Families Coping with Mental Illness Yuko Kawanishi, 2007-12-11 When someone develops a mental illness, the impact on the family is often profound. The most common treatment processes, however, focus on the patient while the loved ones are relegated to subordinate roles and sometimes even viewed as barriers to effective recovery. *Families Coping with Mental Illness* approaches these issues from the family's perspective, studying how they react to initial diagnosis, adjust to new circumstances, and cope with the situation. Through her own original research in the United States and Japan, Kawanishi presents a cross-cultural experience of mental illness that examine both psychological and sociological issues, making this book suitable to all international fields engaging with diversity and mental health. Including first-hand accounts along with analysis and discussion, Kawanishi gives voice to family members and adeptly identifies universal themes of resilience, adaptability, and strength of the family unit. This innovative text offers a unique viewpoint that will appeal to a wide audience of professionals and non-professionals from a variety of backgrounds.

Tōhoku Hidemichi Kawanishi, 2015-09-07 How did the notion of a backward Tōhoku come about? Hidemichi Kawanishi offers a new way of looking at Japanese history and world history from the perspective of Tōhoku regional studies.

Mental Health Challenges Facing Contemporary Japanese Society Yuko Kawanishi, 2009-07-01 This book addresses the profound question of mental malaise in its many forms in contemporary Japanese society, focusing on: work, family and youth. The purpose is to provide an analytical, critical account of the social psychological state of the Japanese today, as well as to present possible measures that could contribute to positive outcomes.

A Sociology of Work in Japan Ross Mouer, Hirosuke Kawanishi, 2005-05-11 What shapes the decisions of employees in Japan? The authors of this comprehensive and up-to-date survey of the relationship between work and society in Japan argue that individual decisions about work can only be understood through the broader social context. Many factors combine to affect such choices including the structuring of labour markets, social policy and, of course, global influences which have come increasingly to impinge on the organisation of work and life generally. By considering labour markets, social policy and

relationships between labour and management, the book offers penetrating insights into contemporary Japanese society and glimpses of what might come in the future. Underlying the discussion is a challenge to the celebration of Japanese management practices which has dominated the literature for the last three decades. This is an important book for students of sociology and economics.

Electro-optic Modulation for Photonic Networks Tetsuya Kawanishi, 2022-01-07
This textbook provides comprehensive and detailed information on electro-optic modulation, which plays important roles in lightwave networks including optical fiber links, visible ray communications, fiber-wireless, etc. The first part of this book describes roles and basic functions of optical modulators as well as various modulation schemes. The second part is on mathematical expressions dedicated to optical modulation, where sideband generation are clearly described. In conclusion, this book provides useful information for device and system technologies, and helps in understanding fundamental issues on telecommunication systems as well as electro-optic devices. Contents in this book provide valuable information for engineering students in telecommunications. It also gives useful examples of applied mathematics using Bessel functions. It is ideal for upper undergraduate and graduate level classes. Provides comprehensive mathematical expressions dedicated to optical phase modulation based electro-optic effect; Presents practical knowledge of optical modulators as well as basic theory on

modulator operation; Includes classroom materials including software and PowerPoint slides for easy integration into curriculum.

Wired and Wireless Seamless Access Systems for Public Infrastructure
Tetsuya Kawanishi, 2020-11-30 This innovative resource presents comprehensive and detailed information on wired and wireless seamless access systems consisting of various types of transmission media including microwave, millimeter-wave, THz wave, and lightwave in fibers. This book explains heterogeneous networks consisting of various transmission media with many media converters. Applications of seamless access networks for public infrastructure such as airports, railways and information and communications systems are described. The book focuses on two important features of seamless access systems, including high-capacity transmission capacity limitation due to economics as well as physics, and low-latency transmission. Latency has significant impact on applications including financial transactions and online gaming. Low-latency data is very important for self-driving cars as well. This book presents the concept of sensor-over-fiber, where many antenna units are connected through optical fibers to gather sensor responses coherently. This book provides possible scenarios of future mobile networks which have many antenna units and opto-electric device technologies. Readers will learn about basic and state-of-the-art signal estimation techniques and concludes with exploration of social issues on future information and communication (ICT) infrastructure.

Petitioning Osiris Edward O. D. Love, 2022-12-05 Petitioning Osiris re-edits, re-analyses, and re-contextualises the Old Coptic Schmidt Papyrus and Curse of Artemisia – written petitions to different manifestations of Osiris – among the Letters to Gods in Demotic, Greek, and Old Coptic from Egypt. The textual traditions of the Letters to Gods, to the Dead, and Oracle Questions which evidence that ritual tradition of petitioning deities are contextualised among contemporary textual traditions, such as Letters and Petitions to Human Recipients, and Documents of Self-Dedication, and compared to later ritual traditions such as proactive and reactive curses without and with judicial features (so-called Prayers for Justice) in Greek and Coptic from Egypt and the Eastern Mediterranean. As with all other Letters to Gods, the Old Coptic Schmidt Papyrus and Curse of Artemisia evidence not only the struggles and aspirations of their petitioners, but also the way in which they conceptualised that they could bring about desired outcomes in their lived experience by engaging divine agency through a reciprocal relationship of human-divine interaction. Petitioning Osiris therefore provides a starting point and springboard for readers interested in these, or comparable, textual and ritual traditions from the Ancient World.

High-Performance Membrane Dialyzers A. Saito, H. Kawanishi, A. C. Yamashita, 2011 A comprehensive summary of high-flux dialyzers and their properties Dialyzers today are developed with high permeability and biocompatibility in mind, even though the definition of these so-called

high-flux dialyzers remains controversial. In the Japanese reimbursement system, dialyzers are divided into five types, ranging from I to V, in accordance with their clearance for beta2- microglobulin (beta2-MG). Classes IV and V (beta2-MG clearance greater or equal to 50 and 70 ml/min, respectively, at a blood flow rate of 200 ml/min) are the most common ones, used in more than 90% of Japanese dialysis patients. Membranes used in types IV and V dialyzers are called high-performance membranes (HPMs) and are characterized by an exceptionally high flux rate, permeability and biocompatibility. The book at hand covers all aspects of these HPM dialyzers, including their definitions and characteristics, clinical experiences and basic investigations. Moreover, historical HPMs and several membranes with special characteristics that are not categorized into classes IV or V are discussed. Providing a summary of commercially available HPM dialyzers, this publication not only serves as a textbook for those interested in state-of-the-art dialysis treatment, but is also a concise database of the products available.

STRATEGIC BOMBING. SURVEY, 2018

The Human Face Of Industrial Conflict In Post-War Japan Hirosuke Kawanishi, 2014-01-09 First Published in 1998. This volume first appeared in Japanese as Sengo Nihon no Sōgi to Ningen (1986). Published by Nihon Hyōronsha in Tokyo it included the reflections of nine union leaders who had

taken their unions through some of Japan's most important post-war industrial disputes. In 1983 each of the leaders came to a student seminar at Chiba University near Tokyo. The talks were recorded and then transcribed with two aims in mind. One was to provide information on the events which led to the formation of Japan's industrial relations as we know them today. During the 1950s and early 1960s a number of Japan's key labour unions lost a succession of campaigns to establish and to defend what they saw as the natural rights of their members. Many of the unions experienced schisms, and the end result was a fundamental shift in the balance of power between labour and management.

Cancer and Inflammation Mechanisms Yusuke Hiraku,Shosuke Kawanishi,Hiroshi Ohshima,2014-03-19 A new perspective on the link between inflammation and cancer Inflammation is the human body's normal biological response to threats in the modern world, as well as a defense against the harmful influence of pathogens, the environment, and poor nutrition. But what happens when the inflammatory response is triggered repeatedly and sustained for long periods of time? *Cancer and Inflammation Mechanisms: Chemical, Biological, and Clinical Aspects* discusses the mechanisms by which chronic inflammation can lead to cancer, the various causative agents, and possible prevention methods.

A compilation of the latest information coming out of the various fields of cancer research, this book provides a detailed look at inflammation-related carcinogenesis from the perspective of researchers at the forefront of the field. It takes an interdisciplinary approach to the topic, and provides comprehensive information about the major factors at work in inflammation, cancer, and the intersection of the two conditions. Topics include: A general overview of inflammation-related cancer The biochemistry of inflammation and its effects on DNA Molecular biology and the role of microRNA in carcinogenesis Specific causative agents including oncogenic viruses, asbestos, and nanomaterial Anti-inflammatories, nutraceuticals, and other preventative measures A deeper understanding of the mechanisms behind inflammation-related carcinogenesis can lead to better patient outcomes by improving diagnostics and prevention, as well as altering the approach to treatment. Cancer and Inflammation Mechanisms: Chemical, Biological, and Clinical Aspects provides the knowledge base researchers need to push the field forward.

Scientific Aspects of Dialysis Therapy H. Kawanishi, Y. Takemoto, 2016-12-12 This book brings together papers presented both during the 61st Annual Meeting of the Japanese Society for Dialysis Therapy (JSDT) and the 34th Congress of the International Society of Blood Purification (ISBP), held in

Osaka in June and in Hiroshima in September 2016, respectively. They cover a broad spectrum of topics, ranging from hemodialysis, peritoneal dialysis, hemodiafiltration and technical innovations in blood purification to complications of chronic kidney disease and acute kidney injury, including mineral bone disease and anemia.

Hemodiafiltration Hideki Kawanishi, Akihiro C. Yamashita, 2011

Hemodiafiltration (HDF) for the treatment of end-stage renal disease patients is predominantly performed in European countries and in Japan, with some differences in technique such as rate of blood flow and dialysis fluid delivery systems. The main focus of this book is on the clinical importance of online HDF, the techniques of which have been re-evaluated with the introduction of super high-flux membrane dialyzers. After a brief introduction into the history of HDF, recent advances and clinical experiences of HDF are summarized, including water quality control for dialysis fluid, equipped system for safe use, clinical advantages, and theoretical aspects of HDF. Moreover, at the end of each chapter researchers and scientists discuss problems into which further research is needed. Clinicians and scientists involved in the treatment of end-stage renal disease patients will find this publication an essential source of information. Moreover, it may also serve as a textbook for those who are planning to start HDF in their clinics or who are studying blood purification therapies in medical schools, nursing schools and even in engineering schools

related to medical technologies.

Kawanishi Aircraft Co. (Kawanishi Kokuki Kabushiki Kaisha) United States Strategic Bombing Survey, 2016-11-08 Excerpt from Kawanishi Aircraft Co. (Kawanishi Kokuki Kabushiki Kaisha): Corporation Report No. III (Air Frames) In cooperation with Short Bros. Co. Of England, the Kawanishi in January, started to build all-metal, trimotor flying boats. During August 1934 an aircraft-engine department was established which experimented with but produced only two engines and then dropped the experiment. The capitalization was increased by yen in September 1938, and, fully paid, to yen by November 1939. In December 1939 the Kawazoe Iron Works in the city of Fuse was purchased. This company produced machine tools and was later a branch of the Takarazuka plant. At the request of the Japanese Naval Ministry, the aircraft-engine department was dissolved in November 1940 and the engine-accessories department and machine gun parts department were established. Kawanishi H6K 'Mavis' and H8K 'Emily' Units Edward M. Young, 2024-08-15 An illustrated account of the little-known operations of the Imperial Japanese Naval Air Force's flying boat units during World War 2. Respectively codenamed the 'Mavis' and 'Emily' by the Allies, Japan's H6K and H8K flying boats outstripped their RAF and US Navy counterparts. The 1941 outbreak of war in the Pacific and Southeast Asia saw these remarkable aircraft carry out offensive missions across vast tracts of ocean and employ their unique capabilities to escort convoys and serve as transports between Japan's island bases. However, while the technical details of the H6K and H8K are well known in the West, this important new study marks the first English-language account of their wartime operations. Utilizing newly translated Japanese war diaries, as well as Allied intelligence and combat reports, celebrated Pacific War expert Edward M. Young reveals the full story behind the Imperial Japanese Naval Air Force's flying boat units. Contemporary photos and 22 colour profiles bring new dimensions to this fascinating area of Japanese military history, vividly illustrating the pivotal roles of 'Emily' and 'Mavis' in events including the Battle of the Coral Sea, the Battle of Midway and the fighting in the Aleutians and the Bismarck and Solomon Islands.
