Ka-50 Ka-52 Jakub Fojtik,2017-03-19 The Kamov design bureau was established in the late 1940s after a successful demonstration of a single engine ultra-light Ka-8 type and its improved derivate Ka-10, which was first flown on August 30, 1949. Both were rather experimental types used for exploring how to utilize the helicopter, and the latter one was adopted by the Soviet naval aviation into regular service. Due to small dimensions and a small footprint given by coaxial rotors, Ka-10s were for the first time deployed on Soviet Navy vessels and gave both the experimental design bureau OKB Kamov and the Soviet Navy valuable experience with maritime helicopter operation. In total four helicopters were test flown by the naval aviators. However, due to the uncovered cockpit, both types were really limited in their operational use, and they just gave the background for further helicopter design to Kamov.

Privately training with special forces, he's honing his combat skills to continue

his work within the Campus, hunting down and eliminating terrorists wherever he can—even as Jack Ryan Sr. campaigns to become President of the United States again. But what neither father nor son knows is that the political and personal have just become equally dangerous. A devout enemy of Jack Sr. launches a privately-funded vendetta to discredit him and connect him to a mysterious killing in his longtime ally John Clark's past. All they have to do is catch him. Soviet Aircraft Industry Peter G Dancey, 2017-04-22 Soviet aircraft industry was an essential part of the USSR's campaign for global dominance in the twentieth century. Thanks to the thick fog of secrecy that enveloped it throughout the Cold War, it has long inspired the fascination of analysts and enthusiasts in the West; until the collapse of the USSR in 1991, details of Soviet aircraft were often a matter of conjecture. This book aims to uncover fully the mystery surrounding this topic. Drawing on original and previously unpublished information obtained directly from the former USSR, *Soviet Aircraft Industry* examines the unique characteristics of Soviet-designed aircraft—particularly military types, which were

the cause of great concern to the West. Further, by virtue of the industry's central role throughout Soviet history, this book provides a rare and important perspective into the broader theme of Russia's great communist experiment.

Ka-52/K Alligator/Katran: Scout (Reconnaissance)/Attack Helicopter Hugh Harkins, 2018-05-21 Ka-52/K Alligator/Katran The intent of this volume is to detail the Kamov (Russian Helicopters) Ka-52 Alligator and its naval analogue, the Ka-52K Katran (Multi-purpose Strike and Reconnaissance Helicopter) from a systems, sensors, defensive aids and armament viewpoint. It is not intended as a historical monograph of the Ka-50 program that led to the Ka-52, although a short historical background will be furnished in the opening chapter. Subsequent chapters will focus on the technical systems, sensors, defensive aids and armament of the land based and maritime variants. A brief resume of the service entry and operational history of the land based and maritime variants will be furnished, including brief details of operations in the Syrian Arab Republic in 2016-2017.

Fundamentals of Aircraft and Rocket Propulsion Ahmed F. El-Sayed, 2016-05-25 This book provides a comprehensive basics-to-advanced course in an aero-thermal science vital to the design of engines for either type of craft. The text classifies engines powering aircraft and single/multi-stage rockets, and derives performance parameters for both from basic aerodynamics and thermodynamics laws. Each type of engine is analyzed for optimum performance goals,

and mission-appropriate engines selection is explained. Fundamentals of Aircraft and Rocket Propulsion provides information about and analyses of: thermodynamic cycles of shaft engines (piston, turboprop, turboshaft and propfan); jet engines (pulsejet, pulse detonation engine, ramjet, scramjet, turbojet and turbofan); chemical and non-chemical rocket engines; conceptual design of modular rocket engines (combustor, nozzle and turbopumps); and conceptual design of different modules of aero-engines in their design and off-design state. Aimed at graduate and final-year undergraduate students, this textbook provides a thorough grounding in the history and classification of both aircraft and rocket engines, important design features of all the engines detailed, and particular consideration of special aircraft such as unmanned aerial and short/vertical takeoff and landing aircraft. End-of-chapter exercises make this a valuable student resource, and the provision of a downloadable solutions manual will be of further benefit for course instructors.

Gator on the Rise Alexander Mladenov, 2016-10-15
The Kamov Ka-50 (NATO code name Hokum) was developed as a new-generation heavily-armored attack helicopter - originally conceived as a one-to-one replacement of the Mi-24 Hind. The program was launched at the Moscow-based Kamov Experimental Design Bureau in the late 1970s. The concept - promoted by the then young and inventive head of Kamov, Sergey Mikheev - called for an unorthodox, well-protected, agile and small-size attack machine. The unorthodox attack rotorcraft

made its maiden flight in June 1982. It pioneered the Kamov's trademark co-axial rotor scheme, combined with a highly automated flight/navigation/targeting suite and long-range antitank guided missiles. In the late 1980s - after a protracted head-to-head competition pitted against the Mil Mi-28 - it was judged as being definitely superior to its competitor and was subsequently ordered for serial production. The first production-standard Ka-50 took to the air in May 1991 and the new type was formally commissioned into Russian Army Aviation Service in August 1995. As many as five prototypes and 13 production-standard helicopters were manufactured between 1982 and 2009. The single-seat and highly-automated Ka-50, however, appeared on the scene at just the wrong time, with its production launched during the dissolution of the mighty Soviet Union and the onset of sharp cuts in Russia's defense budget, which led to its termination in the late 2000s. First design work on a two-seat derivative of the Ka-50 - designated as the Ka-52 Alligator - commenced as early as 1994 (initially as a company-funded venture). The first prototype - using the fuselage of a production-standard Ka-50 with a new nose section - was rolled out in November 1996 and made its maiden flight in the hover on 25 June 1997. In 2003, the Ka-52 successfully completed the first phase of the Russian military testing and evaluation effort - covering the flight performance. After three years, the Russian MoD finally allocated a budget for systems development testing and evaluation to be used within the framework of the second phase

of the Ka-52 s state testing effort. In addition, the Russian MoD allocated funds to setting up a production line at the AAC progress plant in Arsenyev - situated in Russia s Far Eastern territories. Even before completion of this effort, the initial production-standard Ka-52s were rolled out in the second half of 2010 and handed over to the Army Aviation Center of Combat Training and Aircrew Conversion at Torzhok in December that year. Currently, the Ka-52 is the main new-generation type of the Russian Army Aviation Service, with approximately 200 examples ordered - plus another 36 for the Russia Naval Aviation.

Putin's Prisoner Aiden Aslin, John Sweeney, 2023-07-20 Brought to you by Penguin. Aiden Aslin joined the Ukrainian marines in 2018, compelled to defend his adopted homeland from the growing threat of Russian invasion. In February 2022, as Russia mounted a full-scale offensive, Aiden and his unit were stationed at the frontline at Mariupol. Pinned down at a Mariupol steelworks, after a month-long siege and running out of supplies, Aiden was part of the mass surrender of over a thousand Ukrainian troops, in April 2022. Then his real ordeal began. Singled out for his British passport, Aiden was interrogated, tortured, stabbed, turned into a propaganda zombie, tried by a kangaroo court and then sentenced to death. A victim of a catalogue of abuses of international law, Aiden struggled to cling on to any hope of survival. Certain that he was going to be executed, he was eventually freed in a prisoner exchange and permitted to return home. In *Putin's Prisoner*, Aiden will tell the full, harrowing story of his time fighting in Putin's war, of his six months in Russian

captivity, and of his hardened resolve to defend the freedoms of the people of Ukraine. ©2023 Aiden Aslin & John Sweeney (P)2023 Penguin Audio

Tsar Ted Bell, 2008-09-23 New York Times bestselling author Ted Bell's action-packed thriller features the return of counter spy Alex Hawke as he faces a global nightmare of epic proportions. Somewhere in Russia, there dwells a man so powerful no one even knows his name. His existence is only speculated upon, only whispered about in American corridors and CIA strategy meetings. Though he is practically invisible, he is pulling strings—and pulling them hard. For suddenly, Russia is a far, far more ominous threat than even the most hardened cold warriors ever thought possible. The Russians have their finger on the switch to the European economy and an eye on the American jugular. And, most importantly, they want to be made whole again. Should America interfere with Russia's plans, well then, America will pay in blood. As this political crisis plays out, Russia gains a new leader. Not just a president, but a new tsar, a signal to the world that the old, imperial Russia is back. And in America, a mysterious killer brutally murders an innocent family and literally flattens the small Midwestern town they once called home. Just a taste, according to the new tsar, of what will happen if America does not back down. Onto this stage must step Alex Hawke, espionage agent extraordinaire and the only man who can stop the absolute madness borne and bred inside the New Russia. Gripping and imaginative, *Tsar* is Ted Bell's most explosive tale of international

suspense to date.
