The Biography of Tokumitsu Kanada Shizen-sha,2015 When Tokumitsu Kanada was alive, he once admonished his followers when they called him Founder, by saying, I'm not a founder of our teaching. The founder is God. He was a very humble person, so if we're to call him the founder of our teachings in this biography, he may not be pleased. However, we--as his followers--were saved from our sufferings and were guided by him, so he is unmistakably the founder of this teaching. We do not think it's impolite to his departed soul to refer to him in this way. Also, with our love and respect for him, we his followers don't know how else to refer to him other than as the founder of this teaching. There are some religious leaders who refer to themselves as so-called founders and behave as though they are above others. Therefore, we would like to acknowledge that by calling him Founder it is not our intention to confuse him with some of these people.

Retroviruses, retroelements and their restrictions Atsushi Koito,Yukihito Ishizaka,2015-05-01 Human retroviruses, HIV and HTLV have been recognized as important pathogens because of their association with lethal diseases such as AIDS and ATL. Considerable resources and efforts have been directed at understanding the interaction between these retroviruses and their host which may provide clues as to how the infection can be controlled or prevented. Among the key scientific successes is the identification of intracellular “restriction factors” that have evolved as obstacles to the replication of pathogens including infectious retroviruses. The discovery of APOBEC, which are strong mutagens of retroviral genomes and intracellular retroelements, began a new era of intense research activities into the spectrum of intrinsic anti-HIV activity, leading to the identification of TRIM5a, BST2/Tetherin, and SAMHD1. In response, HIV has evolved several accessory genes as weaponries to evade these intracellular restriction activities. The intracellular antiretroviral defenses evolved in response to endogenous retroelements that make up more than 40% of the entire mammalian genome, and which are regarded as ancestors of infectious retroviruses. LTR-type retroelements are present in all higher eukaryotes, representing about 8% of the human genome. Non-LTR retroelements can be found at extremely high copy numbers also, with a significant portion of mammalian genomes consisting of LINEs. Mammalian genomes are modified by LINEs through insertions, but also by the indirect replication of non-autonomous retrotransposons such as SINEs. LINEs insertion was shown to have played, and continue to play important roles in genomic evolution and somatic genome mosaicism-mediated physiology. And, because retrotransposition can confer genetic diversity that is beneficial to the host, the vertebrate intrinsic immunity has evolved to support a balance between retroelement insertions that confer beneficial and those that cause deleterious gene disruptions. The articles published in this Research Topic should serve not only as valuable references for the field, but provide future topics of research for investigators that should further our understanding of the retrovirus, retroelements and their restrictions.

The Four Great Temples Donald F. McCallum,2008-11-30 Few periods in Japanese history are more fascinating than the seventh century. This was the period when Buddhism experienced its initial flowering in the country and the time when Asukadera, Kudara Odera, Kawaradera, and Yakushiji (the Four Great Temples as they were called in ancient texts) were built. Despite their enormous historical importance, these structures have received only limited attention in Western literature, primarily because they are now ruins. Focus has been placed instead on Horyuji, a beautifully preserved structure, but not a key temple of the period. Donald McCallum seeks in this volume to restore the four great temples to their proper place in the history of Japanese Buddhism and Buddhist architecture. Extraordinary archaeological discoveries in the past few decades in the Asuka-Fujiwara area provide the basis for the monumental task McCallum has set for himself. Three of the temples have been studied archaeologically, but one, Kudara Odera (the first royal temple in Japan), has until recently been known only through textual references—primarily those mentioning its nine-story pagoda, a format closely linked to the grandiose royal temples of China and Korea. A series of digs carried out between 1997 and 2001 at Kibi Pond yielded what are thought to be the remains of Kudara Odera. A platform, the appropriate size for a large pagoda, has been uncovered at the site, indicating the reliability of the textual sources. These results have necessitated a rethinking of early Buddhist architecture in Japan. The Four Great Temples gives the first detailed account in the English language of these excavations. In his detailed analyses of each of the four temples, McCallum considers historiographical issues, settings and layouts, foundations, tiles, relics, and icons and allows readers to follow their chronological evolution. A key feature is the interweaving of archaeological and documentary data to clarify numerous historical problems that have until now resisted plausible solutions. Although the focus is on temples, the book looks at broader political and religious developments that serve as a context for the study. It further makes an effort to unify data on great royal temples in China, Korea, and other parts of Japan, thereby providing cross-cultural insights into a matter that has frequently been discussed only in terms of a single region. The Four Temples is a masterful, multifaceted study that will fundamentally alter and enrich current understanding of Japan's ancient Buddhist temples. It is sure to generate considerable discussion among scholars in the fields of Japanese and Asian history, art history, and Buddhist studies.

Waiting for the Cool Moon Wendy Matsumura,2023-12-22 In *Waiting for the Cool Moon* Wendy Matsumura interrogates the erasure of colonial violence at the heart of Japanese nation-state formation. She critiques Japan studies' role in this effacement and contends that the field must engage with anti-Blackness and anti-Indigeneity as the grounds on which to understand imperialism, colonialism, fascism, and other forces that shape national consciousness. Drawing on Black radical thinkers' critique of the erasure of the Middle Passage in universalizing theories of modernity's imbrication with fascism, Matsumura traces the consequences of the Japanese empire's categorization of people as human and less-than-human as manifested in the 1920s and 1930s, and the struggles of racialized and colonized people against imperialist violence. She treats the archives safeguarded by racialized, colonized women throughout the empire as traces of these struggles, including the work they performed to keep certain stories out of view. Matsumura demonstrates that tracing colonial sensibility and struggle is central to grappling with their enduring consequences for the present.

A Diplomat in Japan, Part II Ernest Mason Satow,2009 Sir Ernest Satow's well-known best-seller *A Diplomat in Japan* (first published in 1921) which is still widely available in paperback is based mainly on his diaries (journals) for 1862-69. The unabridged diaries in this volume, carefully transcribed from original documents held at the U.K. National Archives and published for the first time on lulu.com, tell the story of Ernest Satow's subsequent years in Japan (and home leaves in Britain, France, Germany and Italy) up until the start of 1883. This fully annotated book includes an introduction by former U.K. Ambassador to Japan Sir Hugh Cortazzi, six black & white illustrations, a map, a select bibliography, a chronology and an index. (This book is part of a series in which some of the extensive and hitherto unpublished Satow Papers are being made available in print to scholars and the general reading public by Ian Ruxton.)
