Origins of the Pacific War and the Importance of 'Magic' Keiichiro Komatsu,2018-10-24 'Magic' was the name given to the American decoding of the secret Japanese codes used in diplomatic communications before and during the Pacific War of 1941-45. This important new work, presenting a Japanese perspective, argues for the first time that in the final phase of the eight months of US-Japan talks leading to the attack on Pearl Harbor, serious mistranslations in Magic were a significant factor in the cumulative effect of mutual misunderstandings which grew between the two sides over a longer period. In spite of the number of historians who take the opposite point of view, the author argues that the efforts made by the participants on both sides to achieve a successful outcome and avert military conflict, or at least delay the outbreak of the war until the following March (1942), might have been much closer to achieving success than generally believed. The mistranslations of Magic which led to the crisis in 1941 were influenced by misunderstanding and misperception, and the persistence of stereotypes and 'images' among the parties involved. The study of these kinds of phenomena has been an important part of the growth of the discipline of international relations since the Second World War.

Contemporary Radiobiology Kenshi Komatsu,2019-10-28 People today worry about threats from radiation exposure. Such concerns have been backed up in the past when A-bombs were used in Hiroshima and Nagasaki during World War II, and from exposures which resulted from accidents in nuclear power plants in Chernobyl and Fukushima. In the past decade, knowledge of the effects of radiation

at the molecular level, including DNA damage and repair, has advanced dramatically. This book describes the current state of knowledge in the fields of radiation effects, the medical uses of radiation, and radiation protection. It also considers past nuclear disasters, including the accident at Fukushima, and trends in nuclear disarmament.

Built by Hand Athena Swentzell Steen,Bill Steen,Eiko Komatsu,2003 *Built by Hand* is a celebration of what is so uniquely diverse and yet similar in the buildings of different cultures around the world. Beginning with the most basic ways that human beings have sought shelter-beneath the trees and stars, under the protection of a rock cliff or cave-this book traces the transformation of materials such as earth, stone, wood or bamboo into shelters that are both stationary and moveable.

Humankind Yoshio Komatsu,Eiko Komatsu,2006 A photographic celebration of the commonalities that exist among all the peoples of the earth, illustrating what ties us all together. We all laugh, love, cry, and need.

Forest Radioecology in Fukushima Shoji Hashimoto,Masabumi Komatsu,Satoru Miura,2022 This is an open access book that provides holistic information on the radioactive contamination of forests. Topics are highly interdisciplinary, ranging from the dynamics of radioactive cesium in forest ecosystems to the radiation protection or the socio-economic aspects of radiation effects. It is designed to help people understand the radioactive contamination in forests and provide hints of how to cope with it and restore their livelihoods. The book is characterized by its well-balanced structure that allows the reader to understand the whole picture without going into too much scientific content. After explaining the basics of radioactive materials and radiation, the book illustrates the radioactive contamination of forests, it also describes the impacts on the forestry and life of local people and the measures taken by. Few books address the concerns about how to deal with radioactive contamination of forests and the future perspectives. In this book, people can learn all about the Fukushima nuclear accident of forests, forest products, and people with abundant reference materials. In addition, the book contains four memoirs contributed by Japanese and European researchers that graphically record what the researchers thought and how they acted in the chaos of the aftermath of the accident. In 2021 that marking the 10th anniversary of the Fukushima nuclear accident and the 35th anniversary of the Chernobyl accident, nuclear disasters are in the spotlight more than ever. This thought-provoking book on how to prepare for a severe nuclear accident is suitable for sharing with people all over the world as a lesson on the next nuclear accidents, now that the number of nuclear power plants is still increasing. The translation of this work was done with the help of artificial intelligence (machine translation by the service DeepL.com). Intensive improvements were subsequently made by the authors throughout the text to ensure accuracy of expression and contents and to enhance the clarity.
