The Kunai Country ,2018 The chief protagonists of The Kunai Country are Cliff Grey, Graham Dean and the kunai Highlands of New Guinea. They interact, one on the other. The action takes place in the 50's of last century. Cliff Gray is a twentyish man when he wins with his partner a block of land near Karawi - he is as young as the geological clay on which he settles, and as ready to be developed. Graham Dean is older, with that solidarity and self-containment so vital to an existence in the wilderness. Over the partners, broods forever the mountain range of the Okapa, black in the sunlight, permeating the lives of those who live in its shadow. The always fatal laughing death disease, called kuru, is endemic in the Okapa: the spirit of this laughing madness seems to extend as far as the little white community of Karawi, the government outpost. When the partnership splits in a conflict of personality, and Graham leaves the country, Cliff is the local outcast. The years of his aloneness are on him. Briefly Cliff meets Smithy, a Christian who believes all mankind must be able to read the Bible in their own language. She is a linguist who works in the Okapa, but her forthright fundamentalism appals him. Graham returns finally to Karawi - ironically to pioneer a new release of land adjacent to Cliff's well-established plantation. The older conflicts arise, compounded this time by Graham's wife. Somehow Graham has changed, weakened: the characters of the two men are almost completely reversed. The old kunai house in which Cliff and Graham lived so long, is fired in the flames of festivity. Mounting tensions are sparked off. Cliff, involved with Sandra Dean, flees the association, flees to the Wawiwa Pass, the last link in a road from the coast to the hinterland. The pass drops 3000 feet from the brink of the Okapa to a great sunlit plain. With his tractor and a few hundred calaboose natives, Cliff works out a government contract. He lives in a replica of the kunai house of yore: the rains come; and slowly the knowledge that he is going kanaka. Only when rival factions amongst the calaboose start a

riot, does he waken. The focal point of the riot is a hulking kanaka, by name Rubbis, who speaks no one's language. In a climactic scene that marks the end of Book 2, Rubbis is beaten to death. Cliff, somehow identifying himself with Rubbis, is beaten into insensibility. He is flown out to Lae. Lae divorces him from the darkness which he has known so long - a new life and love come to him. He meets again Smithy. Graham arrives in Lae, intending to pioneer the road to Karawi in an old Jeep. The rains close out Karawi airstrip, so Cliff and Smithy go with him. The Sensa River is the major obstacle: a torrent in the lee of the mountain barrier, it changes the course of three lives. It provides an essay in self recognition. Their interdependence is made manifest. Yet the Okapa is not yet done with them: in the final pages of the book it claims a victim - for in the Okapa we see an atavistic battleground, we see the age-old fight of man to lay claim to his own soul.

Through the Kunai Grass John Edward Stanton,Catherine Helen Berndt,Ronald Murray Berndt,2013 This exhibition showcases the work of Ronald and Catherine Berndt while they travelled to Papua New Guinea in 1951. Ronald Berndt was the Foundation Professor of Anthropology, arriving at the University in 1957; he was appointed Professor on the establishment of the Department in 1963, the same year in which he and his wife Catherine founded the international journal of Anthropology and Comparative Sociology, *Anthropological Forum*. The Berndts were among the first white outsiders to enter the high mountain valleys of the Eastern Highlands region. The dense forest, which impeded their ten-day trek, was broken by broad swathes of two metre high kunai grass across the Highland valleys, where villages such as Kainantu were located. These portraits of local people were taken on a small Leica camera, using precious Kodachrome I film, unobtainable in Australia in the immediate post-War era, but supplied to the Berndts by Margaret Mead at the American Museum of Natural History, New York.

Bladin Sayem Huq,2009-01-30 In a world where guns never existed, lies the nation of Bladin. Even when guns aren't in the picture, this nation is corrupted beyond imagination. And two noble races, the Ninjas (masters of assassination and deception, with a touch of justice) and the Samurais (masters of the blade and physical ability, with a stab of pride), are in major conflict (based on rivalries) that may inevitably cause the nation to collapse. With all hope lost, two humans born into this world, Ryuu Kodachi (raised as a keen ninja) and Gemori Battousai (raised as a master-less samurai) are the last hope for peace in the nation. But if one desires for peace, prepare for war. Ryuu and Gemori are thrown into entwined paths blocked by many obstacles; including duels against their own kin, supernatural humans, legendary beasts, as well their own state of emotions. Can the unsettled rivalry between ninjas and samurais be settled

in peace? Ryu and Gemori must find out the hard way: death, reason, and injustice. Impossible? It is simply a word. Ryu and Gemori must break through the impossibility of this grave war to rest at peace with the curse they were born with- to become a Legend.

The Neo-primitivist Turn Victor Li, 2006-01-01 In recent years the concept of 'the primitive' has been the subject of strong criticism; it has been examined, unpacked, and shown to signify little more than a construction or projection necessary for establishing the modernity of the West. The term 'primitive' continues, however, to appear in contemporary critical and cultural discourse, begging the question: Why does primitivism keep reappearing even after it has been uncovered as a modern myth? In *The Neo-primitivist Turn*, Victor Li argues that this contentious term was never completely banished and that it has in fact reappeared under new theoretical guises. An idealized conception of 'the primitive,' he contends, has come to function as the ultimate sign of alterity. Li focuses on the works of theorists like Jean Baudrillard, Jean-François Lyotard, Marianna Torgovnick, Marshall Sahlins, and Jürgen Habermas in order to demonstrate that primitivism continues to be a powerful presence even in those works normally regarded as critical of the concept. Providing close readings of the ways in which the premodern or primitive is strategically deployed in contemporary critical writings, Li's interdisciplinary study is a timely and forceful intervention into current debates on the politics and ethics of otherness, the problems of cultural relativism, and the vicissitudes of modernity.

Handbook of Reagents for Organic Synthesis André B. Charette, 2017-05-31 The Handbook is a compilation of 99 articles on diverse reagents and catalysts that describe the synthesis of heteroarenes, the building blocks of a wide range of chemicals used in pharma and chemical industries. Articles are selected from the e-EROS database and edited to make sure that it

includes only the material relevant to the topic of the book and focus on the synthetic aspects. This makes the articles very focused on the needs of readers wanting information on specific syntheses of specific heteroarenes. In addition, the chemistry of each parent heteroarene is also included to ensure that the reader rapidly finds important information. The Handbook is a part of the Handbook of Reagents for Organic Chemistry series, aiming at collecting articles on a particular theme that individual researchers in academia or industry can use on a daily basis.

Shadow's Last Light Kyrian Night, 2015-04-08 Having been torn from mortal lives, and thrown into immortality, the Sgath brothers soon find themselves hunted. Their eternity is on the line, as a twist of fate has them stalked by a malicious entity from the start of their eternal lives. But Calhoun Sgath looks to lead the Sgaths through the chaos fate has cast them, using the perks of immortality, and they are plenty. Fate can destroy you, but you learn to enjoy the good twists while you can. After all, fate is something written in actions, not stone. And in this new side of existence they now lived in, if immortals were real, then what else was possible?

Reagents for Silicon-Mediated Organic Synthesis Philip

L. Fuchs, 2013-05-30 Over the last three decades the importance of organosilicon chemistry has greatly increased because it has opened a number of new synthetic strategies. Silicon reagents are usually low-cost, versatile and allow a wide range of reactions. This is the first Handbook to compile essential Silicon containing reagents and make use of the leading reagent database e-EROS. Another hot volume in the series Handbooks of Reagents for Organic Synthesis, this is a must-have resource for all synthetic chemists working in drug development and medicinal chemistry. For the selection the Editor focussed on three key synthetic approaches with the greatest impact: 1. Use of silicon as a 'temporary tether' by unifying a reactive pair of functional groups and taking advantage of their template-biased intramolecular cyclization. 2. The specific use of the silane functionality as a hetero-butyl group, often colloquially referred to as the use of silicon as a 'fat proton'. 3. The use of the Brook rearrangement as an 'anion relay stratagem'. A new feature in this Handbook is the reagent finder, alphabetically organized lookup table arranged by organic functionality and specific structure of the silicon atom to which it is bound.
