Best of the National Air and Space Museum F. Robert van der Linden, 2016-06-28 Experience the thrill of flying some of the world's most important airplanes and spacecraft. Best of the National Air and Space Museum provides unprecedented access to the most popular museum in the world. The Smithsonian's National Air and Space Museum hosts an average of seven million visits every year. The Udvar-Hazy Center—three football fields long and ten stories high—receives more than one million visits annually. Best of the National Air and Space Museum features the best of both museums, from the Challenger space shuttle and the Wright flyer to the Spirit of St. Louis and the stealth bomber. Robert Van der Linden, curator of aeronautics, has selected the most important, popular, and just plain impressive aircraft and spacecraft from the collections of both museums to be showcased in this beautiful book. Each page spread includes intriguing facts of the item's design, use, mission, specifications, and dimensions. A must-have for space and aviation buffs.

Florida Warplanes Harold A. Skaarup, 2010-11-01 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been restored and preserved in the state of Florida. The aircraft include those flown by members of the United States Air Force, the United States Navy, the United States Army, the United States Marine Corps, the United States Coast Guard, the Air and Army National Guard, and by various NATO and allied nations as well as a number previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 160 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft. For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museum's current inventory or on display as gate guardians throughout the State of Florida. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Florida's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Florida's Warplane survivors.

International Warbirds John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, *International Warbirds: An Illustrated Guide to World Military Aircraft, 1914–2000* puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.

Hellcat vs Shiden/Shiden-Kai Tony Holmes, 2019-01-24 By the early months of 1944 in the Pacific, the US Navy's burgeoning force of carrier-based F6F-3/5 Hellcats had pretty much wiped the skies clear of Japanese fighters during a series of one-sided aerial engagements. However, starting in October they faced the superb Kawanishi N1K1/2 Shiden/Shiden-Kai, a formidable fighter with improved armament, a powerful engine and excellent manoeuvrability that in contrast to earlier Japanese fighters had the ability to withstand a greater degree of battle damage. Japanese pilots using this aircraft would claim more than 170 aerial victories over Kyushu and whilst escorting Kamikazes attacking Allied ships off Okinawa. US Navy Hellcat pilots in turn were credited with many of the scores of Shiden-Kais that were downed attempting to defend Japan. This fully illustrated book compares these two fascinating aircraft, using specially commissioned artwork, first-hand accounts and a thorough technical analysis.

RCAF War Prize Flights, German and Japanese Warbird Survivors Harold A. Skaarup, 2006-05-23 This handbook concerns the collection of Air Technical Intelligence, and the test flying of war prizes carried out by two RCAF bomber pilots who were posted to the Royal Aircraft Establishment's Foreign Aircraft Flight, Farnborough, in the United Kingdom in May 1945. Their primary task was to visit former Luftwaffe airfields, and to find and fly back any aircraft they deemed worthy of evaluation. The list of aircraft found here does not include every German combat aircraft of the Second World War, as it focuses on those warbirds captured and flown by members of the RCAF, or sent to Canada as war prizes. Very few of these rare aircraft exist today, and therefore, information on known locations where German, Japanese and Italian warbird survivors may be found is included. As a member of the Canadian Aviation Preservation Association and the Canadian Aviation Artists Association, the author strongly supports the preservation of Canada's aviation heritage. The primary intent of this handbook is to provide information for aviation artists and enthusiasts looking for that unusual never before painted military aviation subject, and to support the efforts of those engaged in the search for those missing warbirds for which no examples currently exist.

World War II Fighter Planes Spotter's Guide Tony Holmes, 2021-02-04 World War II saw pilots from around the world battling in the skies over Europe, Asia and Africa, with victory resting upon their nerve, skill and the capabilities of some of history's most iconic aircraft. In the chaos of battle, it was vital that they could quickly identify friend from foe. But do you know your Hurricane from your Bf 109, or what the legendary P-51 Mustang looks like? Do you know the wingspan of the A6M Zero-sen, or how fast it could fly? THE WORLD WAR II FIGHTER PLANES SPOTTER'S GUIDE answers all of these questions and more, providing essential information on over 90 legendary aircraft, from the celebrated Spitfire to the jet-powered Me 262. Featuring full-colour artwork to aid recognition, as well as all the details you need to assess their performance, this is the perfect pocket guide to the Allied and Axis fighters of World War II.

J2M Raiden and N1K1/2 Shiden/Shiden-Kai Aces Yasuho Izawa, Tony Holmes, 2016-04-21 Although seen as a replacement for the A6M Zero-sen carrier-based fighter, the Mitsubishi J2M Raiden was actually designed as a land-based naval interceptor optimised for speed rather than manoeuvrability. Engine cooling problems for its Mitsubishi Kasai 23 engine, airflow and flight control issues plagued the Raiden's development, but despite these production delays,

aces Sadaaki Akamatsu Yoshihiro Aoki, Susumu Ito and Susumu Ishihara all claimed significant scores in the Raiden. Kawanishi's N1K family of fighters were privately developed by the manufacturer from the N1K Kyofu floatplane fighter. Again plagued by structural and engine maladies, the N1K1-J Shiden eventually entered frontline service in time to see considerable action in the doomed defence of the Philippines in October 1944. Despite suffering heavy losses, the units equipped with new fighter proved that the N1K could more than hold its own against P-38s and F6Fs. The improved N1K2-J Shiden-KAI started to reach the frontline by late 1944 – in time for defence of the Home Islands. Here, it proved to be the best IJN fighter of the war.

Wings of the Rising Sun Mark Chambers,2018-11-29 In the Pacific War's early years, Japanese air power was dominant. The only way for the Allies to defeat their enemy was to know it. This made the task of maintaining productive intelligence gathering efforts on Japan imperative. Establishing Technical Air Intelligence Units in the Pacific Theatre and the Technical Air Intelligence Center in Washington DC, the Allies were able to begin to reveal the secrets of Japanese air power through extensive flight testing and evaluation of captured enemy aircraft and equipment. These provided an illuminating perspective on Japanese aircraft and aerial weapon design philosophy and manufacturing practice. Fully illustrated throughout with a wealth of previously unpublished photographs, Mark Chambers explores Allied efforts to evaluate the strengths and weaknesses of Japanese air power during the war years, and how this intelligence helped them achieve victory in the Pacific.

H6K "Mavis"/H8K "Emily" vs PB4Y-1/2 Liberator/Privateer Edward M. Young,2023-02-16 An illustrated exploration of the dramatic aerial combats between the US Navy's long-range bomber and Japanese flying boats in the Pacific War. Edward Young explores these rarely written about combats, examining the aggressive and strategic tactics deployed by both US Navy and Imperial Japanese Navy Air Force and analyzing the technical improvements installed throughout the war. The PB4Y-1/2 Liberator/Privateer was the US Navy's first four-engined, land-based bomber, adapted and allocated to fight the U-boat menace in the Atlantic and protect the vast reaches of the Pacific Ocean. The long range, speed, armament and bomb load of the PB4Y-1 enabled the US Navy's Pacific squadrons to adopt more aggressive tactics. The PB4Y-1, and its follow-on PB4Y-2, engaged in dangerous bombing missions against Japanese installations, shipping strikes, and air combat. On the other side, with its doctrine of making the first strike against an enemy fleet, the Imperial Japanese Navy recognized the vital importance of maritime reconnaissance, relying on carrier-based reconnaissance aircraft, ship-borne floatplanes and, for long-range maritime patrol, flying boats. The Japanese would continue to develop their aircraft throughout the war, resulting, among others, in the H6K 'Mavis' and the H8K2 'Emily', which despite never achieving a victory, was regarded by the Allied pilots as the most difficult Japanese aircraft to destroy. Enriched with specially commissioned artwork, including armament and cockpit views, battlescenes and technical diagrams, this title analyses technical specifications in detail. By including first-hand accounts, aviation expert Edward Young provides a detailed account of these one-sided yet dramatic and aggressive combats.

Maryland, Virginia, and Washington D.C. Warbird Survivors 2003 Harold Skaarup,2003-04-07 North America is replete in aviation history, both military and civilian. The sheer size of the United States dictated an early interest in air defense and profoundly influenced the nation's dependence on air travel. It is no wonder that the United States developed as an "air-faring" nation. A large part of the leadership that contributed to that development can be traced to America's Air Force. Indeed, its proud military heritage is embodied in the dedicated individuals who have served and continue to do so—and in the marvelous aircraft they have flown. The preservation and public display of these aircraft is a labor of love for many, including the editor of this book. If you are an enthusiast of military aviation history, or one with a passing interest who simply wishes to learn more, you will find a wealth of information in these well-researched pages.

Clash of Wings Walter J. Boyne,2012-03-13 Boyne resurrects the war of the skies in all its heroic and tragic drama, while supplying insightful, expert conclusions about previously overlooked aspects of the war, including the essential role of American bombers in Europe; Germany's miscalculation of the number of planes required for victory; the Allies' slow start in deploying maximum air power—and why they eventually triumphed.

Fighters of the Dying Sun Justo Miranda,2021-07-11 The first B\ -29 flew over Tokyo on 1 November 1944. It was a photographic reconnaissance aircraft ironically named 'Tokyo Rose'. The Ki.44 fighters of the 47th Sentai took off to intercept it but as it turned out the Superfortress flew at such an altitude and speed that they could not reach it. The Ki\ -44\ -II\ -Otsu had been specifically designed for this type of interception and could reach the astonishing rate of climb of 5,000 m in four minutes; however it was not good enough. During the following ten months, a devastating bombing campaign of thousands of Superfortress destroyed 67 Japanese cities and half of Tokyo. The cultural shock and the political consequences were huge, when it was realised that the Japanese industry was not able to produce the specially heat and stress\ -resistant metallic alloys that were required to manufacture the turbo superchargers needed by the fighters in charge of defending the Japanese mainland. They lacked the essential chromium and molybdenum metals to harden the steel. This fact thwarted the manufacturing of numerous advanced projects of both conventional fighters and those derived from the transfer of German technology fitted with turbojets and rocket engines. They are thoroughly described in this book.
