The Law Lab Book Jennifer N Pahre, 2021-12-27 The Law Lab Book: Case Studies for Legal Learning surveys the historical development and modern application of key areas of law in the United States. Through a collection of dynamic role-playing exercises, the book challenges students to apply the law in different scenarios and learn about the varied work of different legal professionals. The book is organized into 17 chapters. Within each chapter, students read about key legal concepts and then work together in a group as prosecutors, legislators, justices, ethics panelists, and others to resolve a Law Lab. For each Law Lab, students review the substance of the law and then consider the central issue of the lab, focusing on the facts and legal rules that apply to it. The group is challenged to work together to complete a legal test or answer questions. In doing so, they are encouraged to share their opinions, talk through legal complexities, and work toward a resolution. The book unites theoretical legal learning with concrete application, while also teaching students about the law and the legal profession. The Law Lab Book is an excellent core textbook for law survey courses or any course with the goal of introducing students to American law.

Bread Lab! Kim Binczewski, Bethany

Econopouly, 2022-04 It's a sleepy Saturday morning for most people, but not for Iris, who has to feed her many pets before Aunt Mary arrives. Iris likes to call Aunt Mary Plant Mary because she is a plant scientist. Today Aunt Mary wants to experiment with making whole wheat sourdough bread from scratch! As the family kitchen transforms into a bread lab, Iris is surprised that bread needs only four ingredients--flour, water, salt and starter. She also learns about the invisible microbes that make the dough rise, and how flour comes from wheat grown by farmers. It all seems magical, but it's really science. Kim Binczewski and Bethany Econopouly, plant researchers at The Bread Lab at Washington State University, Mount Vernon, make their picture-book debut with this mouth-watering story that captures the step-by-step process and delicious aromas, sensations, sights and sounds of bread-making. The playful art of Hayelin Choi, illustrator of Alice Waters and the Trip to Delicious, crackle and pop with fun, to inspire new bakers and young scientists alike! TekLab William Shatner, 2012-11-13 Jake Cardigan hunts an assassin bent on killing civil servants in this sci-fi thriller by the iconic Star Trek

actor and New York Times–bestselling author. A French diplomat is walking alone down a darkened Paris side street, when a killer emerges from the shadows. He stuns the Frenchman, cuts his body into quarters, and leaves a note that reads: “This is for Brazil!” It is the ninth murder in this fashion in the last two months—a string of round-the-world killings that strikes fear into the hearts of all those connected with the bloody Brazilian wars of the past decade. But as private eye Jake Cardigan is about to discover, the culprit is far more treacherous than the average serial killer. As he makes his way through Europe’s seamy corners, Cardigan begins to suspect that the trail of death may lead back to his old nemeses, the drug kingpins known as Teklords. As international peace teeters in the balance, Cardigan must stop the murders or risk being drawn and quartered himself. This ebook features an illustrated biography of William Shatner including rare images and never-before-seen documents from the author’s personal collection.

The Food Lab: Better Home Cooking Through Science J. Kenji López-Alt, 2015-09-21 A New York Times Bestseller Winner of the James Beard Award for General Cooking and the IACP Cookbook of the Year Award The one book you must have, no matter what you’re planning to cook or where your skill level falls.—New York Times Book Review Ever wondered how to pan-fry a steak with a charred crust and an interior that’s perfectly medium-rare from edge to edge when you cut into it? How to make homemade mac ‘n’ cheese that is as satisfyingly gooey and velvety-smooth as the blue

box stuff, but far tastier? How to roast a succulent, moist turkey (forget about brining!)—and use a foolproof method that works every time? As Serious Eats's culinary nerd-in-residence, J. Kenji López-Alt has pondered all these questions and more. In *The Food Lab*, Kenji focuses on the science behind beloved American dishes, delving into the interactions between heat, energy, and molecules that create great food. Kenji shows that often, conventional methods don't work that well, and home cooks can achieve far better results using new—but simple—techniques. In hundreds of easy-to-make recipes with over 1,000 full-color images, you will find out how to make foolproof Hollandaise sauce in just two minutes, how to transform one simple tomato sauce into a half dozen dishes, how to make the crispiest, creamiest potato casserole ever conceived, and much more.
