Military Technologies of the World T.W. Lee, 2008-12-30 From the introduction of gunpowder to the reigning era of nuclear weapons, military technological advances have been at the forefront of change. These changes in weaponry have influenced the outcome of many historical events and the downfall or success of major civilizations. All nations have sought to improve military technologies in the hope of gaining the upper hand in conflict. The developments in guns, cannon technology, warships, tanks, and airborne and space weapons, have been crucial in the ever-changing face of war. While it is inherent in human nature to seek better weapons for survival, the use of this weaponry will continue to make an impact on history. Through careful examination of the science and engineering of these weapons, persons can continue to venture into the field of military weaponry with an outlook towards the future. Through the many advancements made in military weaponry, our civilization is one that continues to change in the face of war. Technological advancements made in this area improve upon current war tactics and often are the basis behind military warfare. Technology has proven to transform history, lending itself to be one of the most powerful assets of the human race. Breakthroughs in military technology prove to be at the forefront of war and in many cases the result of war is directly connected through these advancements. In history, major civilizations have seen their rise or downfall through the elevation of weapon technology. Lee delves into the engineering and science behind major weapons such as: guns, cannons, fighter and stealth aircrafts, various types of missiles, attack helicopters, aircraft carriers, nuclear submarines, main battle tanks and future weapons. He comprises the knowledge behind the weapons along with an understanding of how the weapons are used and applied to modern warfare. By showing how weapons have changed military warfare, he explains the human nature to seek

better weapons for survival, protection, and domination of resources.

Tools of War Syed Ramsey, 2016-09-01 A weapon, arm, or armament is any device used with intent to inflict damage or harm to living beings, structures, or systems. Weapons are used to increase the efficacy and efficiency of activities such as crime, law enforcement, self-defense, and warfare. In a broader context, weapons may be construed to include anything used to gain a strategic, material or mental advantage over an adversary. While just about any ordinary objects such as sticks, stones, cars, or pencils can be used as weapons, many are expressly designed for the purpose - ranging from simple implements such as clubs, swords and guns, and to complicated modern intercontinental ballistic missiles, biological and cyberweapons. This book has been written keeping in view the requirements of undergraduate and postgraduate students and research scholars in the area of weapons and warfare and Military history.

From German Königsberg to Soviet Kaliningrad Jamie Freeman, 2020-11-10 This book explores how the Soviet Union, after capturing and annexing the German East Prussian city of Königsberg in 1945 and renaming it Kaliningrad, worked to transform the city into a model of Soviet modernity. It examines how the Soviets expelled all the remaining German people, repopulated the city and region with settlers from elsewhere in the Soviet Union, destroyed the key remaining German buildings and began building a model Soviet city, a physical manifestation of the societal transformation brought about by communism. However, the book goes on to show that over time many of the model Soviet

buildings were uncompleted and that the citizens, aware of their Polish and Lithuanian neighbours to both the east and the west and appreciating their place in the wider Baltic region, came to view themselves as something different from other Soviet and Russian citizens. The book concludes by assessing present developments as the people of Kaliningrad are increasingly rediscovering the city's pre-Soviet past and forging a new identity for themselves on their own terms.

The Nebi Yearbook 1998 Lars Hedegaard, P. Joenniemi, Bjarne Lindström, A. Östhol, K. Peschel, C.-E. Stalvant, 2012-12-06 Thorvald Stoltenberg Ambassador Chairman of the Editorial Advisory Board Most of us have been overwhelmed by the speed and extent of the changes that have been taking place in Europe since the late 1980s. Over the span of a few years, we have witnessed the collapse of the Soviet Union and the unification of Germany. This process has had far-reaching implications for

Northern Europe: the Baltic states have attained independence, and with the establishment of the Baltic Sea regional co-operation and the Barents co-operation, a new type of East-West relations has come into being. The process of change continues. Its latest manifestation is the agreement between Russia and NATO, and NATO and EU enlargement is expected to take place over the next few years. With such far-reaching transformations, we need to reflect on what is happening. We need a more coherent picture of the new situation in Northern Europe and of where we are heading. This Yearbook is an attempt to fulfil this need. I would like to thank the editors for taking this initiative, which has been long awaited by those of us who have been actively interested in the improved relations between the former East and the old West that have been made possible by the end of the Cold War - and particularly in the new opportunities for cross-border co-operation and integration in the North European and Baltic space.

Russia and the European Union Oksana Antonenko, Kathryn Pinnick, 2005 The book looks at the array of political, security, economic, and social concerns raised by the enlargement process. It incorporates different perspectives from existing and new EU member states, Russian scholars and politicians from Moscow and the

Conflicting Loyalties and the State in Post-Soviet Russia and Eurasia Michael Waller, Bruno Coppieters, Aleksei Vsevolodovich Malashenko, 1998 The final chapter relates the evolution of these conflicting loyalties to the global weakening of the nation-state, and distinguishes what is particular to the Soviet state and its demise from more significant questions of analytical importance posed by the collapse of a major contemporary multi-national state.

The City in Russian Culture Pavel Lyssakov, Stephen M Norris, 2018-04-19 Cities are

They are sites of both social encounter and social division and provide for their inhabitants “a sense of place”. This book explores the nature of Russian cities, outlining the role played by various Russian cities over time. It focuses on a range of cities including provincial cities, considering both physical, iconic, created cities, and also cities as represented in films, fiction and other writing. Urban Grassroots Movements in Central and Eastern Europe Kerstin

Jacobsson,2016-03-09 What can we learn about collective action across Central and Eastern Europe by focusing on activism within urban spaces? This volume argues that the recent resurgence of urban grassroots mobilisation represents a new phase in the development of post-socialist civil societies and that these civil societies have significantly more vitality than is commonly perceived. The case studies here reflect the diversity and complexity of post-socialist urban movements, capturing also the extent to which the laboratory of urban politics is richly illustrative of the complex nexus of state-society-market relations within post-socialism. The grassroots campaigns and actions reflect the new social cleavages and increased polarisation as a consequence of neoliberal urbanisation and global integration, as well as the transformation of state power and authority in the region. Studying urban activism in Central and Eastern Europe is instructive for urban movements scholars generally, as it forces us to acknowledge the variety of forms that contention can take and the usefulness of embedding the study of urban movements within a larger understanding of civil society.
