**Helicopters** Stanley S. McGowen, 2005-05-24 First envisioned by Leonardo da Vinci and first deployed in World War II, the helicopter is now a universal icon of modern warfare, a key component of combat planning around the world, and one of the military's most versatile and effective tools. *Helicopters: An Illustrated History of Their Impact* covers the development of helicopters from a concept in Leonardo da Vinci's mind to the first successful machines in the early 1900s to the latest tilt-rotor designs. Time and again, in a story of constant innovation, designers answered the concerns of military planners with more maneuverable, more capable rotorcraft. With expert analysis and specific details of every significant model ever used, *Helicopters* shows how these once denigrated machines became essential to a variety of missions (reconnaissance, transport, attack, support, evacuation, urban combat, quick strikes behind enemy lines, and more). In addition, the book looks at the impact of rotorcraft beyond the military, including their ever-widening role in emergency medical care, police work, traffic control, agriculture, news reporting, and more.

The Siberian Matter Charles Hays, 2014-01-17 This book is about the tug of war games between Russia and the USA over some critical toxins that are being produced for deadly chemical warfare. The story includes the pawns that discover or produce new poisons that the world does not need or really want. But, like everything else, when push comes to shove, they have to make toxins because we also make poisons. That fierce competition between the two Nations is what can lead to war or utter chaos. This book doesn't deal with war itself but it is involved with the pre-war part which could initiate World War III, quite easily. Our three heroes, Nicolas Haig, Carlos Espinosa and General Sarma Goldbond are back to travel the World and to save its inhabitants. They are hired to rescue the one man who knows all the secrets about Ricin and Abrin. This man was kidnapped by Russian agents and is being held against his will in Siberia at Lake Baikal.

**Road of Bones** Don Pendleton, 2012-04-01 Dispatched on a high-priority search-and-rescue mission, Mack Bolan becomes a moving target in the cold heart of Siberia. He's on a motorcycle hell ride along a thousand miles of broken, battered highway. Known as the Road of Bones, it's a mass grave to thousands of slave laborers buried during Stalin's iron rule. A defecting Russian intelligence agent's testimony stands to aim heavy artillery at Russian mobsters in America. To silence her, a

hunter-killer team of secret police and gangsters engage in hot pursuit. The enemy has the edge: manpower, weapons and homefield advantage. For Bolan, it's a one-way trip on an open road effectively sealed at both ends by death squads. Every mile survived brings them both either closer to freedom...or ultimate doom.

Shatner—famous for his role as Captain Kirk on Star Trek—about the intrepid, eighty-year-old FBI deputy director Samuel Lord and his quest to stop the Chinese from using a weapon that (unknown to them) could destroy Earth. In the year 2050, the United States sends the FBI to govern its space station, the Empyrean. Under the command of former fighter pilot and FBI field agent Samuel Lord, the space-based “Zero-G” men are in charge of investigating terrorism, crime, corruption, and espionage beyond the Earth’s atmosphere and of keeping an eye on the rival Chinese and Russian stations. Meanwhile, the Chinese space station has gone mysteriously silent. In this “tightly paced blend of police procedural, military SF, and space opera, set in an intriguing near-future world” (Publishers Weekly), Director Lord must connect the dots to discover who or what has caused the tsunami as well as subsequent disasters, and how Dr. May and the Chinese might be involved.
