The Naval Arms Trade Ian Anthony, 1990 This book offers a sober appraisal of the world trade in naval weapon systems at a time when recent attacks on merchant shipping in the Persian Gulf have kept maritime security at the centre of global attention. At the same time India, outside the international non-proliferation regime, has become the first-ever customer for a nuclear attack submarine. In 1987-88, the most expensive and controversial arms sales were related to naval systems, and yet while regional navies are busy increasing their firepower, the traditional naval powers remain dependent on their sea-borne trade. In particular the book highlights critical areas in which trade in naval systems differs from the sale of land or air systems, and it discusses the implications of these differences.

**Arab-Israeli Military Forces in an Era of Asymmetric Wars** Anthony H. Cordesman, 2006-09-30 The reality of the Arab-Israeli balance now consists of two subordinate balances: Israel versus Syria and Israel versus the Palestinians. The book analyzes these two balances in detail and their impact on defense planning in each country and on the overall strategic risk to the region as a whole. It covers military developments in each of six states-Egypt, Israel, Jordan, Lebanon, Syria, and Palestine-and provides an analytical view with charts and tables of how the changing natures of the military and political threats faced by each is impacting its military force readiness and development. The book has the most comprehensive data on past, current, and future military force structure currently available, drawn from the widest range of sources. Responding to the most recent of events in the region, this book is the first to deal with the effects on the

Arab-Israeli military balance of the strategic uncertainty created by the Iraqi insurgency and the Iranian nuclear program. It also studies how the Gaza pullout, the Syrian withdrawal from Lebanon, the changing political landscape in Israel, and the threat of nuclear proliferation are having impacts on the Egyptian-Israeli and Jordanian-Israeli peace accords and the prospects for a settlement between the Palestinians and Israelis. The roles of Hezbollah, Hamas, and Palestinian Islamic Jihad are analyzed in light of the changing political landscape in both Israel and Palestine. Given the role of Syria in the Palestinian-Israeli affairs, the book also explores the ways that internal instability in Lebanon could escalate into a regional conflict.

The Military Balance in the Middle East Anthony H. Cordesman, 2004-09-30 Noted Middle East military expert Anthony H. Cordesman details the complex trends that come into play in determining the military balance in a region that has become so critical to world peace. This ready resource provides a wealth of information on military expenditures and major arms systems, as well as qualitative trends, by country and by zone. However, as Cordesman stresses, because the greater Middle East is more a matter of rhetoric than military reality, mere data summarizing trends in 23 different countries is no substitute for a substantive explanation. Using tables, graphs, and charts, this study explores every aspect of the regional military balance with attention to sub-regional balances, internal civil conflicts, and low level border tensions. The Middle East is certainly one of the most militarized areas in the world, and changes in technology, access to weapons of mass destruction, and political instability contribute to a situation that has long been in constant flux. Some of the regional flashpoints covered in this study include

the Maghreb (North Africa); the Arab-Israeli conflict (dominated by Israel versus Syria); and the Gulf (divided into those states that view Iran as the primary threat and those who lived in fear of Iraq). Internal conflicts, such as those in Mauritania, Algeria, Libya, Egypt, Sudan, Bahrain, Saudi Arabia, Iraq, and Yemen, increasingly dominate regional tensions. In addition, border conflicts within the region and with neighboring countries could further aggravate the delicate balance.

**China As A Maritime Power** David G. Muller, 2019-03-01 This book examines the evolution of Chinese maritime power for each of three major periods in modern Chinese history: 1945 to the Sino-Soviet break, 1960 to the Lin Biao incident, and 1971 to the present.

After The Storm Anthony H Cordesman, 2019-08-19 This comprehensive new analysis goes far beyond today's headlines and the basic facts and figures on the military forces in the region. Tracing the origin of the military forces in each Middle East country, Tony Cordesman discusses current security developments and provides a qualitative and quantitative analysis of the strength and effectiveness of

The Encyclopedia of the Arab-Israeli Conflict [4 volumes] [4 volumes] Spencer C. Tucker, Priscilla Roberts, 2008-05-12 This exhaustive work offers readers at multiple levels key insights into the military, political, social, cultural, and religious origins of the Arab-Israeli conflict. The Encyclopedia of the Arab-Israeli Conflict: A Political, Social, and Military History is the first comprehensive general reference encompassing all aspects of the contentious Arab-Israeli relationship from biblical times to the present, with an emphasis on the era beginning with World War I. The Encyclopedia of the Arab-Israeli Conflict goes beyond simply recapping military engagements. In four volumes, with more than 750 alphabetically organized entries, plus a separate documents volume, it provides a wide-ranging introduction to the distinct yet inextricably linked Arab and Israeli worlds and worldviews, exploring all aspects of the conflict. The objective analysis will help readers understand the dramatic events that have impacted the entire world, from the

founding of modern Israel to the building of the Suez Canal; from the Six-Day War to the Camp David Accords; from the assassinations of Anwar Sadat and Yitzhak Rabin to the rise and fall of Yasser Arafat, the 2006 Palestinian elections, and the Israeli-Hezbollah War in Lebanon.

Naval Weapons Systems and the Contemporary Law of War James J. Busuttil, 1998 This book provides the first comprehensive critical analysis of the regulation of naval weapons during armed conflict. It examines the experience this century with the use of naval mines, submarines and anti-ship missiles, the three main naval weapons. The sources of international law relevant to an assessment of the law, that is the extant conventions, state practice, military manuals, war crimes prosecutions, and the opinions of publicists, are

each extensively examined so that a clear picture of the law emerges. The book examines the impact of agreements drawn up in peacetime on wartime conduct and focuses on the growth of law through customary practice. While stating the law as it is today, it also provides suggestions for the practical development of the law.
