**A Carp for Kimiko** Virginia Kroll,1996-07-01 A CARP FOR KIMIKO is the story of a young girl's struggle against the strong current of tradition. Every year on Children's Day in Japan a kite in the shape of a carp is flown for each boy in the family. Kimiko is a little girl who desperately wants an orange, black, and white calico carp kite of her own to fly on this holiday. Kimiko's parents remind her that there is a holiday just for girls?Doll's Festival Day, but this does not stop Kimiko from dreaming about and wishing for her very own carp. The magical ending achieves the impossible?Kimiko gets what she longs for without breaking tradition. Katherine Roundtree's beautiful illustrations evoke the wonder and excitement of childhood, which will charm readers of all cultures.

**Samurai Road** Lawrence Winkler,2016-08-03 Most remote islands of the imagination conjure up paradise. Japan is an archipelago of puzzlement. From the sands that forged their swords and serenity, they traveled a Samurai Road of temples and shrines, feudal fortresses, and flowing mountain streams of wasabi. On sashimi and soy sauce, and green tea over rice, they lived a thousand years of pathos, under cherry blossoms and ephemeral moonlight, in Zen gardens and futon dreams. It was all so perfect.

**Japa e a lenda dos koinobori** Fernando A. Pires,Aparecida Kazue Ogino,2023-08-01 Duas histórias são contadas neste livro: a de Kaori, garota brasileira de origem japonesa que vai passar dois meses em Yokohama, no Japão; e a de Hiroshi, ou Japa, um garoto muito tímido, que joga futebol incrivelmente bem e também vai ao Japão acompanhando a mãe. Koinobori é a carpa lutadora, que mostra sua força nadando contra a correnteza do rio para não cair no mar e koinobori significa (koi = carpa, nobori = subida).

**Physical Models** Bill Addis,Karl-Eugen Kurrer,Werner Lorenz,2020-09-25 Physical models have been, and continue to be used by engineers when faced with unprecedented challenges, when engineering science has been non-existent or inadequate, and in any other situation when the engineer has needed to raise their confidence in a design proposal to a sufficient level to begin construction. For this reason, models have mostly been used by designers and constructors of highly innovative projects, when previous experience has not been available. The book covers the history of using of physical models in the design and development of civil and building engineering projects including bridges in the mid-18th century, William Fairbairn's Britannia bridge in the 1840s, the masonry Aswan Dam in the 1890s, concrete dams in the 1920s, thin concrete shell roofs and the dynamic behaviour

of tall buildings in earthquakes from the 1930s, tidal flow in estuaries and the acoustics of concert halls from the 1950s, and cable-net and membrane structures in the 1960s. Traditionally, progress in engineering has been attributed to the creation and use of engineering science, the understanding materials properties and the development of new construction methods. The book argues that the use of reduced scale models have played an equally important part in the development of civil and building engineering. However, like the history of engineering design itself, this crucial contribution has not been widely reported or celebrated. The book concludes with reviews of the current use of physical models alongside computer models, for example, in boundary layer wind tunnels, room acoustics, seismic engineering, hydrology, and air flow in buildings.

**The Crescent Odyssey** Rudolph Halouk Daus, 2014-09-15 When Rudolph Halouk Daus was born in 1933 in Paris, France, to an Ottoman princess and an American Beaux Arts educated entrepreneur with Jewish Rabbinical and French Catholic roots, no one had any idea that in just seven years, the German Army would invade France and uproot his family, sending all of them to fulfill new destinies. Daus shares a fascinating story of his diverse background, his ancestors, and his personal odyssey as he progressed from extraordinary beginnings to a miraculous escape from Nazi-occupied France and finally to an incredible naval career capped with command of two warships. As he details his singular progress across continents, Daus provides an unforgettable glimpse into a circuitous and star-crossed life as he experienced adventures, challenges, and heartbreaking trials as an American Naval Officer and was eventually led into a second career as a law firm manager and a third career as an entrepreneur whose ventures steered him from America to Turkey, Japan, and the Wild East of Central Asia. The Crescent Odyssey shares the fascinating story of a man for all seasons and his unique journey from his Turkey Ottoman soldier's roots to his escapades as an American warship captain and entrepreneur. "The Crescent Odyssey is a superb read and tells the story of the life and diverse background of an American Naval Officer, his shipmates, his family, his ancestors and his life at sea during the Cold War ... easy to understand for either the experienced sailor or one accustomed to life ashore ..." — Admiral Frank Kelso, United States Navy (Retired), 44th Chief of Naval Operations

**Social Networking Approach to Japanese Language Teaching** Yasu-Hiko Tohsaku,Fumiko Nazikian,Jisuk Park,2021-02-03 Social Networking Approach to Japanese Language Teaching is a timely guide for Japanese language teachers and anyone interested in language pedagogy. The book outlines an innovative approach to language instruction which goes beyond the communicative approach and encourages a global view of language education and curriculum development through the use of social networking. It showcases diverse examples of how social networking can be harnessed and incorporated into everyday language classes to increase learners' curiosity and engagement in real cultural and global interactions. While the focus is on Japanese language teaching, the concepts explored can be applied to other languages and teaching contexts.
