The Virtual Weapon and International Order Lucas Kello,2017-09-26 An urgently needed examination of the current cyber revolution that draws on case studies to develop conceptual frameworks for understanding its effects on international order The cyber revolution is the revolution of our time. The rapid expansion of cyberspace brings both promise and peril. It promotes new modes of political interaction, but it also disrupts interstate dealings and empowers non-state actors who may instigate diplomatic and military crises. Despite significant experience with cyber phenomena, the conceptual apparatus to analyze, understand, and address their effects on international order remains primitive. Here, Lucas Kello adapts and applies international relations theory to create new ways of thinking about cyber strategy. Kello draws on a broad range of case studies, including the Estonian crisis, the Olympic Games operation against Iran, and the cyber attack against Sony Pictures. Synthesizing qualitative data from government documents, forensic reports of major incidents and interviews with senior officials from around the globe, this important work establishes new conceptual benchmarks to help security experts adapt strategy and policy to the unprecedented challenges of our times.

The Burned Out Physician John E. Kello,Joseph A. Allen,2022-07-21 Burnout is a major psychological and physical health-related problem for workers in all fields, but especially for those in the fast-paced and rapidly changing world of healthcare. Burnout has severe consequences for patients, including medical error, and is a leading contributing cause of depression and suicide among healthcare workers. Organizational science is just beginning to be applied in earnest to physician burnout and patient safety, and holds several potential keys to addressing these concerns. The Burned Out Physician is for two groups: healthcare workers (especially physicians) and patients. Physicians will use this book to get an accurate picture of what they are experiencing and how to change it, and patients will use this book to see what their healthcare providers are experiencing and learn how to help and/or protect themselves. The volume includes a checklist of burnout symptoms, and crucially a list of solutions as part of an active effort to solve the burnout crisis.

Accountability is within your control - with positive psychology and the right actions. 5 Actions of Positive Accountability will help transform you and your culture by showing you proven, positive, behavioral-science- based techniques to set fair expectations, minimize unsatisfactory performance, and deal constructively with consequences. Based on their research and study as organizational scientists, and their experience as organizational consultants, the authors have identified the five essential steps in a positive accountability process: the 5 Actions of Positive Accountability. Featuring interviews with leaders in various industries and the world of sports, including among others, Dabo Swinney, Head Coach Clemson University Football, Bob McKillop, Head Coach of Davidson College Men’s Basketball and NBA all-star Steph Curry’s college basketball coach, Angelic Gibson, CIO at AvidXchange, and Brona Magee, Deputy CEO of SCOR Global Life, this book combines wisdom with practical dos and don’ts for holding yourself and others accountable. A timely book! Low accountability is pervasive in organizations of all sizes and industries. In 5 Actions of Positive Accountability, Ashlin and Kello tackle the challenge of accountability with an easy-to-follow model that integrates positive psychology with culture. — Dr. Steven Rogelberg, author of the best-selling book The Surprising Science of Meetings

Striking Back Lucas Kello,2022-09-02 Conflict in the last century was defined by the horrific potential of physical and especially nuclear war. Now we are in a new technological era--a world of more subtle, yet no less grave, threats, an environment in which various actors can deeply penetrate vital infrastructures and instigate diplomatic and military crises. Today, computer code is the weapon of choice. Can anything be done beyond shoring up our defenses in a state of permanent insecurity? Lucas Kello delves into recent history to reveal the failures of the present policy in preventing and punishing cyberattacks and other forms of technological aggression. Drawing upon case studies and interviews, Kello develops a bold new solution--a coordinated retaliation strategy that justly and effectively responds to attacks and deters further antagonism. This book provides an approachable yet nuanced exploration of national security and survival in the twenty-first century.

The rapid replacement of the traditional paper dictionary by electronic dictionaries opens up exciting possibilities but also constitutes a major challenge to the field. The eLexicography in the 21st Century: New Challenges, New Applications conference organized by the Centre for English Corpus Linguistics of the Université catholique de Louvain in October 2009 aimed to bring together the many researchers around the world who are working in the fast developing field of electronic lexicography and to act as a showcase for the latest lexicographic developments and software solutions in the field. The conference attracted both academics and industrial partners from 30 different countries who presented electronic dictionary projects dealing with no less than 22 languages. The resulting proceedings volume bears witness to the tremendous vitality and diversity of research in the field. The volume covers a wide range span of topics, including: -the use of language resources for lexicographic purposes, in the form of lexical databases like WordNet or corpora of different types - innovative changes to the dictionary structure afforded by the electronic medium, in particular multiple access routes and efficient integration of phraseology -specialised dictionaries (e.g. SMS dictionaries, sign language dictionaries) -automated customisation of dictionaries in function of users' needs -exploitation of Natural Language Processing tools - integration of electronic dictionaries into language learning and teaching

Beyond the Door Philip K. Dick,2015-08-24 Eleven o'clock came. Far off, at the end of town, the great tower clock boomed sleepily to itself. But the little door remained shut. Nothing moved.
