B-29 Superfortress vs Ki-44 "Tojo" Donald Nijboer, 2017-10-19 By the time the Americans began their aerial bombardment of Japan in 1944, both the JAAF and IJNAF were spent forces. What the Japanese did have though was the Ki-44 Tojo. Armed with two 40 mm cannon, it was the most heavily armed and feared single-seat fighter to see action against the new American bomber, the B-29 Superfortress. For the bomber crews, they had what they believed was their 'ace in hole': a fully armed B-29 carried four remotely operated gun turrets and a tail gunner's position, making it the world's most advanced self-defending bomber. In every respect the Ki-44 pilots were fighting a desperate battle. Many who made their mark did so using suicidal ramming attacks or taiatari. Illustrated with full colour artwork, this volume examines why the Ki-44 was unable to break up bomber formations conventionally during the Pacific War, and how its ramming tactics, while terrifying, graphically revealed Japan's inability to stop the B-29.

Ki-44 'Tojo' Aces of World War 2 Nicholas Millman, 2011-10-18 The 100th title of Osprey's celebrated Aircraft of the Aces series covers a subject sure to be of interest to historians of World War II. The Ki-44 'Tojo' was a fast-climbing, heavily armed point-defence interceptor that was used successfully in slashing hit-and-run tactics that caught Allied pilots by surprise. In the air defense role 'Tojos' pioneered the deployment of a unique 40 mm cannon, the firing system which had no cartridges but instead had the propelling charge contained in the base of the projectile. The Ki-44 was to be used by the JAAF in larger numbers in China than anywhere else. This exciting title from author Nicholas Millman brings the Ki-44's role in the Pacific theatre to vivid life, accompanied by full color plates and archival photographs.

P-47D Thunderbolt vs Ki-43-II Oscar Michael John Claringbould, 2020-07-23 Although New Guinea's Thunderbolt pilots faced several different types of enemy aircraft in capricious tropical conditions, by far their most common adversary was the Nakajima Ki-43-II Hayabusa, codenamed 'Oscar' by the Allies. These two opposing fighters were the products of two radically different design philosophies. The Thunderbolt was heavy, fast and packed a massive punch thanks to its battery of eight 0.50-cal machine guns, while the 'Oscar' was the complete opposite in respect to fighter design philosophy – lightweight, nimble, manoeuvrable and lightly armed. It was, nonetheless, deadly in the hands of an experienced pilot. The Thunderbolt commenced operations in New Guinea with a series of bomber escort missions in mid-1943, and its firepower and superior speed soon saw Fifth Air Force fighter command deploying elite groups of P-47s to Wewak, on the northern coast. Flying from there, they

would pick off unwary enemy aircraft during dedicated fighter patrols. The Thunderbolt pilots in New Guinea slowly wore down their Japanese counterparts by continual combat and deadly strafing attacks, but nevertheless, the Ki-43-II remained a worthy opponent deterrent up until Hollandia was abandoned by the IJAAF in April 1944. Fully illustrated throughout with artwork and rare photographs, this fascinating book examines these two vastly different fighters in the New Guinea theatre, and assesses the unique geographic conditions that shaped their deployment and effectiveness.

Bold Venture Steven K. Bailey, 2019-03-01 Bold Venture tells the nearly forgotten story of the American airmen who flew perilous combat missions over Hong Kong during the Second World War. Steven K. Bailey sheds new light on the American military campaign against Japanese forces in occupied China. From the first reconnaissance flights over Hong Kong by lone pilots in 1942 to the massive multi-squadron air strikes of 1945, he describes the complex history of American air operations in the China theater and paints an indelible portrait of the American air raids on Hong Kong and the airmen who were shot down over the city. Today unexploded aircraft bombs are unearthed with frightening regularity by construction crews in Hong Kong. Residents are eager to know where these bombs originated, who dropped them, when, and what the targets were. Bailey's account answers some of these questions and provides a unique historical perspective for Americans seeking to understand the complexities of military involvement.

Japanese Army Air Force Aces 1937-45 Henry Sakaida, 2012-10-20 Little has been published in English on the Japanese Army Air Force (JAAF), let alone its most successful fighter pilots no less than 150 of them achieved ace status during eight years of near-constant war, and they are all listed in this volume. From the arid plains of the Mongolian border region to the lush jungles of New Guinea,

the JAAF was more than a match for the many opponents it fought against for control of the skies. Indeed, even when the mighty Allied war machine proved almost overwhelming from early 1944 onwards, the elite fighter pilots of the various sentais within the JAAF fought on with near-fanatical loyalty in defence of the Home Islands. Aircraft of the Aces 13 and 22 are also available in a single volume as 'Aces of the Rising Sun 1937-1945'.

The Encyclopedia of Weapons of World War II Chris Bishop, 2002 The encyclopedia of weapons of world war II is the most detailed and authoritative compendium of the weapons of mankind's greatest conflict ever published. It is a must for the military, enthusiast, and all those interested in World War II.

International Warbirds John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, International Warbirds: An Illustrated Guide to World Military Aircraft, 1914-2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched

tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.

Ki-61 and Ki-100 Aces Nicholas Millman, 2015-11-20 This is the story of the elite Japanese Army Air force (JAAF) aces that flew the Kawasaki Ki-61 Hien (Swallow), and the Ki-100 Goshikisen in the Pacific Theatre of World War 2. The former, codenamed 'Tony' by the allies, was a technically excellent aircraft, possessing power, stability and a good rate of climb - differing radically from the usual Japanese philosophy of building light, ultra-manoeuvrable fighters. Its pilots soon realised, however, that the type was plagued by a number of dangerous mechanical issues. Then as the war moved relentlessly closer to Japan's doorstep, a desperate, expedient innovation to the Ki-61 airframe by fitting it with a radial instead of inline engine resulted in one of the finest fighters of World War 2 - the Ki-100. This book uses the latest findings to provide a gripping account of some of the most remarkable and hard-pressed fighter pilots of the war. It reveals how these men, unlike so many of their unfortunate late-war colleagues, could surprise Allied aircraft in high-performance fighters and claim successes in the face of enormous odds.

VIOLET LIGHTNING John Eric Vining, 2020-11-13 An epic achievement over one hundred years in the making... In December 1941, Japan had perhaps the greatest combination of land, sea, and air forces the world had ever seen, and she used these to conquer a huge empire in the Western Pacific and East Asia. Yet by August 1945, Japan had been beaten to her knees by the combined power of China, Great Britain, and the United States. Was this destruction inevitable? Did Japan have no chance to defeat America and her allies? Why would she think she could successfully battle the two greatest industrial powers the world had ever known—Great Britain and the United States—at the same time? *Violet Lightning: A Blueprint for Japanese Victory in the Pacific, 1941-1942* is a sweeping narrative over a century in the making. From the first confrontation in 1895 between the United States and Japan over Hawaii; to the massive Japanese defeats at Midway and Guadalcanal in 1942; to author John Eric Vining's first interest in the Japanese-American conflict in the fall of 1967 by reading *Carrier War in the Pacific*; to the fall of 1995 when Vining first put pen to paper on this project; and finally, to 2020's finished product by Page Publishing, Vining reviews a history of the acrimony between Japan and the United States in the first half of the Twentieth Century. He then builds what one reviewer calls a "chillingly believable" scenario for a Japanese victory in the greatest of all wars. *Violet Lightning* poses and answers the question: "Could Japan really have pulled it off?" You just might find yourself coming around to a point of view you didn't believe was possible.

Japanese Army Air Force Units and Their Aces, 1931-1945 Ikuhiko Hata, Yasuho Izawa, Christopher Shores, 2009-04-21 An extensive guide to Japan's Army Air Force Units and their ace pilots during conflicts in the 1930s and '40s, now in English. Commencing with a detailed study of the

development, equipment, and operations flown by this force since its inception immediately after the end of World War I, until the catastrophic conclusion of World War II, the initial section deals with the wars in China and Manchuria, as well as the Pacific War of 1941-1945. The second section explores the history of each unit, listing the types of aircraft used, the bases from which they flew, and the unit and formation commanders. Notable mission details are also included. Finally, the third section offers biographical notes for notable fighter pilots and features supporting listings and a glossary of Japanese terms. Photographs of pilots and aircraft are also included, along with line drawings indicating the unit markings carried. This revised edition is a companion volume to Japanese Naval Air Force Fighter Units and Their Aces, 1932-1945.

Aces of the Republic of China Air Force Raymond Cheung, 2015-05-20 The ace pilots of the Republic of China Air Force have long been shrouded in mystery and obscurity, as their retreat to Taiwan in 1949 and blanket martial law made records of the RoCAF all but impossible to access. Now, for the first time, the colourful story of these aces can finally be told. Using the latest research based on released archival information and full-colour illustrations, this book charts the history of the top scoring pilots of the RoCAF from the beginning of the gruelling, eight-year Sino-Japanese War to the conclusion of the Civil War against the Chinese Communists. Beginning as a ragged and very disparate group of planes and pilots drawn from various provincial air forces, the RoCAF gradually became standardised and was brought under American tutelage. Altogether it produced 17 aces who scored kills whilst flying a startling variety of aircraft, from biplanes to F-86 Sabres.

Japanese Army Fighter Aces, 1931-45 Ikuhiko Hata, Yasuho Izawa, Christopher Shores, 2012 In-depth review of Imperial Japanese Army Air Force fighter units and pilots Detailed study of equipment (e.g., the Zero fighter), operations from Pearl Harbor to kamikaze attacks, and pilots who achieved

ace status Heavily illustrated with photos of pilots, aircraft, and unit insignia

World War II Fighter Planes Spotter's Guide Tony Holmes, 2021-02-04 World War II saw pilots from around the world battling in the skies over Europe, Asia and Africa, with victory resting upon their nerve, skill and the capabilities of some of history's most iconic aircraft. In the chaos of battle, it was vital that they could quickly identify friend from foe. But do you know your Hurricane from your Bf 109, or what the legendary P-51 Mustang looks like? Do you know the wingspan of the A6M Zero-sen, or how fast it could fly? *THE WORLD WAR II FIGHTER PLANES SPOTTER'S GUIDE* answers all of these questions and more, providing essential information on over 90 legendary aircraft, from the celebrated Spitfire to the jet-powered Me 262. Featuring full-colour artwork to aid recognition, as well as all the details you need to assess their performance, this is the perfect pocket guide to the Allied and Axis fighters of World War II.

Ki-43 'Oscar' Aces of World War 2 Hiroshi Ichimura, 2012-10-20 Dubbed the 'Oscar' by the Allies, the Ki-43 Hayabusa Peregrine was the most prolific Japanese fighter of World War 2. Designed for manoeuvrability and speed, the low-wing model meant that firepower and safety had to be sacrificed, with only two machine guns per plane. Despite this, more Japanese pilots achieved Ace status flying the Hayabusa than any other plane. This book expertly charts the experiences of the pilots and discusses the early stages of the war in South-East Asia, China, Burma and New Guinea. Accompanied by detailed appendices and specially commissioned artwork, this is the first volume in English to focus exclusively on the exploits of the Ki-43.
