Kongo Class Battlecruisers Steve

Wiper, 2008-05-30 The 'ShipCraft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly-detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references - books, monographs, large-scale plans and relevant websites. The subject of this volume is the Japanese Kongo class, four ships built during the First World War as battlecruisers, but extensively modified and reconstructed between the wars as fast battleships, so that each ship presented a different appearance. They were the chosen escorts for the elite IJN carrier forces, and saw much action during the Pacific War.

Kongō-Class Battleships Lars Ahlberg, Hans Lengerer, 2021-05-28 The battleships of the Kongō class were the oldest, smallest, and fastest battleships in the Imperial Japanese Navy during WWII. Initially classified as battle cruisers, the lead ship in the class, Kongō, was built in

England just prior to WWI. The remaining three ships in the class--Haruna, Kirishima, and Hiei--were all built and completed in Japan by 1915. All four ships were highly reconfigured in the 1920s, and they were reclassified as battleships in the 1930s. The four Kongō-class ships were the most active among the 12 WWII-era Japanese battleships and saw heavy combat throughout the war in such major campaigns as Pearl Harbor, Midway, Guadalcanal, and Leyte. All four ships were sunk by Allied forces by war's end. This book features rare Japanese primary source material, including numerous photos, line schemes, and detailed charts.

Japanese Battleship Kongo Waldemar Góralski, Grzegorz Nowak, 2015-04-02 Kongo, meaning indestructible, was the Imperial Japanese Navy's first super-dreadnought type battlecruiser, and the name-ship of her class, which also included the Hiei, Kirishima, and Haruna. She was upgraded to a battleship rating in the 1930s and served in several major naval operations during World War II before being sunk by enemy action in 1944. This modeling guide provides a lavishly illustrated history of this impressive warship with numerous close-up and panoramic shots based on actual technical drawings. About the Series This brand-new series focuses on the construction of famous

ships- battleships, carriers, cruisers, and submarines. With groundbreaking 3D imagery, each corner, angle, and dimension of the ship is viewable. With various close-up views, and each 3D image based on actual technical scale drawings and photographs, this is an exceptional reference tool. Information on the design, development and combat history of each vessel is also included, as well as numerous photographs and 1/350th scale drawings.

New Orleans Class Cruisers Lester

Abbey, 2009-08-30 The ShipCraft series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic survey of selected high-quality models in a variety of scales, and the book concludes with a section on research references - books, monographs, large-scale plans and relevant websites. The subject of this volume is the seven-ship New Orleans class, probably the US Navys most hard-fought heavy cruisers of the War three were sunk in action but others survived massive damage, and by 1945 three out of four of

the navys most decorated ships were of this class. Although designed within treaty limitations, they proved powerful and well-balanced ships, and their unparalleled fighting record makes them popular modelling subjects.

British Destroyers A-I and Tribal Classes Les Brown, 2009-02-19 The 'ShipCraft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, then moves to an extensive photographic survey of either a high-quality model or a surviving example of the ship. Hints on building the model, and on modifying and improving the basic kit, are followed by a section on paint schemes and camouflage, featuring numerous colour profiles and highly-detailed line drawings. The strengths and weaknesses of available kits of the ships are reviewed, and the book concludes with a section on research references—books, monographs, large-scale plans and relevant websites. This new volume deals with the classes which represent the whole inter-war development of British destroyers, from the prototypes Amazon and Ambuscade of 1926—the first new post World War I design—to the powerful and radically different 'Tribal' class a decade later. These ships formed the backbone of Royal Navy destroyer flotillas in the Second World War.

Imperial Japanese Navy Battleships 1941-45 Mark Stille, 2012-05-20 The Imperial Japanese Navy of World War II surpassed the Allied and Axis fleets in innovation and technology. This title covers the 12 Japanese battleships that saw service

between 1941 and 1945, including the mighty Yamato. Each class is considered in light of its design and construction, its armament and wartime modifications. The author, Mark Stille, uses primary sources and dramatic photographs to tell the story of these mighty battleships at war, including their major engagements during the raid at Pearl Harbor and the battle of Midway. The first English language book to include photographs from the prestigious Fukui Collection, this investigation will fascinate any naval enthusiast.

The Last Epic Naval Battle David

Sears, 2005-06-30 Often overshadowed by other Pacific War engagements such as Midway or Guadalcanal, the Battle of Leyte Gulf was characterized by some of the most gallant hours in seagoing history: the U.S. Navy's defeat of the combined Japanese fleet during the invasion of the Philippines in October 1944. Involving more ships than even the gargantuan First World War Battle of Jutland and two hundred thousand men, it was the biggest naval battle in world history. It marked the last time that huge capital ships fought within sight and sound of each other. Using the personal accounts of the men who were there, Sears tells this mammoth and compelling story. This moving tale uses personal accounts of the veterans who achieved victory in the biggest and last great naval battle, largely fought with aging ships, untested reserve crews, and teenaged combat aircraft pilots. Often overshadowed by other

Pacific War engagements such as Midway or Guadalcanal, the Battle of Leyte Gulf was characterized by some of the most gallant hours in seagoing history: the U.S. Navy's defeat of the combined Japanese fleet during the invasion of the Philippines in October 1944. Involving more ships than even the gargantuan First World War Battle of Jutland and two hundred thousand men, it was the biggest naval battle in world history. It marked the last time huge capital ships fought within sight and sound of each other. Using the personal accounts of the men who were there, Sears tells this mammoth and compelling story. The Battle of Leyte Gulf could have been the Pacific War's Battle of the Bulge. In a space of 12 hours, Japan, a beaten, cornered enemy, was able to devise and execute a strategy that very nearly pierced the heart of America's war machine. The real margin of victory would come from surprising quarters: from aging ships risen from the graveyard of the war's infamous first day; from small, hastily constructed ships with largely untested reserve crews; from fragile support ships never intended to be anywhere near battles of this scale; and from combat aircraft piloted by teenagers.

The Imperial Japanese Navy in the Pacific War Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful

navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

Japanese Battleships 1897-1945 R A

Burt, 2015-06-26 This photographic archive contains some 125 stunning images of the battleships of the Imperial Japanese Navy, many unfamiliar, some very rare. They constitute an archive that is pretty much without equal in publications in the West. The period covered is from the launch of Japan's first real contemporary battleship, Yashima, built by Armstrong's on the Tyne, up the final

destruction of her fleet in the Pacific in 1945. During that time Japan built up the third largest navy in the world and, before the First World War, it was Britain that armed her at sea. All her dreadnoughts saw action the the Second World War, and of all these numerous ships only Nagato survived the conflict. She was to become a target in the Bikini A-bomb tests in 1946 Just as the ships were lost, so were the majority of photographic records, and relatively few images have come down to us. This selection from R A Burt's archive, represents therefore a remarkable portrayal of these ships, and the large format of the book combined with the quality of many of the images ensures that it offers the reader maximum detail and visual impact. Extended captions and ship specifications enhance its reference value and it is destined to become a 'must-have' volume for enthusiasts and modellers and for all those with an interest in the Second World.

Admiral Hipper Class Cruisers Steve Backer, 2010-06-23 remove from The 'ShipCraft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships,

and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic survey of selected high-quality models in a variety of scales, and the book concludes with a section on research references—books, monographs, large-scale plans and websites. The subject of this volume is the largest and most sophisticated German cruiser class of WW2. The five ships suffered very different fates. Blucher was sunk during the invasion of Norway in 1940, whereas Admiral Hipper fought right through the war. The most famous, Prinz Eugen, escaped when Bismarck was sunk and survived to be expended in a postwar Atomic bomb test. Seydlitz was intended to be converted to an aircraft carrier, but never finished, while Lutzow was sold to Russia and sunk by her erstwhile owners.

County Class Cruisers Les Brown, 2011-12-05 The [ShipCraft] series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly-detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality

models in a variety of scales, and the book concludes with a section on research references □ books, monographs, large-scale plans and relevant websites.??This volume covers the British 10,000-ton □Treaty Cruisers□, thirteen of which were built to three slightly varying designs between the wars. With three funnels and a high freeboard, they were impressive ships, and all enjoyed very active wartime careers - three were involved in the Bismarck action and another with the sinking of the Scharnhorst.

Scharnhorst and Gneisenau Steve

Backer, 2012-08-30 A history of the service careers and advice on making models of “perhaps the most successful of the German battleships of the Second World War” (History of War). The ShipCraft series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeler through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring color profiles and highly-detailed line drawings and scale planes. The modeling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research reference books, monographs, large-scale plans and relevant websites. The two German ships

which form the subject of this volume were among the first products of rearmament under Hitler. For political reasons they were neither as large nor as well armed as foreign equivalents, but they were very fast, which led them to be described as battlecruisers in some quarters. They enjoyed an adventurous war, both surviving heavy damage, before Scharnhorst was sunk in an epic gun battle off the North Cape, while Gneisenau succumbed to heavy air attack. "For both vessels, the book gives details of modifications carried out, while a wealth of clear and detailed photographs and line drawings illustrate the ships themselves, as well as items of equipment." —Ships Monthly

Queen Elizabeth Class Battleships Les

Brown, 2013-06-03 The ShipCraft series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic survey of selected high-quality models in a variety of scales, and the book concludes with a section on research references - books, monographs, large-scale plans and relevant websites. This volume covers the five

ships of the highly successful Queen Elizabeth class, a design of fast battleship that set the benchmark for the last generation of dreadnoughts. Although they fought with distinction in WW1, all were thought valuable enough to be modernised between the wars - indeed, three were massively reconstructed, providing the modelmaker with a challenging variety of possible subjects.

Modern Warships Up Close Martin J.

Dougherty, 2015-12-15 In the last century, there have been some pretty amazing advances in naval technology. This visually arresting reference guide profiles several dozen warships. The naval vessels featured include submarines, amphibious landing craft, aircraft carriers, and destroyers. Both historically significant ships from the past and today's newest high-tech vessels have their moments in the spotlight. The book features amazing images of the vessels profiled, which were created in 3D then rendered as elevations. This one is sure to delight anybody who has an interest in the military, history, technology, or the ocean.

MIL' Mi-6/-26 Yefim Gordon, Dmitriy

Komissarov, 2016-07-31 Developed in the early 1950s to meet a Soviet Army requirement and first flown in June 1957, the Mi-6 was the largest-yet helicopter created in the Soviet Union. Its notable features included a power-plant consisting of two turbo-shaft engines (for the first time on a Soviet helicopter) and stub wings offloading the main rotor in forward flight; the cabin was big enough to accommodate artillery systems and tactical ballistic missiles. Built by two plants,

the Mi-6 saw service with the Soviet Air Force (including participation in the Afghan War) and the air arms of several Soviet allies. It also proved valuable as a civil air-lifter during oilfield exploration in Siberia, remaining in service right the way up to 2002. A worthy successor to the Mi-6 appeared in 1977 the Mi-26. With its 20-ton payload, it was (and still is) the worlds largest and most capable transport helicopter. Again, the Mi-26 had both military and commercial uses (the former included participation in several armed conflicts); the type is still in production, being updated to meet modern requirements, and has been exported to several countries in Asia and Latin America. The book describes the history, variants and service career of the Mil big lifters and contains a detailed overview of the scale model kits covering these types which are currently available on the market.
