between the army and police, the constitution and legal system, state-building and peace-building can be located in the larger context of the 2006 crisis. Demonstrating how and why, in the space of four weeks in April and May 2006, the newly independent country of Timor-Leste plunged from 'UN success story' into catastrophe, this book will be of interest to academics working on Southeast Asian Politics, Southeast Asian history, Development Studies and Nation-, State- and Peace-Building and International Relations.

Ion Exchange in Environmental Processes Arup K. SenGupta, 2017-09-18
Provides a comprehensive introduction to ion exchange for beginners and in-depth coverage of the latest advances for those already in the field As environmental and energy related regulations have grown, ion exchange has

assumed a dominant role in offering solutions to many concurrent problems both in the developed and the developing world. Written by an internationally acknowledged leader in ion exchange research and innovation, *Ion Exchange: in Environmental Processes* is both a comprehensive introduction to the science behind ion exchange and an expert assessment of the latest ion exchange technologies. Its purpose is to provide a valuable reference and learning tool for virtually anyone working in ion exchange or interested in becoming involved in that incredibly fertile field. Written for beginners as well as those already working in the field, Dr. SenGupta provides stepwise coverage, advancing from ion exchange fundamentals to trace ion exchange through the emerging area of hybrid ion exchange nanotechnology (or polymeric/inorganic ion exchangers). Other topics covered include ion exchange kinetics, sorption and desorption of metals and ligands, solid-phase and gas-phase ion exchange, and more. Connects state-of-the-art innovations in such a way as to help researchers and process scientists get a clear picture of how ion exchange fundamentals can lead to new applications. Covers the design of selective or smart ion exchangers for targeted applications—an area of increasing importance—including solid and gas phase ion exchange processes. Provides in-depth discussion on intraparticle diffusion controlled kinetics for selective ion exchange. Features a chapter devoted to exciting developments in the areas of hybrid ion exchange nanotechnology or polymeric/inorganic ion exchangers. Written for those just entering the field of ion exchange as well as those involved in developing the “next big thing” in ion exchange systems, *Ion Exchange in Environmental Processes* is a valuable resource for students, process engineers, and chemists working in an array of industries, including mining, microelectronics, pharmaceuticals,

energy, and wastewater treatment, to name just a few.

Borderline William Dicey,2004 Readers are taken on a fascinating journey down the Orange River in South Africa in this travelogue that interweaves historical detail from the places the author visits with the history of South Africa as a whole. Augmented with the author's own photographs, this is a document of discovery, much like the source material that Dicey himself quotes from-the first European explorers of the South African interior. But unlike early depictions of outlandish animals and men, Dicey's travelogue investigates the waves of human occupation-the San, the Nama, the Griqua, and the Basters-and the subsequent fallout as the indigenous people were moved off their land around the Orange River.

English-Basque Dictionary Gorka Aulestia,Linda White,2021-09-27 With over 25,000 English entries and their Basque equivalents in six major dialects,

this volume is the most complete reference to the Basque language to date for English-speaking people. This useful resource is the very first of its kind to become available to both the casual student and the serious scholar of the Basque language. The Biscayan, Guipuzcoan, Labourdin, Low Navarrese, Zuberoan, and Batua dialects are included in order to cover all the different regional and formal dialects used in the body of Basque literature, both written and oral, and to present the language in a form familiar to American Basques who may know little of Batua. Whenever possible, the authors also include words relating to modern society.

Comparative Vocabularies of Bushman Languages D. F. Bleek, 2011-06-30
Originally published in 1929, as part of a series of short studies on South African tribes by the School of African Life and Languages at the University of Cape Town, this book provides a comparative analysis of the vocabularies used amongst various Bushmen tribes. Through linguistic analysis, a detailed understanding of Bushmen society is developed, emphasising both the commonalities and distinctions between different tribes. A generous introduction is included, together with a map detailing the coverage of each language. This is a highly informative volume that will be of value to anyone with an interest in anthropology, linguistics, and hunter-gatherer societies.

 mechanics for engineers

a 3 b 3 c δ_{ik} d δ_{jk}
 solution a contracting
 on i or j we have δ_{ij}
 $\delta_{ij} \delta_{jj} \delta_{ii} \delta_{11} \delta_{22} \delta_{33}$
 1 1 1 3 b contracting on
 k and then j gives δ_{ij}
 $\delta_{jk} \delta_{ki} \delta_{ij} \delta_{ji} \delta_{ii}$ 3 c
 contracting on j yields
