Air-to-Air Refuelling Aircraft Chris Gibson, 2022-06-20 Modern strategists talk about “force multipliers,” and, for air operations, air-to-air refueling is without doubt the greatest force multiplier of all. In-flight refueling has allowed not only the longest bombing missions in history but also persistence in air defense, transport reach and flexibility in ground-attack tasks. Covering a range of refuelers — including the Boeing KC-97 and KC-135, Vickers Valiant, Handley Page Victor, Lockheed TriStar, Vickers VC10, McDonnell Douglas KC-10 and the Airbus MRTT Voyager — this book details the history of air-to-air refueling and celebrates the key role played by tanker aircraft in the application of air power around the world.

Defence Industries in the 21st Century Çağlar Kurç, Richard A. Bitzinger, Stephanie G. Neuman, 2021-05-13 *Defence Industries in the 21st Century* explores the transformation in the global defence industrial production through examining the interaction between international and domestic factors. With the global defence industry and arms market likely continue to expand and mature, the ways in which this progression could influence international politics remain obscure. In practice, as the contents of this book show, the defence industrial bases and arms export policies of emerging states display significant variance. This variance is the result of a unique balance between domestic and international factors that has shaped the defence industrialisation behaviour and policies of the less industrialised states. One of the most important conclusions of the book is that the interplay between domestic and international factors clearly influences the variation in the emerging states’ defence industrialisation policies, as well as their success or failure. While international factors create opportunities, they also limit the options available to emerging economies. Domestic factors also play an important role by shaping the policy choices of the states’

decision makers. Exploring the balance between international and domestic factors and the ways in which they influence defence industrialisation in emerging states, Defence Industries in the 21st Century will be of great interest to scholars of Defence Industries, Arms Manufacturing, and Defence, Strategic and Security Studies more generally. The chapters were originally published in Defence Studies, Comparative Strategy and All Azimuth.

Confrontational and Cooperative Regional Orders Ariel Gonzalez Levaggi, 2019-07-23 This book explains cooperative and confrontational regional orders in the post-Cold War era. Applying a push-and-pull framework to the evolution of regional orders, the book's theoretical section compares regional dynamics and studies the transformation and authority of governing arrangements among key regional actors who manage security and institutional cooperation. This presents a novel approach to comparing non-Western regional orders, and helps forge a better integration between International Relations disciplinary approaches and area studies. The empirical section analyzes Central Eurasia and South America within the period 1989-2017, using case studies and interviews with decision-makers, practitioners and experts. The volume demonstrates that soft engagement strategies from extra-regional great powers and internationalist domestic coalitions framed in a stable democratic polity are forces for peaceful interaction, while hard engagement strategies from great external powers plus nationalist coalitions within democratic backsliding in key regional powers present negative outlooks for regional cooperation. This book will be of much interest to students of regional security, comparative politics, area studies and International Relations.

The Operator Blueprint Derwin Bradley, 2022-03-08 After an epic, two continents, two-country, multi-city battle with Adam Clark's ruthless CTAC assassins, Sergeant Hammer's rogue Special Forces operators, the storied Red Army Faction, homicidal Latin Kings, and brutally corrupt prison officials belonging to the violent Brotherhood of the Iron Hammer, Dexter, and his S.W.O.R.D. operatives have emerged victorious. However, Dexter's suspicions about the level of funds and technology available to the team are confirmed when Harold Ashford orders him to have S.W.O.R.D. sever all ties with the Urban Justice Research Institute and prepare for a new mission with their true employer. In Langley, Virginia, CIA Associate Deputy Director of Operations Marc Lubet, who is also secretly a member of CTAC, knows that Dexter's team raided CTAC headquarters in Dallas and possibly knows that his name is in the files that they downloaded. With his eyes set on becoming the

Director of the CIA, he devises a plan to free Sergeant Hammer and his rogue Special Forces operators from military custody to use them to eliminate Dexter and his team and recover the files they stole. To make things even more complicated, Colonel Diamond is about to disrupt Dexter's life by preparing extreme measures that are meant to transform him into what he needs to be to complete his new, mysterious mission. Dexter is forced to delve deep into the darkest areas of his psyche and instincts as the Colonel sends him on a perilous operation in the most dangerous place in the world, and mercilessly forces him to face his greatest fear. Dexter's powerful employer emerges from the shadows and tasks him to attempt one of the greatest top-secret missions in modern history, which if successful, will have a lasting global impact. But first, he will have to survive the deadly trials set by his father, and the multiple unsanctioned assassination attempts by Marc Lubet's unrelenting contract mercenaries.

The New Brazil ,2014-06-15 In the midst of a rapidly shifting global economy, Brazil has emerged as a powerful new player on the geopolitical stage. Against all odds, the Latin American

nation managed, in just three years, to repay a 2002 \$15.5 billion IMF bailout loan thanks to aggressive economic restructuring and a series of alliances that have placed it at the center of political and economic power in the region. From the outside, Brazil is a poster child for neoliberal capitalism. Yet inside the country, the lives of the Brazilian people are still marked by vast inequities in wealth and access to social services--a striking disparity with the nation's newfound power in the global economy. In June of 2013, protests against the increasing costs of public transportation swelled to mass demonstrations against the Rousseff government's failure to address this disparity, leading many to wonder whether the popular movements in Brazil may be just powerful enough to shift the nation's influence towards a wholly new economic model based in regional integration. The New Brazil explores this disparity. Will the nation serve as the glue that holds together the Latin American states, distancing themselves from the neoliberalism of the United States and Canada? Or will Brazil simply become another world superpower, able to subject the rest of Latin American to its will? Only time will tell. Raul Zibechi is a journalist and social-movement analyst based in Montevideo, Uruguay. He is the author of numerous books including *Dispersing Power* and *Territories in Resistance*, both published by AK Press.
