Parenting Musically Lisa Huisman Koops, 2019-11-01 Parents use music in family life to accomplish practical tasks, make relational connections, and guide their children's musical development. *Parenting Musically* portrays the musicking of eight diverse Cleveland-area families in home, school, and community settings. Themes from interviews focused on the families' hopes and dreams for their children musically, as well as the families' perceptions of media messages regarding parents and music, serve to deepen the documentation of how families use and perceive music in their daily lives. Family musical interactions are analyzed using the concepts of musical parenting (actions to support a child's musical development) and parenting musically (using music to accomplish extra-musical parenting goals), arguing the importance of recognizing and valuing both modes. An additional construct, practical/relational musicking, adds to the detailed analysis of family musical engagement. Practical musicking refers to musicking for a practical purpose, such as learning a scale or passing the time in a car; relational musicking is musicking that deepens relationships with self, siblings, parents, or community members, such as a grandmother singing to her grandchildren via Facetime as a way to feel connected. Families who embraced both practical and relational musicking expressed satisfaction in long-term musical involvement. Weaving together themes of conscious and intuitive parenting, the rewards and struggles of musical practice, and the role of mutuality in community musicking, the discussion draws on research in music education, psychology, family studies, and sociology. This book serves to highlight the multi-faceted nature of families' engagement in music; the author urges music education practitioners and administrators to consider this diversity when approaching curricular decisions. Written in a style accessible to laypersons, this book will interest a wide range of music educators as well as families, community members, and scholars and practitioners in family studies, psychology, and sociology.

Historical Account of the Substances which Have Been Used to Describe Events, and to Convey Ideas, from the Earliest Date to the Invention of Paper by Matthias Koops, Esq Matthias Koops, 1801

The Oxford Handbook of United Nations Peacekeeping Operations Joachim Alexander Koops, Norrie MacQueen, Thierry Tardy, Paul D. Williams, 2015 The *Oxford Handbook of United Nations Peacekeeping Operations* offers for the first time a comprehensive overview and assessment of all 67 United Nations peacekeeping operations conducted between 1948 and 2013. Written by leading scholars and senior practitioners the handbook presents a chapter-by-chapter chronological analysis of the historical background, major development and overall effectiveness of each UN peacekeeping operation. In addition, the handbook includes a collection of thematic chapters that examine key issues such as 'major trends of peace operations', 'the link between peacekeeping, humanitarian interventions and the responsibility to protect', 'peacekeeping and international law', 'the UN's inter-organizational partnerships' and 'how to evaluate success or failure'. This handbook brings together leading

scholars and senior practitioners in order to provide a comprehensive assessment of the successes, failures and lessons learned of UN peacekeeping since 1948. This is a unique reference book for scholars and practitioners working in the field of international relations, international security, peacekeeping and global governance.

The Crypto Controversy: A Key Conflict in the Information Society Bert-Jaap Koops, 1999-01-01 Cryptography is essential for information security and electronic commerce, yet it can also be abused by criminals to thwart police wiretaps and computer searches. How should governments address this conflict of interests? Will they require people to deposit crypto keys with a 'trusted' agent? Will governments outlaw cryptography that does not provide for law-enforcement access? This is not yet another study of the crypto controversy to conclude that this or that interest is paramount. This is not a study commissioned by a government, nor is it a report that campaigns on the electronic frontier. The Crypto Controversy is neither a cryptography handbook nor a book drenched in legal jargon. The Crypto Controversy pays attention to the reasoning of both privacy activists and law-enforcement agencies, to the particulars of technology as well as of law, to 'solutions' offered both by cryptographers and by governments. Koops proposes a method to balance the conflicting interests and applies this to the Dutch situation, explaining both technical and legal issues for anyone interested in the subject.

The Development and Structure of Conscience Willem Koops, Daniel Brugman, Tamara J. Ferguson, Andries F. Sanders, 2009-10-16 This book focuses on the structure and development of conscience, a subject that has been dominant in developmental psychology since the 18th century. International experts in the field contribute to this broad overview of the relevant research on the development of moral emotions and on the Kohlbergian-originated cognitive aspects of moral development. The first section of the book focuses on the cultural conditions that create the context for the development of conscience, such as moral philosophy, religion, and media violence. Building on the theory and research on emotion, other chapters cover issues including the development of shame, self regulation and moral conduct, social cognition, and models of guilt. The book also covers moral reasoning, moral identity, moral atmosphere, moral behavior, and discusses subjects such as lying, how to measure moral development, the impact of parenting, the dysfunctions of conscience evident in narcissism, psychopathy, issues surrounding gender, and aggression. *The Development and Structure of Conscience* will be ideal reading for researchers and students of developmental and educational psychology.

Final Exam J. Barry Koops, 2019-12-15 It started with a poem torn out of *The New Yorker*, says J. Barry Koops of this collection of poems. It was the voice in the poem that snagged my attention. In the 85 poems that Koops eventually chose sometimes I recognize the math teacher across the hall; a colleague whose passing I mourn; a professor whose fingerprints are all over my life; a student who, I recognize, will do what I cannot; a classmate remembered over decades, who said what I was thinking; a joke or a jest like an arrow. Koops predicts that in the four sections you will hear something like threads of conversations, voices responding to one another, objecting, refuting, reflecting. *Final Exam* lifts a glass to memorable teachers and mentors and toasts the schools we remember with nostalgia and regret. Koops offers this

book as a tribute to teachers and professors who chose a life of significance, a life that made a difference-the teaching life.

Historical Developmental Psychology Willem Koops, Frank Kessel, 2020-05-21 This book explores and underlines the thesis that developmental psychology cannot function fruitfully without systematic historical scholarship. Scientific thinking not only depends on empirical-analytical research, but also requires self-reflection and critical thinking about the discipline's foundations and history. The relevance of history was made especially clear in the writings of William Kessen, who analyzed how both children and child development are shaped by the larger cultural forces of political maneuverings, practical economics, and implicit ideological commitments. As a corollary, he emphasized that the science of developmental psychology itself is culturally and historically shaped in significant ways. Discussing the implications of these insights in the book's introduction, Koops and Kessel stress that we need a Historical Developmental Psychology. In the book's following chapters, historians of childhood – Mintz, Stearns, Lasse, Sandin, and Vicedo – demonstrate how conceptions of childhood vary across historical time and sociocultural space. These foundational variations are specified by these historians and by developmental psychologists – Harris and Keller – in the research domains of emotions, attachment, and parenting. This collection demonstrates the importance of bridging, both intellectually and institutionally, the gap between the research of historians, and both current and future research of developmental psychologists. This book was originally published as a special issue of the European Journal of Developmental Psychology.

Art is mostly happy fading into the background at school and only really coming alive during his friends' weekly D&D game – until meeting Darcy pulls his life off-course in wonderful and alarming ways. Suddenly he has something worth fighting for. But what if that something puts him in conflict with his father, an influential and conservative figure in their town? Can Art stand up against his father's efforts to prevent Darcy and her friends from starting a queer-straight alliance at school? Voice of the Valley Sheena Koops, 2006-09-01 *Voice of the Valley* is a poetic, multi-layered, coming-of-age story inspired by the controversial flooding of Saskatchewan's Souris Valley. Onja Claibourn is almost fifteen. Her world is one of sage, buffalo bills, brown-eyed susans, cactus, flax, buckbrush, foxtail and orange moss—the world of the valley just beyond the family farm. Old roads twist like a game of snakes and ladders into the valley. Onja and her horse Ginger spend their summer days in exploration. But things begin to change when Onja discovers first an archeological dig and then the startling fact that there is a plan to dam and flood her valley. She cannot contemplate this change to the landscape she loves so much. And when she also discovers sixteen-year-old Etthen, working with the archaeologists, she begins those first faltering footsteps toward a totally unfamiliar landscape—romantic love. Onja Claibourn is a wonderfully complex and very real character—innocent, wise, shy, stubborn, playful, and caring. The other major character in the novel is the prairie landscape itself—huge sky, harsh sun, rolling hills, sweeping fields of grain.

Engineering the Human Bert Jaap Koops, Christoph H. Lüthy, Annemiek Nelis, Carla Sieburgh, J.P.M. Jansen, Monika S. Schmid, 2013-02-12 The volume is collection of articles treating the topic of human improvement/enhancement from a variety of perspectives – philosophical, literary, medical, genetic, sociological, legal etc. The chapters in this volume treat not only those aspects that most immediately come to mind when one thinks of 'human enhancement', such as genetic engineering, cloning, artificial implants and artificial intelligence etc. Somewhat less obvious aspects include evolutionary perspectives in connection with the prolongation of the human lifespan, plastic surgery since its beginnings, and questions such as whether the distinction between 'natural' and 'artificial' can really be drawn at all and how it has been conceived across the ages, or what the legal implications are of recent developments and techniques. Many papers make links to the representation of these developments in popular culture, from Jules Verne through Aldous Huxley to the movie *Gattaca*, address the hopes and fears that come with them as well as the question how realistic these are. While all chapters are written by scientists at the international top of their respective fields, all are accessible to a non-specialist audience and eminently readable. We believe that they represent a state-of-the art overview of questions that are of interest to a large audience. The book thus targets a non-specialist audience with an interest in philosophical, sociological, scientific and legal issues involved in both traditional and

recent matters concerning the desire of mankind to improve itself, the human body, the human mind and the human condition. It is unique in that it brings together all these aspects within a coherent and cohesive collection.
