Demography of Indonesia's Ethnicity Aris Ananta, 2016-04-29 Indonesia, the largest country in Southeast Asia, has as its national motto e;Unity in Diversity.e; In 2010, Indonesia stood as the world's fourth most populous country after China, India and the United States, with 237.6 million people. This archipelagic country contributed 3.5 per cent to the world's population in the same year. The country's demographic and political transitions have resulted in an emerging need to better understand the ethnic composition of Indonesia. This book aims to contribute to that need. It is a demographic study on ethnicity, mostly relying on the tabulation provided by the BPS (Badan Pusat Statistik; Statistics-Indonesia) based on the complete data set of the 2010 population census. The information on ethnicity was collected for 236,728,379 individuals, a huge data set. The book has four objectives: To produce a new comprehensive classification of ethnic groups to better capture the rich diversity of ethnicity in Indonesia; to report on the ethnic composition in Indonesia and in each of the thirty three provinces using the new classification; to evaluate the dynamics of the fifteen largest ethnic groups in Indonesia during 2000-2010; and to examine the religions and languages of each of the fifteen largest ethnic groups.

The Kokoda Campaign 1942 Peter Williams, 2012-04-23 The fighting on the Kokoda Track in World War II is second only to Gallipoli in the Australian national consciousness. The Kokoda campaign of 1942 has taken on mythical status in Australian military history. According to the

legend, Australian soldiers were vastly outnumbered by the Japanese, who suffered great losses in battle and as a result of the harsh conditions of the Kokoda Track. In this important book, Peter Williams seeks to dispel the Kokoda myth. Using extensive research and Japanese sources, he explains what really happened on the Kokoda Track in 1942. Unlike most other books written from an Australian perspective, *The Kokoda Campaign 1942: Myth and reality* focuses on the strategies, tactics and battle plans of the Japanese and shows that the Australians were in fact rarely outnumbered. For the first time, this book combines narrative with careful analysis to present an undistorted picture of the events of the campaign. It is a must-read for anyone who is interested in the truth of the Kokoda campaign of 1942.

Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information.
