**J2M Raiden and N1K1/2 Shiden/Shiden-Kai Aces** Yasuho Izawa,Tony Holmes,2016-04-21 Although seen as a replacement for the A6M Zero-sen carrier-based fighter, the Mitsubishi J2M Raiden was actually designed as a land-based naval interceptor optimised for speed rather than manoeuvrability. Engine cooling problems for its Mitsubishi Kasai 23 engine, airflow and flight control issues plagued the Raiden's development, but despite these production delays, aces Sadaaki Akamatsu Yoshihiro Aoki, Susumu Ito and Susumu Ishihara all claimed significant scores in the Raiden. Kawanishi's N1K family of fighters were privately developed by the manufacturer from the N1K Kyofu floatplane fighter. Again plagued by structural and engine maladies, the N1K1-J Shiden eventually entered frontline service in time to see considerable action in the doomed defence of the Philippines in October 1944. Despite suffering heavy losses, the units equipped with new fighter proved that the N1K could more than hold its own against P-38s and F6Fs. The improved N1K2-J Shiden-KAI started to reach the frontline by late 1944 – in time for defence of the Home Islands. Here, it proved to be the best IJN fighter of the war.

**The Little Book of Aviation** Norman Ferguson,2013-05-01 The Little Book of Aviation is a collection of facts, figures and interesting stories from the world of flight. Sad, humorous, baffling and astounding stories abound, from the pioneering days of the Wright Brothers to the present day, and covering everything from great milestones, famous names who've served, and the greatest of aircraft icons; phantom pilots and aircraft and a glossary of slang; the origins of plane-spotting and unusual aircraft names; great feats and enduring mysteries; lucky escapes and great aircraft in the movies... the trivia is limitless and will appeal to everyone, whether you want help telling your Spitfire from your Messerschmitt or you know a Spitfire I from a Spitfire II!

*Warplanes of World War II Up Close* Robert Jackson,2015-12-15 Although airplanes were used to some degree in conflicts prior to 1939, World War II was when military aviation truly became a vital component of war plans. Many sophisticated warplanes were developed, increasing the power and accuracy of aerial bombing and tactical air support. This resource provides an in-depth look from every angle at aircraft such as the P-51 Mustang and Boeing B-29 Superfortress, demonstrating how these planes contributed to how each nation waged war during World War II.

**Secret Weapons** Brian J Ford,2013-09-20 Deep in the bunkers of Nazi Germany, many of the world's top scientists worked to create a new generation of war winning super-weapons. A few of these, such as jet aircraft and the V2 rocket, became realities at the end of the war, others never made it off the drawing-board. Written by noted research scientist, Brian Ford, this exciting book charts the history of secret weapons development by all the major powers during the war, from British radar to Japanese ray-guns, and explains the impact that these developments eventually had on the outcome of World War II. Ford also takes a look at the weapons that never made it to development stage, as well as the more radical plans, such as the idea of turning Hitler into a woman with hormone treatment.

*SeaLion Supremacy v1 BETA 2016* Philip Warnes,2022-02-22 This is the 2016 BETA of the version 1 rules manuscript that is a simpler version in some areas than the commercial ruleset. It is made available for gamers to review and consider other options for using SLS. SeaLion Supremacy is World War 2 tabletop naval wargaming delivered in a format to use for both experienced wargamers, but also those new to the naval wargaming scene. Designed by a long term fan and user of other naval wargaming rules to present his own take on the genre. Designed to be used with our range of WW2 hex counters and basemaps, players don't have to invest in expensive physical miniatures and can use counters (see seperate products) that are cheap to produce. the rules can be used with larger hex grids and physical miniatures if users decide to play it that way. The rules include fleet ship specs for the following Word War 2 navies: • British • French • German • Italy • Japan • United States Also included are specifications for various aircraft that be involved in these naval battles. Designed to be used with d6 dice.

U.S. Aircraft Carriers 1939–45 Ingo Bauernfeind,2021-08-04 A detailed and fully illustrated account of the development of American aircraft carriers up to and during World War II. This extensively illustrated volume tells the dramatic yet successful story of U.S. aircraft carriers in World War II by class, ranging from early pre-war designs to escort carriers built from destroyer hulls, to the gigantic fleet carriers serving as the predecessors of modern-day super carriers. Besides covering the famous great carrier battles in the Pacific, this book also tells of the equally important actions of U.S. flat tops hunting and destroying German U-boats in the Atlantic, making an enormous contribution to the elimination of the U-boat dangers and the safe arrival of transatlantic supplies, so desperately needed for the launch of D-Day. Including profiles and explanatory text boxes, the concise text gives a clear overview of each ship's career, its fate and its significance in American naval history. Moreover, the reader learns about the technical evolution of U.S. carriers throughout the war, and the various aircraft launched from these magnificent vessels to engage their Japanese or German foes. This volume provides an overview of preserved World War II flat tops serving as floating museums for future generations as well as a dive to the sunken U.S.S. Saratoga at Bikini Atoll. Praise for U.S. Aircraft Carriers 1939–45 “Bauernfeind brings to the reader a

fitting conclusion to a superb historical portrait of these capital warships that carried naval aviation to victory in World War II. This is an exemplary work and is recommended as an introductory reference for readers not already steeped in World War II ship history.” –Air Power History “The coverage of the CVEs and CVLs, coupled with the book’s first-rate graphics, profuse and precisely captioned photographs, well-written text, and reasonable price make it a very good choice for readers looking for an overview of U.S. carriers in World War II.” –Naval Historical Foundation

**Tales of Lancasters and Other Aircraft** George Culling,2017-07-06 Of every 100 operational airmen in World War Two, 9 were killed flying in England and 3 severely injured in crashes, so non-operational casualties were significant in numbers, over 15,000. Operational casualties were of course chillingly grim – over 56,000 airmen died in the Second World War, over half those involved. George Culling was a nineteen-year-old Lancaster navigator whose own experiences often involved battling tricky and dangerous conditions. Fascinated by the ever-present dangers for airmen even well away from combat, he has collated tales from comrades and combined them with his own to preserve some of the unexpected, inconvenient, dangerous, and often downright bizarre experiences that frequently typified daily life for airmen in the Second World War.

**Rain of Steel** Stephen Moore,2020-09-01 The last Pacific campaign of World War II was the most violent on record. Vice Admiral Marc Mitscher’s Task Force 58 carriers had conducted air strikes on mainland Japan and supported the Iwo Jima landings, but his aviators were sorely tested once the Okinawa campaign commenced on 1 April 1945. Rain of Steel follows Navy and Marine carrier aviators in the desperate air battles to control the kamikazes directed by Vice Admiral Matome Ugaki. The latter would unleash ten different Kikusui aerial suicide operations, one including a naval force built around the world’s most powerful battleship, the 71,000-ton Yamato. These battles are related largely through the words and experiences of some of the last living U.S. fighter aces of World War II. More than 1,900 kamikaze sorties—and thousands more traditional attack aircraft—would be launched against the U.S. Navy’s warships, radar picket ships, and amphibious vessels during the Okinawa campaign. In this time, Navy, Marine, and Army Air Force pilots would claim some 2,326 aerial victories. The most successful four-man fighter division in U.S. Navy history would be crowned during the fight against Ugaki’s kamikazes. The Japanese named the campaign tetsu no ame (“rain of steel”), often referred to in English as “typhoon of steel.”

*The Oxford Illustrated History of World War II* R. J. Overy,2015 World War Two re-assessed for a new generation, from the 1930s through to the beginnings of the Cold War. This book provides a stimulating and thought-provoking new interpretation of one of the most terrible episodes in world history.

*The Twilight Warriors* Robert Gandt,2010-11-02 Winner of the 2011 Samuel Eliot Morison Award for Naval Literature, *The Twilight Warriors* is the engrossing, page-turning saga of a tightly knit band of naval aviators who are thrust into the final—and most brutal—battle of the Pacific war during World War II: Okinawa. April 1945. The end of World War II finally appears to be nearing. The Third Reich is collapsing in Europe, and the Americans are overpowering the once-mighty Japanese Empire in the Pacific. For a group of young pilots trained in the twilight of the war, their greatest worry is that it will end before they have a chance to face the enemy. They call themselves Tail End Charlies: They fly at the tail end of formations, stand at the tail end of chow lines, and now they are catching the tail end of the war. What they don’t know is that they will be key players in the bloodiest and most difficult of naval battles—not only of World War II but in all of American history. *The Twilight Warriors* relives the drama of the world’s last great naval campaign. From the cockpit of a Corsair fighter we gaze down at the Japanese task force racing to destroy the American amphibious force at Okinawa. Through the eyes of the men on the destroyers assigned to picket ship duty, we experience the terror as wave after wave of kamikazes crash into their ships. Standing on the deck of the legendary superbattleship Yamato, we watch Japan’s last hope for victory die in a tableau of gunfire and explosions. The fate of the Americans at Okinawa, including a twenty-two-year-old former art student, an intrepid fighter pilot whose life abruptly changes when his Corsair goes down off the enemy shore, and a young Texan lieutenant who volunteers for the most dangerous flying job in the fleet—intercepting kamikazes at night over the blackened Pacific—is intertwined with the lives of the “young gods”: the honor-bound kamikaze forces who swarm like killer bees toward the U.S. ships. The ferocity of the Okinawa fighting stuns the world. Before it ends, the long battle will cost more American lives, ships, and aircraft than any naval engagement in U.S. history. More than simply the account of a historic battle, *The Twilight Warriors* brings to life the human side of an epic conflict. It is the story of young Americans at war in the air and on the sea—and of their enigmatic, fanatically courageous enemy.

*Last to Die* Stephen Harding,2015-07-14 From a New York Times bestselling author, the story of how a young American airman became the last to die in World War II

**Tokyo 1944–45** Mark Lardas,2024-02-15 The full history of how the United States targeted and destroyed the Japanese capital from the air, in a ten-month long campaign by the US Army Air Force and the US Navy. In November 1944, the US Army Air Force launched a 111-plane B-29 strike against Tokyo, the first raid since the morale-boosting Doolittle Raid of 1942. From then until August 13, 1945, the United States would attack Tokyo 25 times, 20 from B-29s based in the Marianas and five from US Navy carrier task forces. The campaign included the single deadliest air raid in human history, when around 100,000 people were killed by the firestorm created by the Operation Meetinghouse raid of March 10, 1945. This book, the first to examine the full history of the United States’ air campaign against the greatest target in Japan, looks at the USAF’s and US Navy’s efforts to use air power to eliminate Tokyo’s strategic value to the Empire. It considers how the campaign developed from daylight bombing to firebombing and anti-ship mining, and finally how the target was handed over to the US Navy, whose carrier-based bombers and fighter-bombers continued to strike Tokyo during July and August 1945. Using specially commissioned battlescenes, strategic maps and diagrams, this volume presents a detailed picture of how Tokyo was vanquished from the air.

**The Rise and Fall of the Japanese Imperial Naval Air Service** Peter J. Edwards,2010-11-20 This book describes in considerable detail the people, events ships and aircraft that shaped the Air Service from its origins in the late 19th century to its demise in 1945. The formative years began when a British Naval Mission was established in Japan in 1867 to advise on the development of balloons for naval purposes. After the first successful flights of fixed-wing aircraft in the USA and Europe, the Japanese navy sent several officers to train in Europe as pilots and imported a steady stream of new models to evaluate. During World War One Japan became allied with the UK and played a significant part in keeping the German fleets of ships and submarines at bay in the Pacific and Indian Oceans. However, in the

international naval treaties that followed they felt betrayed, since the number of capital ships, battleships and cruisers, that they were allowed was below those of the USA and the UK. Aircraft carriers were not included, so a program of carrier building was started and continued until World War Two. At the same time they developed an aircraft industry and at the beginning of war their airplanes were comparable, and in some instances superior, to those of the British and Americans. Much prewar experience was gained during Japans invasion of China, but their continued anger with America festered and resulted in their becoming allied with Germany, Italy and the Vichy France during World War Two. There followed massive successful attacks on Pearl Harbor, the Philippines, the Southern Islands, Port Darwin and New Guinea. The British were decimated and the USA recoiled at the onslaught, taking over a year to regroup and take the war to the Imperial Japanese forces. Throughout the conflict many sea battles were fought and the name Zero became legendary. When Japan eventually capitulated after the Atomic bombs were dropped the Japanese Imperial Air Service was disbanded.

**Japan 1944–45** Mark Lardas,2019-02-21 The air campaign that incinerated Japan's cities was the first and only time that independent air power has won a war. As the United States pushed Imperial Japan back towards Tokyo Bay, the US Army Air Force deployed the first of a new bomber to the theater. The B-29 Superfortress was complex, troubled, and hugely advanced. It was the most expensive weapons system of the war, and formidably capable. But at the time, no strategic bombing campaign had ever brought about a nation's surrender. Not only that, but Japan was half a world away, and the US had no airfields even within the extraordinary range of the B-29. This analysis explains why the B-29s struggled at first, and how General LeMay devised radical and devastating tactics that began to systematically incinerate Japanese cities and industries and eliminate its maritime trade with aerial mining. It explains how and why this campaign was so uniquely successful, and how gaps in Japan's defences contributed to the B-29s' success.

*Imperial Japanese Navy Aces 1937–45* Henry Sakaida,2012-10-20 The outcome of the Pacific War was heavily influenced by the results of naval battles between the Imperial Japanese fleet and the US Navy. One of the key elements was Japan's large fighter component, which had gained experience over Manchuria, China and Mongolia in the late 1930s. Flying A5Ms, at least 21 pilots achieved 'acedom' securing air superiority for the invaders. Manufacturer Mitsubishi derived much from these campaigns, producing one of the best fighters of the War, the A6M Zero-Sen. Navy pilots proved to be highly skilled when engaged by the Allied forces, Pacific. Pilots like Nishizawa, Sagita and Sakai scoring more than 60 kills apiece.
