Military History of Late Rome 602–641 Ilkka Syväne, 2022-12-29 The Military History of Late Rome 565-602 provides a fresh analysis of the Roman Empire from the reign of Phocas (602-10) until the death of Heraclius (610-41). This was an era of unprecedented upheavals which is usually considered to have resulted in the end of antiquity. The usurpations of Phocas and Heraclius led to the collapse of the Roman defenses; The Persians conquered Syria, Lebanon, Palestine and Egypt; The Avars and Slavs ravaged the Balkans; The Lombards held the upper hand in Italy; the Visigoths conquered Spain; But then happened one of the most remarkable reversals of fortune in the history of mankind. Heraclius began his holy war against the fire-worshippers. He launched a very effective counterattack against the Persians as a result of which the Romans not only defeated the Persians but actually even extended their domains at their expense, and not only this, because by 633 Heraclius was already restoring the Roman fortunes in the Balkans. This volume revises many of the previously held views of how this took place and what actually happened. The Roman armies seemed invincible and then happened yet another great reversal of fortune – the Muslims began their jihad to conquer the world. The author provides a fresh analysis of all of these upheavals; explains in detail why these reversals of fortune happened; what enabled the Romans to defeat the Persians; and why the Romans lost when they fought against the Muslims and, conversely, why the Muslims were so successful. This was an era of epic campaigns and battles all of which are explained in unprecedented detail. The epic campaigns needed equally talented commanders who include, for example, Heraclius, Chosroes II Parwez, Shahrbaraz, Shahin, Abu Bakr, Umar, Abu Ubaydah, and Khalid b. al-Walid, the Sword of Allah.

The Interceptor Pilot Kenneth Gangemi, 2000-12 This cinematic novel tells the story of an American fighter pilot, a veteran of aerial combat in the Korean War. Fifteen years later, for his own compelling reasons, the former ace volunteers his services to North Vietnam in a mission to defend the small country against bombing by his own countrymen. "A film you read," with elements of both a treatment and a screenplay, *The Interceptor Pilot* is a description of the action-adventure thriller that was politically impossible for Hollywood. Generates the power of the film it imagines itself to be. –New York Times Book Review

The Dance of Time Eric Flint, David Drake, 2006 Fantasy-roman.

Rome and the Distant East Raoul McLaughlin, 2010-05-06 In ancient times there were several major trade routes that connected the Roman Empire to exotic lands in the distant East. Ancient sources reveal that after the Augustan conquest of Egypt, valued commodities from India, Arabia and China became increasingly available to Roman society. These sources describe how Roman traders went far beyond the frontiers of their Empire, travelling on overland journeys and maritime voyages to acquire the silk, spices and aromatics of the remote East. Records from ancient China, early India and a range of significant archaeological discoveries provide further evidence for these commercial contacts. Truly global in its scope, this study is the first comprehensive enquiry into the extent of this trade and its wider significance to the Roman world. It investigates the origins and development of Roman trade voyages across the Indian Ocean, considers the role of distant diplomacy and studies the organization of the overland trade networks that crossed the inner deserts of Arabia through the Incense Routes between the Yemeni Coast and ancient Palestine. It also considers the Silk Road that extended from Roman Syria across Iraq, through the Persian Empire into inner Asia and, ultimately, China.

Anatomy of a Soldier Harry Parker, 2016-05-17 Anatomy of a Soldier is a stunning first novel—of patriotism, heroism, and profound humanism—that will immediately take its place on the shelf of classics about what it truly means to be at war. Let's imagine a man called Captain Tom Barnes, aka BA5799, who's leading British troops in the war zone. And two boys growing up together there, sharing a prized bicycle and flying kites before finding themselves estranged once foreign soldiers appear in their countryside. And then there's the man who trains one of them to fight against the other's father and all these infidel invaders. Then imagine the family and friends who radiate out from these lives, people on all sides of this conflict where virtually everyone is caught up in the middle of something unthinkable. But then regard them not as they see themselves but as all the objects surrounding them do: shoes and boots, a helmet, a bag of fertilizer, a medal, a beer glass, a snowflake, dog tags, and a horrific improvised explosive device that binds them all together by blowing one of them apart—forty-five different narrators in all, including the multiple medical implements subsequently required to keep Captain Barnes alive. The result is a novel that reveals not only an author with a striking literary talent and intelligence but also the lives of people—whether husband or wife, father or mother, son or daughter—who are part of this same heart-stopping journey. A work of extraordinary humanity and hope, created out of something hopeless and dehumanizing, it makes art out of pain and suffering and takes its place in a long and rich line of novels that articulate the lives that soldiers lead. In the boom of an instant, and in decades of very different lives and experiences, we see things we've never understood so clearly before.

Ki-108 Kai, J-7 Shinden, Ki-94II, D4Y Suisei, Ki-61, autant d'avions que l'on voit ici évoluer avec une grâce et un dynamisme prenant. Avec en toile de fond les réminiscences

des traditions mystiques japonaises qui se manifestent par de petites touches de fantastique savamment distillées, cette oeuvre nous plonge de plein pied dans le quotidien des Japanese Interceptors, pilotes déjà vaincus tentant chaque jour d'endiguer la marée infinie des B-29 au-dessus du Japon.

How Greek Science Passed On To The Arabs Delacy O'Leary, 2015-12-22 First published in 2002. The history of science is one of knowledge being passed from community to community over thousands of years, and this is the classic account of the most influential of these movements -how Hellenistic science passed to the Arabs where it took on a new life and led to the development of Arab astronomy and medicine which flourished in the courts of the Muslim world, later passing on to medieval Europe. Starting with the rise of Hellenism in Asia in the wake of the campaigns of Alexander the Great, O'Leary deals with the Greek legacy of science, philosophy, mathematics and medicine and follows it as it travels across the Near East propelled by religion, trade and conquest. Dealing in depth with Christianity as a Hellenizing force, the influence of the Nestorians and the Monophysites; Indian influences by land and sea and the rise of Buddhism, O'Leary then focuses on the development of science during the Baghdad Khalifate, the translation of Greek scientific material into Arabic, and the effect for all those interested in the history of medicine and science, and of historical geography as well as the history of the Arab world.
